But the iPhone has implications far beyond the phone or gadget market. In fact, it's opening the way to what Brian Chen calls the always-on future, where we are all constantly connected to a global Internet via flexible, incredibly capable gadgets that allow us to do anything, anytime, from anywhere. This has far-reaching implications--both positive and negative--throughout all areas of our lives, opening the door for incredible personal and societal advances while potentially sacrificing both privacy and creative freedom in the process. expansive significance of Apple's incredibly powerful vertical business model, and the future it portends.
