New Approaches to English Linguistics Olga Timofeeva, Anne-Christine Gardner, Alpo Honkapohja, Sarah Chevalier, 2016-11-01 This book aims at providing a cross-section of current developments in English linguistics, by tracing recent approaches to corpus linguistics and statistical methodology, by introducing new inter- and multidisciplinary refinements to empirical methodology, and by documenting the on-going emphasis shift within the discipline of English linguistics from the study of dominant language varieties to that of post-colonial, minority, non-standardised, learner and L2 varieties. Among the key focus areas that define research in the field of English linguistics today, this selection concentrates on four: corpus linguistics, English as a global language, cognitive linguistics, and second language acquisition. Most of the articles in this volume concentrate on at least two of these areas and at the same time bring in their own suggestions towards building bridges within and across sub-disciplines of linguistics and beyond.

Student Plagiarism in Higher Education Diane Pecorari, Philip Shaw, 2018-10-09 Student Plagiarism in Higher Education is a crucial read for any university teacher concerned about plagiarism. It provides the tools and information needed to assess this often complex international phenomenon constructively and effectively from a variety of angles, and provides a framework for further discussion and research. Each chapter poses a question about an essential aspect of plagiarism and examines the central theoretical, ethical and technical questions which surround it. Providing a unique perspective on the topic of academic plagiarism, this book: addresses questions which are vexing in teaching practice, but for which ready answers are not available in professional skills development materials; relates plagiarism to wider issues of learning and intellectual development; collates the thinking of international leading experts on the topic of plagiarism from different areas of the academy. Student Plagiarism in Higher Education provides an excellent insight which thoroughly interrogates all aspects of the plagiarism argument. Theoretically based and carefully considered contributions from international experts ensure that this volume is an invaluable asset to anyone wishing to read more, learn more and think more about plagiarism.

Cancer: The Enemy from Within Carolyn Compton, 2020-05-06 This comprehensive, ground-

breaking title presents, in simplifying style, the driving and organizing principles of cancer, making this multidimensional, highly complex disease easily understandable for readers. Developed out of the renowned author's many years of teaching a widely popular, several-hundred-student college course, this 12-chapter book begins with an account of the history of cancer as a medical and public health problem, as well as the major milestones and setbacks in the ongoing quest to understand the wide variety of cancers that continue to impact the world. Subsequent chapters then address pathogenesis, incidence and mortality statistics, risk factors, causal factors, screening challenges and victories, treatment strategies, and disease prevention approaches. This wealth of clinical information is further supplemented with socioeconomic discussions on the financial, social, ethical, technological, regulatory, political, and logistical challenges that limit progress in cancer research. A soon to be gold-standard text that thoroughly and expertly describes cancer as a composite, adaptive system, *Cancer: The Enemy from Within* equips and empowers all undergraduate students and graduate students to better understand this continually perplexing disease. Clinicians across all disciplines may also find this work of great interest.

Citation-based Plagiarism Detection Bela Gipp, 2014-06-26 Plagiarism is a problem with far-reaching consequences for the sciences. However, even today's best software-based systems can only reliably identify copy & paste plagiarism. Disguised plagiarism forms, including paraphrased text, cross-language plagiarism, as well as structural and idea plagiarism often remain undetected. This weakness of current systems results in a large percentage of scientific plagiarism going undetected. Bela Gipp provides an overview of the state-of-the art in plagiarism detection and an analysis of why these approaches fail to detect disguised plagiarism forms. The author proposes Citation-based Plagiarism Detection to address this shortcoming. Unlike character-based approaches, this approach

does not rely on text comparisons alone, but analyzes citation patterns within documents to form a language-independent semantic fingerprint for similarity assessment. The practicability of Citation-based Plagiarism Detection was proven by its capability to identify so-far non-machine detectable plagiarism in scientific publications.

Annelida Basal Groups and Pleistoannelida, Sedentaria I Günter Purschke, Markus Böggemann, Andreas Schmidt-Rhaesa, Wilfried Westheide, 2019-03-18 This book is the first in a series of 4 volumes in the Handbook of Zoology series about morphology, anatomy, reproduction, development, ecology, phylogeny and systematics of Annelida. This first volume covers members of the so-called basal radiation and the first part of Sedentaria. It is supplemented by chapters on the history of annelid research, their fossil record, and an introduction to the phylogeny of annelids and their position in the tree of life. In the latter chapter the history of their systematic is reviewed giving an almost complete picture of systematic-scientific progress especially in the past years which changed our view on annelid phylogeny dramatically. The most basal annelids, lately united as Palaeoannelida, represent two families of aberrant polychaetes formerly often suggested to be highly derived which now give us a fresh look on how the ancestral annelid may have looked like. These lack certain key characters such as nuchal organs and possess rather simple nervous systems which now likely represent primitive character states. In this basal radiation the first taxon of apparently unsegmented and achaetigerous animals is positioned, the Sipuncula. Most likely another group of platyhelminth-like and unsegmented and even chaeta-lees annelids, Lobatocerebridae falls into this basal radiation. The section of Sedentaria starts with Orbiniida, a taxon characterized by elongated, thread-like worms which do not have anterior appendages like palps and comprises several families representing members of the Meiofauna. These minute worms often inhabiting the interstitial spaces

in marine sands are suggested to have evolved by progenesis. The second higher taxon is represented by Cirratuliformia comprising nine families of typical sedentary polychaetes each of which showing a remarkable variation of the annelid body plan. Members of this taxon usually exhibit many annelid characters but certain also lack the most typical prostomial appendages, the palps.

Avoiding Plagiarism Dr. Ken K. Wong,2011-01-07 Writing scholarly papers is a tough business; when you plagiarize someone else's work, you not only risk getting a bad grade—you could be expelled. *Avoiding Plagiarism* helps students to write better papers and avoid mark deduction due to improper citing and referencing. Examples using APA, Chicago, and Harvard citation styles are examined and made easy. Advance Praise for *Avoiding Plagiarism* "Unlike other resources in this area, Dr. Wong's book provides additional information on tools for similarity detection and citation

generation. Educators will find this book a valuable resource.” —Professor Wing Lam, Dean, U21Global, Singapore “Knowing how to cite and reference are fundamental skills which are missing in many graduate students. This book provides those ‘missing’ skills in an easy, innovative and entertaining way.” —Richard Anthony, Indonesia “This book provides useful information considering all the queries that may pop-up in a student’s mind while attempting to provide citations and references.” —Tasneem Tailor, India Dr.
