The Link Between Inflammation and Cancer Angus G. Dalgleish,Burkhard

Haefner,2006-03-05 A link between inflammation and cancer has been established many years ago, yet it is only recently that the potential significance of this connection has become apparent. Although several examples of chronic inflammatory conditions, often induced by persistent irritation and/or infection, developing into cancer have been known for some time, there has been a notable resistance to contemplate the possibility that this association may apply in a causative way to other cancers. Examples for such progression from chronic inflammation to cancer are colon carcinoma developing with increased frequency in patients with ulcerative colitis, and the increased incidence of bladder cancer in patients suffering from chronic Schistosoma infection. Inflammation and cancer have been recognized to be linked in another context for many years, i.e., with regards to pathologies resembling chronic lacerations or 'wounds that do not heal.' More recently, the immunology of wound healing has given us clues as to the mechanistic link between inflammation and cancer, in as much as wounds and chronic inflammation turn off local cell-mediated immune responses and switch on growth factor release as well the growth of new blood vessels - angiogenesis. Both of these are features of most types of tumours, which suggest that tumours may require an immunologically shielded milieu and a growth factor-rich environment.

The Routledge Handbook of Mesoamerican Bioarchaeology Vera

Tiesler,2022-05-23 This volume brings together a range of contributors with different and hybrid academic backgrounds to explore, through bioarchaeology, the past human experience in the territories that span Mesoamerica. This handbook provides systematic bioarchaeological coverage of skeletal research in the ancient Mesoamericas. It offers an integrated collection of engrained, bioculturally embedded explorations of relevant and timely topics, such as population shifts, lifestyles, body concepts, beauty, gender, health, foodways, social inequality, and violence. The additional treatment of new methodologies, local cultural settings, and theoretic frames rounds out the scope of this handbook. The selection of 36 chapter contributions invites readers to engage with the human condition in ancient and not-so-ancient Mesoamerica and beyond. The Routledge Handbook of Mesoamerican Bioarchaeology is addressed to an audience of Mesoamericanists, students, and researchers in bioarchaeology and related fields. It serves as a comprehensive reference for courses on Mesoamerica, bioarchaeology, and Native American studies.

Bio-Nanomedicine for Cancer Therapy Flavia Fontana,Hélder A. Santos,2021-02-04 The book covers the latest developments in biologically-inspired and derived nanomedicine for cancer therapy. The purpose of the book is to illustrate the significance of naturally-mimicking systems for enhancing the dose delivered to the tumor, to improve stability, and prolong the circulation time. Moreover, readers are presented with advanced materials such as adjuvants for immunostimulation in cancer vaccines. The book also provides a comprehensive overview of the current status of academic research. This is an ideal book for students, researchers, and professors working in nanotechnology, cancer, targeted drug delivery, controlled drug release, materials science, and biomaterials as well as companies developing cancer immunotherapy.

Defects in T Cell Trafficking and Resistance to Cancer Immunotherapy Emmanuel Donnadieu,2016-08-30 This volume focuses on recent advances in understanding T cells as key players in antitumor immune responses, and as a result T cell-based immunotherapy is starting to transform the treatment of advanced cancers. However, despite recent successes, many patients with cancer fail to respond to these treatments. Defective migration of T cells into and within tumors is considered as an important resistance mechanism to cancer immunotherapy. The volume includes three sections. The first section covers general knowledge about T cell trafficking during a normal immune response but also during tumor development. The second section provides an in-depth description of the different obstacles that prevent T cells from migrating and contacting tumor cells. The third section explores therapeutic strategies to improve trafficking of T cells into tumors and, thus, to enhance the effectiveness of cancer immunotherapy.
