*Universal Horrors* Tom Weaver, Michael Brunas, John Brunas, 2011-12-20 Revised and updated since its first publication in 1990, this acclaimed critical survey covers the classic chillers produced by Universal Studios during the golden age of hollywood horror, 1931 through 1946. Trekking boldly through haunts and horrors from The Frankenstein Monster, The Wolf Man, Count Dracula, and The Invisible Man, to The Mummy, Paula the Ape Woman, The Creeper, and The Inner Sanctum, the authors offer a definitive study of the 86 films produced during this era and present a general overview of the period. Coverage of the films includes complete cast lists, credits, storyline, behind-the-scenes information, production history, critical analysis, and commentary from the cast and crew (much of it drawn from interviews by Tom Weaver, whom USA Today calls the king of the monster hunters). Unique to this edition are a new selection of photographs and poster reproductions and an appendix listing additional films of interest.

**Universal Design 2014: Three Days of Creativity and Diversity** H.A. Caltenco, P.-O. Hedvall, A. Larsson, 2014-05-30 Universal Design, Design for All and Inclusive Design are all aimed at dismantling physical and social barriers to inclusion in all areas of life. Engagement in universal design is on the increase worldwide as practitioners and researchers explore creative and desirable solutions to shape the future of universal design products and practices. This book is a collection of the papers presented at UD2014, the International Conference on Universal Design, held in Lund, Sweden, in June 2014. The conference offered a creative and diverse meeting place for all participants to exchange knowledge, experiences and ideas, and to build global connections and creative networks for future work on universal design. The themes of UD2014 span many aspects of societal life, and the papers included here cover areas as diverse as architecture, public transport, educational and play environments, housing, universal workspaces, and the Internet of things, as well as designs and adaptations for assistive technology. The book clearly demonstrates the breadth of universal design and its ongoing adoption in societies all over the world, and will be of interest to anyone whose work involves building a more inclusive environment for all.

*Early Universal City* Robert S. Birchard, 2009 Known as much today for its theme park, Universal City is also the largest and the longest continuously operating movie studio in Hollywood. The Universal Film Manufacturing Company was formed by a dozen independent producers in 1912, and Universal City was designed to provide a single facility in which to make their films. Since its official opening on March 15, 1915, Universal City has served as a training ground for great directors such as John Ford, William Wyler, and James Whale and as home to stars like Hoot Gibson, Deanna Durbin, Boris Karloff, Bela Lugosi, Lon Chaney Sr. and Jr., and Tom Mix. This evocative volume explores the studio that brought The Hunchback of Notre Dame (1923), The Phantom of the Opera (1925), All Quiet on the Western Front (1930), Dracula (1930), Frankenstein (1931), and 100 Men and a Girl (1936) to the screen.

**Universal Studios Monsters** Michael Mallory, 2009-09-08 From the 1920s through the 1950s, Universal Studios was Hollywood's number one studio for horror pictures, haunting movie theaters worldwide with Dracula, Frankenstein, and the Creature from the Black Lagoon, among others. Universal Studios Monsters: A Legacy of Horror explores all of these enduring characters, chronicling both the mythology behind the films and offering behind-the-scenes insights into how the films were created. Universal Studios Monsters is the most complete record of the horror films of this legendary studio, with biographies of major personalities who were responsible for the most notable monster melodramas in film history. The stories of these films and their creators are told through interviews with surviving actors and studio employees. A lavish photographic record, including many behind-the-scenes shots, completes the story of how these classics were made. This is a volume no fan of imaginative cinema will want to be without.

**Universal Jurisdiction in International Criminal Law** Aisling O'Sullivan, 2017-02-03 With the sensational arrest of former Chilean dictator Augusto Pinochet in 1998, the rise to prominence of universal jurisdiction over crimes against international law seemed to be assured. The arrest of Pinochet and the ensuing proceedings before the UK courts brought universal jurisdiction into the foreground of the fight against impunity and the principle was read as an important complementary mechanism for international justice - one that could offer justice to victims denied an avenue by the limited jurisdiction of international criminal tribunals. Yet by the time of the International Court of Justice's Arrest Warrant judgment four years later, the picture looked much bleaker and the principle was being read as a potential tool for politically motivated trials. This book explores the debate over universal jurisdiction in international criminal law, aiming to unpack a practice in which international lawyers continue to disagree over the concept of universal jurisdiction. Using Martti Koskenniemi's work as a foil, this book exposes the argumentative techniques in operation in national and international adjudication since the 1990s. Drawing on overarching patterns within the debate, Aisling O'Sullivan argues that it is bounded by a tension between contrasting political preferences or positions, labelled as moralist (ending impunity) and formalist (avoiding abuse) and she reads the debate as a movement of hegemonic and counter-hegemonic positions that struggle for hegemonic control. However, she draws out how these positions (moralist/formalist) merge into one another and this produces a tendency towards a middle position that continues to prefer a particular preference (moralist or formalist). Aisling O'Sullivan then traces the transformation towards this tendency that reflects an internal split among international lawyers between building a utopia (court of humanity) and recognizing its impossibility of being realized.

*Universal Carrier 1936-48* David Fletcher, 2012-05-20 The Universal Carrier was a fast, lightly armed vehicle developed by the British Army to carry infantry across ground defended by small-arms fire, specifically the Bren light machine gun, hence the name 'Bren Gun Carrier'. This name would stick with the Universal Carrier and all of its future variants. This book details the Carrier, which was employed in a number of roles including carrying ammunition and towing anti-aircraft guns and

trailers. All Allies used the Universal Carrier extensively during practically every World War II campaign. By the war's end, the Universal Carrier had proved itself to be an invaluable and successful cross-country vehicle that was both agile and fast for its time.

**Assessing Universal Health Coverage for Breast Cancer Management** Professor Dr Syed Mohamed Aljunid,Dr Aidalina Binti Mahmud,2021-04-06 Breast cancer is the most common cancer among women that affects mostly those in middle and older age groups in most parts of the world. The incidence is showing an increasing trend affecting younger women and the cost to prevent, treat and manage this chronic disease is continuously escalating. Universal Health Coverage (UHC) is an initiative by World Health Organisation that encourages policy makers in all countries in the world to organise their health systems that are responsive in providing access to quality health care to every citizen in need of health services without facing the financial hardship. Malaysia health system has been well developed and was said to have achieved universal health coverage based on the easy access to primary and secondary health care services in the public sector. In this book, we present our effort to assess if Malaysia provides UHC for preventive, curative and palliative to breast cancer patients . At the inception of the study, we embarked on the development of a composite index to assess the overall status of UHC. This is followed by an extensive research to explore the extent of financial coverage for management of breast cancer. Over 300 patients in various stages of the breast cancer attending the selected public tertiary hospitals were interviewed and their medical records reviewed to assess their health spending and to estimate the incidence of catastrophic health expenditure. The book is the first of its kind that provides comprehensive real-world data on universal coverage for breast cancer patients in the world.
