Jacques Leibowitch

Virus Ground Zero Edward Regis,Ed Regis,1998-07 An acclaimed science writer takes readers behind the scenes at the Centers for Disease Control to tell the story of an engrossing odyssey across the viral frontier.

**Cyrus the Virus** D. J. Chakraborty,2021-04-01 The character Cyrus the Virus was created in 1979 when the author was nine-years-old and welcomed a new baby brother. Always fond of cleanliness, she was especially careful to keep her two brothers and the family home disinfected and deodorized. In science class, she learned that a dirty environment breeds disease, especially viruses; what better name for a virus than Cyrus? The responsible big sister was keen to make sure her baby brother, five-year-old brother, and all their friends kept clean and safe from foul, fetid Cyrus the Virus. After two or three patient years, the author's mother told her, "Enough of your Cyrus the Virus stories! It is not nice to frighten your brothers and friends." After an intermission, Cyrus the Virus was reborn in 1991 when the author became a mother welcoming her own baby boy. She had never abandoned her love for cleanliness and was enthusiastic to keep her son, her two brothers, and the family home superbly sanitized. Once again, two or three patient years elapsed. Her mother again said, "Enough already with your Cyrus the Virus stories! What kind of mother frightens her own child?" A milder version of Cyrus the Virus came back to life in 2018 as the author recovered from influenza. Enthusiastic to keep her students healthy, she related the importance of proper hygiene and developed lessons plans and techniques to accomplish it. Those techniques are discussed and detailed in this book; washing hands is only one part of the clean procedure. Today, the deadly

coronavirus has proliferated a pandemic beyond human imagination. Recommended for ages nine to adult, this book will hopefully inspire readers to utilize the cure they already possess. Happy, healthy reading!

**The Butterfly Virus** Victor Grippi,2009-02-02 When an unknown virus breaks out in the Southwest, a genetic engineer, his newly hired chief scientist, and an archaeologist specializing in Native American cultures team up to combat it.

Surviving a Killer Virus Charlie Ogden,2017-12-15 Killer viruses are just the focus of movies in the experience of most readers, but they're not out of the realm of possibility. Viruses can spread at unbelievably fast rates and with frightening consequences. After reading this inventive volume, young virologists will picture themselves as the hero of their own story. They'll learn how viruses spread, how to avoid contamination, and the best way to battle and perhaps conquer an invisible killer. Science meets science fiction in this motivating look at what happens when deadly viruses rage out of control.

**The Virus** Harry Katzen Jr.,2020-08-24 Virus is a work of fiction and should be regarded as entertainment and no more. This book uses history but is not history, as the persons, places, events, and relationships are all elements of the author's imagination. Any resemblance to actual persons, places, or events is strictly coincidental. The names of aircraft and their characteristics are standard knowledge, as are the buildings in London. The names of royalty are all made up. This book was written during the pandemic and many of the events may have actually happened, but the author has no knowledge of them. The Buckingham Palace is an impressive facility and it may or may not have guest rooms and conference facilities. England is a historic country and the notion of a Royal Monarchy is definitely something to be

enjoyed. The book continues with the author's tradition of no violence, no sex, and no bad language. Thanks to my wife Margaret for help and inspiration.

**How to Vanquish a Virus** Paul Ian Cross, 2021-08-03 A funny and fascinating blend of facts, quotes, and science stories from the world of health research and science history, including COVID-19. ★ Children will devour this book and hopefully be inspired to become the next super scientists. — Kirkus Reviews, starred review In the wake of Covid-19, children and parents are keen to understand—and be reassured about—viruses and other health issues. With over twenty years' experience of scientific research, Dr. Paul Ian Cross sets out to answer all the questions we didn't know we needed answering until now. What does a virus look like? How does a virus get passed from person to person? How have viruses changed the world? And who are the men and women who have beaten them? Contents include: Chapter 1: What is a virus? Chapter 2: History goes viral Chapter 3: Crafty COVID-19 Chapter 4: Battling bodies & magical minds Chapter 5: Remarkable research, marvelous medicines Chapter 6: Superhero scientists Chapter 7: How to vanquish a virus Chapter 8: The future: a new world With children leading the revolution, now is the time to understand the importance of making medicines ... and how to vanquish a virus. Any fans of Horrible Histories or Operation Ouch will love this book.

*Of Mice, Men, and Microbes* David R. Harper, Andrea S. Meyer, 1999-06-28 In May 1993, a cluster of cases of a lethal disease among healthy young people brought the attention of the world to the southwestern deserts. A previously unknown disease was killing up to 80% of the people it infected. The reaction in the area and across the nation mixed fear, lack of information, and the struggles of doctors to save

the victims of an unknown killer with hard science and the age old rhythmns of the desert. What came out was the story of a virus that had been killing since man arrived in the American continents, Hantavirus, with deadly relatives across the Americas and across the world. This book explains why and how the virus kills, and why it is still killing today. Why all of the science aimed at a virus identified back in 1993 has not brought a vaccine or a cure is part of the story, as is how that killer virus fits into the story of new diseases across the world. The story of hantavirus disease, what has happened since that first outbreak, and what the real risks are is laid out by an experienced scientist and an award winning journalist living and working in the area of the 1993 outbreak. Covers the full story of the recent hantavirus outbreak Includes interviews with survivors, and local reaction Presents the science in lay terms Places the event in the broader context of emerging diseases worldwide The only account which takes the reader beyond the initial outbreak in 1993-1994, bringing them up to late 1998 Discusses hantavirus disease in the U.S., Argentina, and Canada

*The Reaper Virus* Nathan Barnes, 2014-01-15 Richmond burns once again but this time it is caused by a deadly virus, quickly dubbed the Reaper Virus, that is ravaging and reanimating all it encounters. This agent of the apocalypse breaks through the boundaries separating life and death while demonizing the afterlife. Havoc is ferociously wrought upon every corner of the globe by the infected hunger. Trapped at his dispatcher desk in a campus police station, Nathan is determined to do whatever it takes to return to his family. Betrayal, murder and the countless undead surround Nathan as he makes his way through the unknown darkness of his city back to what he hopes waits for him at home. Testing humanity's limitations,

THE REAPER VIRUS takes you on a quest for survival in a world destroyed. The story brings death to your doorstep and causes you to question your own drive for survival. You will be forced to answer the question: if the world ended today, what would you really do to see your loved ones again?

