The Class Heather Won Tesoriero, 2018-09-04 An unforgettable year in the life of a visionary high school science teacher and his award-winning students, as they try to get into college, land a date for the prom . . . and possibly change the world “A complex portrait of the ups and downs of teaching in a culture that undervalues what teaching delivers.”—The Wall Street Journal Andy Bramante left his successful career as a corporate scientist to teach public high school—and now helms one of the most remarkable classrooms in America. Bramante’s unconventional class at Connecticut’s prestigious yet diverse Greenwich High School has no curriculum, tests, textbooks, or lectures, and is equal parts elite research lab, student counseling office, and teenage hangout spot. United by a passion to learn, Mr. B.’s band of whiz kids set out every year to conquer the brutally competitive science fair circuit. They have won the top prize at the Google Science Fair, made discoveries that eluded scientists three times their age, and been invited to the Nobel Prize ceremony in Stockholm. A former Emmy-winning producer for CBS News, Heather Won Tesoriero embeds in this dynamic class to bring Andy and his gifted, all-too-human kids to life—including William, a prodigy so driven that he’s trying to invent diagnostics for artery blockage and Alzheimer’s (but can’t quite figure out how to order a bagel); Ethan, who essentially outgrows high school in his junior year and founds his own company to commercialize a discovery he made in the class; Sophia, a Lyme disease patient whose ambitious work is dedicated to curing her own debilitating ailment; Romano, a football player who hangs up his helmet to pursue his secret science expertise and develop a “smart” liquid bandage; and Olivia, whose invention of a fast test for Ebola brought her science fair fame and an appearance on The Late Show with Stephen Colbert. We experience the thrill of discovery, the heartbreak of failed endeavors, and perhaps the ultimate high: a yes from Harvard. Moving, funny, and utterly engrossing, The Class is a superb account of hard work and high spirits, a stirring tribute to how essential science is in our schools and our lives, and a heartfelt testament to the power of a great teacher to help kids realize their unlimited potential. Praise for The Class “Captivating . . . Journalist Tesoriero left her job at CBS News to embed herself in Bramante’s classroom for the academic year, and she does this so successfully, a reader forgets she is even there. Her skill at drawing out not only Bramante but also the personal lives, hopes and concerns of these students is impressive. . . . It is a fascinating glimpse of a teaching

environment that most public school teachers will never know.”—The Washington Post

The Bully in the Book and in the Classroom Christie Jo Bott, 2004 Noted expert on bullying and English teacher, Bott hand-picked this selection of 40 books to use to successfully address the kinds of bullying behavior that occur at a particular age. The Classroom of Choice Jonathan C. Erwin, 2004-05-15 Outstanding! . . . a great guide for teachers who want to succeed with every student they teach. -William Glasser Teachers everywhere face the daily challenge of engaging students whose knowledge, skills, needs, and temperaments vary greatly. How does a teacher establish a learning environment that supports the class as a whole while meeting the particular needs of individual students? Teacher Jonathan C. Erwin believes the answer lies in offering real opportunities to students rather than throwing up the obstacles inherent in traditional discipline and motivation techniques. At the heart of his approach are the five basic human needs of William Glasser's Choice Theory: survival and security, love and belonging, power through cooperation and competency, freedom, and fun. By understanding and attending to these needs, teachers can customize and manage a classroom environment where students learn to motivate and monitor themselves. Drawing on theories and practices from experts in a variety of learning techniques, Erwin explores each of the five basic needs to create nearly 200 adaptable strategies for teaching and classroom management at any grade level. Readers will find dozens of ideas for helping students make positive changes, including * Improving their work habits, * Connecting curriculum with individual interests, * Opening lines of communication with teachers and other students, * Boosting self-worth through accomplishment, and * Supporting their classmates in cooperative work. Erwin ties everything together in a unit guide that allows teachers to develop a classroom profile based on the needs of individual students. The guide can be used with any district planning approach or curriculum. For teachers seeking a win-win situation in managing their classrooms, *The Classroom of Choice* is an excellent aid in creating a learning environment in which students and teachers approach each day with energy and enthusiasm. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

Creativity in the Classroom Alane J. Starko, 2010 The fourth edition of this well-known text continues the mission of its predecessors â€ to help teachers link creativity research and theory to the everyday activities of classroom teaching. Part I (chs 1-5) includes information on models and theories of

creativity, characteristics of creative people, and talent development. Part II (chapters 6-10) includes strategies explicitly designed to teach creative thinking, to weave creative thinking into content area instruction, and to organize basic classroom activities (grouping, lesson planning, assessment, motivation and classroom organization) in ways that support students' creativity. Changes in this Edition: Improved Organization -- This edition has been reorganized from 8 to 10 chapters allowing the presentation of theoretical material in clearer, more manageable chunks. New Material -- In addition to general updating, there are more examples involving middle and secondary school teaching, more examples linking creativity to technology, new information on the misdiagnosis of creative students as ADHD, and more material on cross-cultural concepts of creativity, collaborative creativity, and linking creativity to state standards. Pedagogy & Design -- Chapter-opening vignettes, within-chapter reflection questions and activities, sample lesson ideas from real teachers, and end-of-chapter journaling activities help readers adapt content to their own teaching situations. Also, a larger trim makes the layout more open and appealing and a single end-of-book reference section makes referencing easier. Targeted specifically to educators (but useful to others), this book is suitable for any course that deals wholly or partly with creativity in teaching, teaching the gifted and talented, or teaching thinking and problem solving. Such courses are variously found in departments of special education, early childhood education, curriculum and instruction, or educational psychology.

Dreaming in the Classroom Philip King, Kelly Bulkeley, Bernard Welt, 2011-05-01 Dreaming in the Classroom provides teachers from virtually all fields with a uniquely informative guidebook for introducing their students to the universal human phenomenon of dreaming. Although dreaming may not be held in high esteem in mainstream Western society, students at all education levels consistently enjoy learning about dreams and rank classes on dreaming among their favorite, most significant educational experiences. Covering a wide variety of academic disciplines such as psychology, anthropology, humanities, film studies, philosophy, religious studies, the book explains in clear and practical language the most effective methods for teaching accurate, useful information about dreams to students in colleges and university, graduate programs, psychotherapy institutes, seminaries, primary and secondary schools, and non-academic settings. Included are detailed discussions of how to create an appropriate syllabus, integrate material from multiple disciplines, nurture skills in writing and critical reasoning, propose courses to skeptical administrators, and facilitate a responsible process for sharing dreams in a classroom setting. The book draws on interviews with dozens of accomplished teachers, along with the authors' many years of pedagogical practice, to present proven strategies for using this perennially fascinating topic to promote successful student learning.

Talking Race in the Classroom Jane Bolgatz, 2005 This lively book will help new and veteran teachers develop the knowledge, skills, and confidence needed to successfully address racial controversies in their classrooms. The author first explains what race and racism mean and why we need to talk about these topics in schools. Then, based on an in-depth study of a high school classroom, she shows what happened when teachers and students talked about race and racism in a history and language arts classroom. Throughout the book she guides teachers in ways to discuss important issues, from civil rights to institutional racism, that will ultimately help teachers and students to change school culture. The book provides an analysis of actual classroom dialogues, illustrating the often-rough conversations that teachers and students engage in while learning to talk constructively about race and racism, useful questions, resources, and activities to help teachers get started, and ideas and strategies that teachers can use to get students to address race and racism critically in the classroom.
