She Has Her Mother's Laugh Carl Zimmer, 2018-05-29 2019 PEN/E.O. Wilson Literary Science Writing Award Finalist Science book of the year—The Guardian One of New York Times 100 Notable Books for 2018 One of Publishers Weekly's Top Ten Books of 2018 One of Kirkus's Best Books of 2018 One of Mental Floss's Best Books of 2018 One of Science Friday's Best Science Books of 2018 "Extraordinary"—New York Times Book Review Magisterial—The Atlantic Engrossing—Wired Leading contender as the most outstanding nonfiction work of the year—Minneapolis Star-Tribune Celebrated New York Times columnist and science writer Carl Zimmer presents a profoundly original perspective on what we pass along from generation to generation. Charles Darwin played a crucial part in turning heredity into a scientific question, and yet he failed spectacularly to answer it. The birth of genetics in the early 1900s seemed to do precisely that. Gradually, people translated their old notions about heredity into a language of genes. As the technology for studying genes became cheaper, millions of people ordered genetic tests to link themselves to missing parents, to distant ancestors, to ethnic identities... But, Zimmer writes, "Each of us carries an amalgam of fragments of DNA, stitched together from some of our many ancestors. Each piece has its own ancestry, traveling a different path back through human history. A particular fragment may sometimes be cause for worry, but most of our DNA influences who we are—our appearance, our height, our penchants—in inconceivably subtle ways." Heredity isn't just about genes that pass from parent to child. Heredity continues within our own bodies, as a single cell gives rise to trillions of cells that make up our bodies. We say we inherit genes from our ancestors—using a word that once referred to kingdoms and estates—but we inherit other things that matter as much or more to our lives, from microbes to technologies we use to make life more comfortable. We need a new definition of what heredity is and, through Carl Zimmer's lucid exposition and storytelling, this resounding tour de force delivers it. Weaving historical and current scientific research, his own experience with his two daughters, and the kind of original reporting expected of one of the world's best science journalists, Zimmer ultimately unpacks urgent bioethical quandaries arising from new biomedical technologies, but also long-standing presumptions about who we really are and what we can pass on to future generations.

Assessment of Microinsurance as Emerging Microfinance Service for the Poor Asian Development Bank,2017-02-01 The Asian Development Bank (ADB) is an active partner of the Government of the Philippines in developing microfinance---the provision of insurance products that meet the needs of the disadvantaged for risk protection and relief against misfortune. As a result, microfinance activities have increased, and diversified formal financial services were made available to impoverished clients at affordable costs. However, there is still the risk of making poverty-stricken clients worse off because of unexpected events, prompting ADB to create interventions that focus on microinsurance development. This report assesses the expansion of microinsurance activities based on the Philippines' experience, with guidance on next steps forward.

Rebel City: Hong Kong's Year Of Water And Fire South China Morning Post Team, 2020-05-21 SCMP's reporting team looks back at Hong Kong's most wrenching political crisis since its return to Chinese rule in 1997. Anti-extradition bill protests that morphed rapidly into a wider anti-government movement in 2019 left no aspect of the city untouched, from its social compact to its body politic to its open economy. The demonstrations which continued well into 2020 have tested every institution of the city, from the civil service to the police to the courts and even its rail transport operator, and from offices and businesses to universities and schools, and from churches to families and even friends. This book is for anyone seeking to understand not just what Hong Kong has gone through but also the global phenomenon of increasingly leaderless protest movements. Fueled by profound angst about the place of millennial youth in society, widening income inequality, and the speed of digital communications, Hong Kong was in retrospect ripe to be the laboratory for a new-age protest movement, nearly a decade after the Middle East's Arab spring. The essays in the book collectively compose a picture of a society in trauma, bent and broken, but showing signs of an uncanny ability to bounce back. What shape it will be in a few years from now, however, is much harder to predict. Related Link(s)
