This book takes you through the process of analyzing your traffic, without taking for granted the statistics that you generate. Assuming you have a web site, reading this book will help you learn: - The techniques for gathering data on your users - Standards and guidelines you should adhere to when interpreting your data - What other sites are doing to ensure they respect the privacy of their users - Insight into how real sites use web traffic analysis - Major case case studies from BBC News Online, eBay, and ASPToday - Additional material from The Onion, SmartGirl, and The New York Times From the Publisher This book is for any web professional who wants to understand their site traffic. It's also for anyone with an interest in finding out where their site is most used, and how to make comparisons with other sites. 📖 **TURKISH POLICY QUARTERLY - VOL. 19 - NO. 3 - FALL 2020** ANNELI AHONEN,R📖 DVAN DURAN,BRITTANY BEAULIEU,EMINE ETILI,G📖 LIN📖 AVU📖 ,YASIN BECENI,G📖 RKAN📖 ZTURAN,VOLHA DAMARAD,OVIE ONAGBEBOMA,2020-12-01 The 75th issue of TPQ comes at a time when the world is still in the grips of the COVID-19 pandemic. While not a new phenomenon, the concurrent swell in digital disinformation and misinformation has complicated the public health response on both sides of the Atlantic, as well as further eroded democratic values. Our Fall 2020 issue focuses on key challenges related to disinformation and misinformation, featuring analyses on social media usage, data protection and privacy, fact-checking, and the future of disinformation in a post-COVID-19 world. We are honored to publish this special and timely issue in collaboration with our longstanding partner, Friedrich Naumann Foundation (FNF). Foreign interference and manipulation tactics have not only been polluting the digital space, but have also been threatening democratic societies, institutions, and values. Headlining the Fall 2020 issue, ANNELI AHONEN, Head of the East StratCom Task Force at the European Union External Action Service, provides an overview of the EU’s response to this worldwide threat through the cases of Ukraine and Belarus. The Task Force’s efforts to counter disinformation are part and parcel of strengthening the EU’s communication with its Eastern neighborhood, explains AHONEN. The author points to online campaigns such as #BeatCovid and EUvsDisinfo as having been particularly effective: the former has helped increase the rate of Ukrainians who see the EU as Ukraine’s ally in the fight against COVID-19 from 10 to 32 percent, while the latter has played a vital role in informing Belarusian journalists about Kremlin disinformation tactics in the context of post-election rallies. Concluding that societies are not helpless in the face of disinformation, AHONEN argues that the “infodemic” is an opportunity for democracies to increase their support of freedom of speech and independent, trustworthy media outlets. Discussing the state of print media in Turkey during the pandemic, General Director of the Press Bulletin Authority, R📖 DVAN DURAN, elaborates on the support mechanisms the Turkish government has provided to newspapers during this period. Highlighting the significant role of print media in the response to COVID-19, DURAN argues that newspapers, despite their uncertain future, continue to be a reliable communication channel by providing accurate and fact-checked information during public crises. Therefore, as part of efforts to ensure newspapers’ survival during the pandemic, advertisement costs were determined as force majeure and debt payments were deferred, DURAN explains. With the contentious 2020 US presidential election behind us, BRITTANY BEAULIEU, visiting fellow at GMF, elucidates on the history of malign influence operations surrounding US elections, with a focus on the 2016 elections. US governmental bodies exposed the Kremlin’s interference campaigns and implemented deterrent policies, however BEAULIEU argues that President Trump has undermined those efforts by not putting forward a coherent foreign interference policy. It is the question of whether the US can repair its institutional capacity that will determine its success in addressing foreign interference, BEAULIEU concludes. Some of the other topics explored in this issue include data privacy rights, social media platforms’ efforts to curb online disinformation, the pivotal role fact-checkers play in combatting fake news in Turkey, and systemic racism within the nursing profession in Canada.

📖 **RETHINKING RIGHTS AND REGULATIONS** LORRIE FAITH CRANOR,STEVEN S. WILDMAN,2003-08-29 Contributors to this volume explore the dynamics of new communications technologies and public policy; from TPRC 2002. The contributors to this volume examine issues raised by the intersection of new communications technologies and public policy in this post-boom, post-bust era. Originally presented at the 30th Research Conference on Communication, Information, and Internet Policy (TPRC 2002)—traditionally a showcase for the best academic research on this topic—their work combines hard data and deep analysis to explore the dynamic interplay between technological development and society. The chapters in the first section consider the ways society conceptualizes new information technologies and their implications for law and policy, examining the common metaphor of cyberspace as place, alternative definitions of the Internet, the concept of a namespace, and measures of diffusion. The chapters in the second section discuss how technological change may force the rethinking of legal rights; topics considered include spectrum rights, intellectual property, copyright and paracopyright, and the abridgement of constitutional rights by commercial rights in ISP rules. Chapters in the third and final section examine the constant adjustment and reinterpretation of regulations in response to technological change, considering, among other subjects, liability regimes for common carriers and the 1996 detariffing rule, privacy and enhanced 911, and the residual effect of state ownership on privatized telecommunication carriers. The policy implications of Rethinking Rights and Regulations are clear: major institutional changes may be the necessary response to major advances in telecommunications technology.

📖 **ADVANCED CYBERSECURITY TECHNOLOGIES** RALPH MOSELEY,2021-12-14 Cybersecurity is an extremely important area which is rapidly evolving, necessarily, to meet current and future threats. Anyone who studies within this domain requires a particular skillset and way of thinking, balancing technical knowledge and human insight. It is vital to recognize both sides of this complex area and integrate the two. This book looks at the technical fields progressively, building up in layers before expanding into more advanced topics. Each area is looked at succinctly, describing the main elements and problems in each area and reinforcing these concepts with practical coding examples, questions and ideas for further research. The book builds on an overview of basic architecture of systems and networks, setting a context for how information is vulnerable. Cryptography is explained in detail with examples, showing the steady progress in this area over time through to the possibilities of quantum encryption. Steganography is also explained, showing how this can be used in a modern-day context through multimedia and even virtual reality. A large section of the book is given to the technical side of hacking, how such attacks occur, how they can be avoided and what to do after there has been an intrusion of some description. Cyber countermeasures are explored, along with automated systems of defense, whether created by the programmer or through firewalls and suchlike. The human aspect of cyber security is detailed along with the psychology and motivations for launching attacks. Social engineering is focused on and with the various techniques looked at – revealing how an informed individual, organization or workplace can protect themselves against incursions and breaches. Finally, there is a look the latest developments in the field, and how systems, such as the IoT are being protected. The book is intended for advanced undergraduate and postgraduate courses on cybersecurity but is also useful for those studying IT or computer science more generally.
