Embedding IBM Informix Whei-Jen Chen,Oluwatosin

Ajayi,Mirav Kapadia,Alexander Koerner,Jacques Roy,Dick Snoke,IBM Redbooks,2011-02-17 In this IBM® Redbooks® publication, we discuss and describe the capabilities for embedding Informix® into applications and software. We introduce the technological architecture and describe several of the functions and features that support Informix as a robust and powerful embeddable DBMS. Many of these features are unique in the industry today, enabling clients to create a business advantage. The Informix database server can support the requirements of an embeddable DBMS, and is doing so for many companies

today. The low administration requirements of the Informix database server enable clients to deploy thousands of Informix instances, embedded in applications in locations where there are no technical resources to support the database. The real requirement is for applications with embedded databases that require little or no administration, take minimum storage resources, have excellent performance, and are highly reliable. As a mature and reliable DBMS, the Informix database server works well with small, growing, and large databases, and meets the key requirements for embedded databases, which include the ability to execute without needing any configuration or other DBA administrative activities, and the flexibility to work on all of the platforms commonly used in the marketplace today.

This book can be used for reference as well, as it has many teachings, things that not only the reader could understand and make sense of this content, but even the average computer user could find helpful. To know a little bit about me, I was born on February 1st, 1997. I have ten plus years

of experience in IT and have opened my own computer business. I am disabled and get very bored at times and want to use my expertise/skills and do something that I love and that is/will be productive. You gain experience over time, which makes things become easier as time progresses, despite new challenges every day. My original intent was not to write a book, as all of the content in this book came from multiple documents that I have typed up over the years to help keep my mental health positive, and to hope maybe someone could find useful someday. I want to continue to use my computer expertise to not only make a living and to have a good life, not only personally, but doing what I love to do for work, IT. I like to help others when they are in need. I like to help others when they are in need, with anything if I can help them, but IT is what I enjoy helping people with the most. That is why I wrote this educational content to give even the slightest boost in the experience of not only existing IT professionals and experts, but to others seeking to learn as well. I will be glad to answer any questions that you may have.
