Xurt'an Suzanne Cook,2019-11-15 Xurt'an (the end of the world) showcases the rich storytelling traditions of the northern Lacandones of Naha' through a collection of traditional narratives, songs, and ritual speech. Formerly isolated in the dense, tropical rainforest of Chiapas, Mexico, the Lacandon Maya constitute one of the smallest language groups in the world. Although their language remains active and alive, their traditional culture was abandoned after the death of their religious and civic leader in 1996. Lacking the traditional contexts in which the culture was transmitted, the oral traditions are quickly being forgotten. This collection includes creation myths that describe the cycle of destruction and renewal of the world, the structure of the universe, the realms of the gods and their intercessions in the affairs of their mortals, and the journey of the souls after death. Other traditional stories are non-mythic and fictive accounts involving talking animals, supernatural beings, and malevolent beings that stalk and devour hapless victims. In addition to traditional narratives, Xurt'an presents many songs that are claimed to have been received from the Lord of Maize, magical charms that invoke the forces of the natural world, invocations to the gods to heal and protect, and work songs of Lacandon women, whose contribution to Lacandon culture has been hitherto overlooked by scholars. Women's songs offer a rare glimpse into the other half of Lacandon society and the arduous distaff work that sustained the religion. The compilation concludes with descriptions of rainbows, the Milky Way as the white road of Our Lord, and an account of the solstices. Transcribed and translated by a foremost linguist of the northern Lacandon language, the literary traditions of the Lacandones are finally accessible to English readers. The result is a masterful and authoritative collection of oral literature that will both entertain and provoke, while vividly testifying to the power of Lacandon Maya aesthetic expression.

Theory of Architecture: Concept to Commissioning Ar. Prof. Indranil Sen,2016-02-19 Architecture is a creative art with a lot of science embedded into this art. Being the mother of all art forms, the responsibility of an Architect is much more in the society at large. His creations will be standing there and no one can avoid seeing it. But Architectural design is also a science driven process. The purpose of this book is to share and note down the various aspects of this process of going through the exercise of Architectural Design. How much added Services and Engineering knowledge is required for an Architect to captain his project? What are the dos and don'ts of this process? How to avoid making mistakes and latter correcting them at someone else's' cost. There is a theory to this entire game of dreams, which I call the Theory of Architecture : C2C. What are the various steps that lead us from one to another? This book tries to document this process and share the experience that I have gained in my exposure to this grand industry.

The Forest of the Lacandon Maya Suzanne Cook,2016-03-15 The Forest of the Lacandon Maya: An Ethnobotanical Guide, with active links to audio-video recordings, serves as a comprehensive guide to the botanical heritage of the northern Lacandones. Numbering fewer than 300 men, women, and children, this community is the most culturally conservative of the Mayan groups. Protected by their hostile environment, over many centuries they maintain autonomy from the outside forces of church and state, while they continue to draw on the forest for spiritual inspiration and sustenance. In The Forest of the Lacandon Maya: An Ethnobotanical Guide, linguist Suzanne Cook presents a bilingual Lacandon-English ethnobotanical guide to more than 450 plants in a tripartite organization: a botanical inventory in which main entries are headed by Lacandon names followed by common English and botanical names, and which includes plant descriptions and uses; an ethnographic inventory, which expands the descriptions given in the botanical inventory, providing the socio-historical, dietary, mythological, and spiritual significance of most plants; and chapters that discuss the relevant cultural applications of the plants in more detail provide a description of the area's geography, and give an ethnographic overview of the Lacandones. Active links throughout the text to original audio-video recordings demonstrate the use and preparation of the most significant plants.

Referential Practice William F. Hanks,1990-11-29 Referential Practice is an anthropological study of language use in a contemporary Maya community. It examines the routine conversational practices in which Maya speakers make reference to themselves and to each other, to their immediate contexts, and to their world. Drawing on extensive fieldwork in Oxnutzcab, Yucatán, William F. Hanks develops a sociocultural approach to reference in natural languages. The core of this approach lies in

treating speech as a social engagement and reference as a practice through which actors orient themselves in the world. The conceptual framework derives from cultural anthropology, linguistic pragmatics, interpretive sociology, and cognitive semantics. As his central case, Hanks undertakes a comprehensive analysis of deixis—linguistic forms that fix reference in context, such as English I, you, this, that, here, and there. He shows that Maya deixis is a basic cultural construct linking language with body space, domestic space, agricultural and ritual practices, and other fields of social activity. Using this as a guide to ethnographic description, he discovers striking regularities in person reference and modes of participation, the role of perception in reference, and varieties of spatial orientation, including locative deixis. Traditionally considered a marginal area in linguistics and virtually untouched in the ethnographic literature, the study of referential deixis becomes in Hanks's treatment an innovative and revealing methodology. Referential Practice is the first full-length study of actual deictic use in a non-Western language, the first in-depth study of speech practice in Yucatec Maya culture, and the first detailed account of the relation between routine conversation, embodiment, and ritual discourse.

Keep Australia On Your Left Eric Stiller,2014-07-08 You mad bastards. You mad bloody bastards. The challenge? Paddle a kayak around Australia. As Eric Stiller and Tony Brown would discover, the attempt would be a fascinating, frustrating, maddening, and at times hilarious crawl around what many consider the most beautiful but treacherous coastline in the world. Swamped by high waves and rain, hampered by faulty technology, blown off course, baked by a broiling sun or chilled by sub-zero temperatures, battling loneliness and exhaustion--and sometimes each other--it would be the most demanding emotional and physical challenge either had ever attempted. In short, it was the adventure of a lifetime! Keep Australia on Your Left is a story of friendship forged--and sustained--under demanding circumstances. It is also the personal portrait of Eric Stiller's journey around a continent...and into himself. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
