This book presents a collection of totally different types of puzzles. The puzzles we present here use the pieces as building blocks only, and present many versatile challenges, from all types of recreational mathematics fields. For example, here you will find symmetry puzzles, cover-up puzzles and even a Poker-related puzzle. In several puzzles we will use not all seven pieces but a subset of them, and there are also puzzles for which you will need to join all pieces from two Tangram sets. From the moment we changed the rules (using the seven pieces to decipher silhouettes) we felt that the sky is the limit! There is something magical and enchanting in those seven pieces that enabled us to find many puzzles and challenges! Almost all the puzzles presented are new, unique and original. Some are based on classic puzzles, as well as more modern ones, modified and presented with using the set of Tangram pieces--

Game Twist Tangram 2 Tangram Also Reverso, 2022-11-02 Tangram is originally from China, and it's already thousands of years old. The game has 7 pieces that are used to complete puzzle missions according to the instructions. These days, Tangram is still a popular game for children in China, most children have the game in their school bag, but adults also love to play Tangram. After all these years, I felt that it was time to put my own spin on the game Tangram, so I started making matching and mirrored puzzle missions for the game, and wrote several E-books about it. For this E-book, you will need 1 Tangram game. First, the puzzle missions must be completed according to the instructions, and in the next round the puzzle missions must be mirrored. This makes the game more difficult and more challenging than the standard Tangram game. Have fun completing the matching and mirrored puzzle missions.