**West Nile Virus** Jeffrey N. Sfakianos,2009 Often a serious illness, West Nile Virus seems to arise as a seasonal epidemic in North America, beginning in the summer and continuing into the fall.

The Gemini Virus Wil Mara,2013-08-27 In the wake of a pandemic virus that rapidly spreads throughout the world killing millions of people, Dennis and Andi Jensen flee the ensuing panic and escape to the mountains while scientist Cara Porter makes a potentially fatal mistake in her laboratory.

*Panic in Level 4* Richard Preston,2009-06-16 Bizarre illnesses and plagues that kill people in the most unspeakable ways. Obsessive and inspired efforts by scientists to solve mysteries and save lives. From The Hot Zone to The Demon in the Freezer and beyond, Richard Preston's bestselling works have mesmerized readers everywhere by showing them strange worlds of nature they never dreamed of. Panic in Level 4 is a grand tour through the eerie and unforgettable universe of Richard Preston, filled with incredible characters and mysteries that refuse to leave one's mind. Here are dramatic true stories from this acclaimed and award-winning author, including:

- The phenomenon of "self-cannibals," who suffer from a rare genetic condition caused by one wrong letter in their DNA that forces them to compulsively chew their own flesh—and why everyone may have a touch of this disease.
- The search for the unknown host of Ebola virus, an organism hidden somewhere in African rain forests, where the disease finds its way into the human species, causing outbreaks of unparalleled horror.
- The brilliant Russian brothers—"one

mathematician divided between two bodies”—who built a supercomputer in their apartment from mail-order parts in an attempt to find hidden order in the number pi ( $\pi$ ). In fascinating, intimate, and exhilarating detail, Richard Preston portrays the frightening forces and constructive discoveries that are currently roiling and reordering our world, once again proving himself a master of the nonfiction narrative and, as noted in The Washington Post, “a science writer with an uncommon gift for turning complex biology into riveting page-turners.”

**West Nile Virus** Melissa Abramovitz,2013-01-14 As new cases of West Nile Virus begin to appear across the United States, this book offers a timely discussion of this potentially devastating disease. Author Melissa Abramovitz outlines the mechanics of virus transmission and how mosquitoes and disease-carrying birds have played a key role in the West Nile Virus epidemic. This book covers basic information about the virus and its possible effects, as well as a discussion of personal and governmental prevention plans. The last chapter focuses on treatments currently in development.

**THE VIRUS** James Seligman,2020-01-10 THE SOVIETS ARE DEVELOPING NEW MISSILES  
HYPERSONIC DEADLY AND ACCURATE THE WEST NEEDS AN ANSWER AND THE VIRUS IS  
BORN

**The Z Virus** Brent Miller,2012-08-15 On a regular school day in a small California town, a mysterious outbreak begins at a local high school. Students and teachers all around start turning into blood-thirsty creatures, and just three students are able to escape the school grounds to make their way home. It is not long before they realize they may be the only people in town still alive. Learning quickly to adapt to an

unimaginable environment, they must find a way to survive. When Dustin Grey and his friends start to piece together the truth, they realize that saving their own lives will not be enough. With determination and ingenuity that cannot be taught in a classroom, it is up to Dustin and the few survivors he meets along the way to form an unlikely team that must fight to protect its own and save all of humanity from . . . the Z virus.

**The Virus that Ate Cannibals** Carol Eron Rizzoli,1981

The Hot Zone Richard Preston,1995 The virus kills nine out of ten of its victims. Its effects are so quick and so gruesome that even biohazard experts are terrified. It is airborne, it is extremely contagious, and it is about to burn through the suburbs of Washington, D.C. Is there any way to stop it? This doomsday scenario confronted a biohazard SWAT team struggling in secret to stop the outbreak of an exotic hot virus at an Army research facility outside Washington. The Hot Zone tells the dramatic story of their dangerous race against time, along with an alarming account of how previously unknown viruses that have lived undetected in the rain forest for eons are now entering human populations. From the airlocked confines of a biosafety level 4 military lab, to an airliner over Kenya carrying a passenger dissolving into a human virus bomb, to a deserted jungle cave alive with deadly virus, THE HOT ZONE is a non-fiction thriller like no other. The Andromeda Strain was fiction--- this is real!

*The Search for the Virus* Steve Connor,Sharon Kingman,1989 The gripping story of the race to discover the AIDS virus and the astonishing progress the medical science community has made in the race for a cure.

**Virus X** Frank Ryan, 1998 Ryan has asked experts from around the world to explain where emerging viruses come from and how they have become so strong, and puts forward a new biological theory for the origins and successes of plague viruses. Originally published in 1996.

**Outbreak** Robin Cook, 1988-02-01 A fast-spreading disease with no cure takes the United States by storm in Robin Cook's "most harrowing medical horror story" (The New York Times). Murder and intrigue reach epidemic proportions when a devastating plague sweeps the country. Dr. Marissa Blumenthal of the Atlanta Centers for Disease Control investigates—and soon uncovers the medical world's deadliest secret...
