The Start-up PUSH Terri Friel, George Vukotich, 2018-07-01 This book explores, documents and establishes how to help founders start businesses with the collaboration of local and international resources. An incubator, accelerator or science park all have this goal but provide a variety of foci and support. At a minimum, it's important to not only attract entrepreneurs but to have support services that can include mentoring, financial support and other services that make the incubator really filled with energy and potential. It's becoming insufficient to just have office space and WiFi. It is also important to develop good interactions between directors, the start-up community and residents. Managing the community to help residents to launch successfully is the main goal of the director. It's also important to stay abreast of the innovations happening in start-up support. Today there are many ways to incubate from bare bones office space to Incubator 1.0 space with some support to Incubator 2.0 with a great deal of support including a fund. For that reason, it's important to develop a clear strategy for the type, style, clientele and support that will be built. This book provides guidance in three main areas: 1) What are the different options for incubators, accelerators and science parks, 2) How to assist the start-up founders (residents) and 3) How to manage the space.

Wake up to Praise Wilma Brumfield-Lofton, Elder Shirley Rice, 2020-12-28 In January 2016, Sister Wilma had just completed the Daniel Fast. It was put in her thoughts to start a Prayer Call for people who couldn't get out to Church during the week. This call would be every Monday at 8:00 am CST. In March 2016 Elder Shirley Rice joined our Prayer Group. She Blessed us with the name Wake Up To Praise and went to Crown Point Indiana to legally get the rights to that name. Later we started a Bible Study Class on Thursday evenings at 7:00 pm CST. Elder Shirley taught our first class, Minister Adrienne Watson taught our second class. Every week we would have a different pastor speak from different states. Among them was Lady Pat's husband Bishop Alfonso Boone. One day Lady Pat asked Pastor Patterson if he would teach our Bible Study Class, he said yes! We Thank God that Pastor Patterson has continued to teach along with Elder Shirley, empowering us with Gods News!! We are thankful to God for Blessing us with such dedicated and anointed teachers. We appreciate and thank Lady Pamela Patterson and Brother Larry Rice for always allowing their spouses to take time out of their busy schedules to Bless us with Gods Word.

Opening Up Education Toru Iiyoshi, M.S. Vijay Kumar, 2010-09-24 Experts discuss the potential for open education tools, resources, and knowledge to transform the economics and ecology of education. Given the abundance of open education initiatives that aim to make educational assets freely available online, the time seems ripe to explore the potential of open education to transform the economics and ecology of education. Despite the diversity of tools and resources already available—from well-packaged course materials to simple games, for students, self-learners, faculty, and educational institutions—we have yet to take full advantage of shared knowledge about how

these are being used, what local innovations are emerging, and how to learn from and build on the experiences of others. Opening Up Education argues that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge: by providing incentives for faculty to use (and contribute to) open education goods, and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs. These essays by leaders in open education describe successes, challenges, and opportunities they have found in a range of open education initiatives. They approach—from both macro and micro perspectives—the central question of how open education tools, resources, and knowledge can improve the quality of education. The contributors (from leading foundations, academic institutions, associations, and projects) discuss the strategic underpinnings of their efforts first in terms of technology, then content, and finally knowledge. They also address the impact of their projects, and how close they come to achieving a vision of sustainable, transformative educational opportunities that amounts to much more than pervasive technology. Through the support of the Carnegie Foundation for the Advancement of Teaching, an electronic version of this book is openly available under a Creative Commons license at The MIT Press Web site, <http://mitpress.mit.edu>. Step Up Your Game Naresh C. Rao, 2016-02-02 As a sports and wellness medicine practitioner whose clients include Olympic and professional athletes, triathletes, and weekend warriors, Dr. Naresh Rao has uncovered the secrets of how and why elite athletes consistently perform at the highest levels. In Step Up Your Game, he reveals what separates the best athletes from the rest of us, despite our best efforts in any chosen sport. According to Rao, top athletes know that peak performance requires much more than consistent practice. He reveals a comprehensive program that takes into account every aspect of optimizing wellness—from monitoring health to improving nutrition, following a thorough training protocol, and developing a plan for recovering from and preventing injury. The mental game is just as important as the physical one; these athletes make sure to address their motivational, psychological, and spiritual needs, too. In short, the athletes who are at the top of their game know that if they want to improve—whether it's their accuracy at the goal, time at the finish line, or consistency of play—they need to take each of these aspects into consideration every single day. Step Up Your Game reveals how remarkable success is available to athletes with the conviction and desire to improve. By integrating Dr. Rao's program into an existing fitness routine, readers will take ownership of their training in a systematic way, remove the stress that often hampers outcomes, and—most importantly—begin to fully enjoy their exercise experience as they work to achieve their healthiest selves. Catching Up and Falling Behind David A Dyker, 2004-07-05 In this collection of essays David A Dyker explores some of the most difficult and fascinating aspects of the process of transition from autocratic “real socialism” to a capitalism that is sometimes democratic, sometimes authoritarian. The stress is on the economic dimension of transformation, but the author sets the economic drama firmly within a political economy framework and a historical perspective. Trends in key economic variables are analysed against the background of the struggle between different social and political groups for power and command over resources. While the book pays due attention to topical issues like EU enlargement, the underlying perspective is a long-term one. Transition is viewed not as a set of once-and-for-all institutional changes or a process of short-term stabilisation, but as a historic opportunity to solve the inherited problem of poverty and underdevelopment in Central-East Europe and the former Soviet Union. The book ends with a critical assessment of how economics, as a discipline, has coped with the challenge of that historic opportunity. Contents: The Political Economy of Transition Transition and the Global Economy The East European Countries and the European Union Technology and Transition Patterns and Prospects By Way of Conclusion Readership: Social scientists with interest in transition countries; transition and East Europe specialists; public policy bodies and international aid communities; undergraduates who major in social science. Keywords: Nomenklatura Nationalism; Transition; Post-Socialist; Russian R&D; Former Soviet Union; Social Capability; Technology Absorption; EU Enlargement; Economic Development; Supply Networks; Central-East Europe Reviews: “Transition of the post-Communist states has become a primary area of research for a number of scholars, and David Dyker is one of the most experienced and productive author among them. His latest book proves this in a very clear way ... the book of David Dyker is one of the best that was written on transition economies and it could be highly recommended to all who are interested in these issues of transition.” Dr Igor Yegorov National Academy of Sciences of Ukraine “This book attempts to interpret the economic and historical implications of transition within the framework of catching up industrialization, and this reviewer basically agrees with the arguments of the book. In sum it provides a basis for a detailed reconsideration of the concepts of catching up and social capability.” The Developing Economies

Macroeconomic Patterns and Monetary Policy in the Run-up to Asset Price Busts Mr. Pau Rabanal, Mr. Prakash Kannan, Mr. Alasdair Scott, 2009-11-01 We find that inflation, output and the stance of monetary policy do not typically display unusual behavior ahead of asset price busts. By contrast, credit, shares of investment in GDP, current account deficits, and asset prices typically rise, providing useful, if not perfect, leading indicators of asset price busts. These patterns could also be observed in the build-up to the current crisis. Monetary policy was not the main, systematic cause of the current crisis. But, with inflation typically under control, central banks effectively accommodated these growing imbalances, raising the risk of damaging busts.
