Epinets Mihnea C. Moldoveanu,Joel A.C. Baum,2014-03-05 Epinets presents a new way to think about social networks, which focuses on the knowledge that underlies our social interactions. Guiding readers through the web of beliefs that networked individuals have about each other and probing into what others think, this book illuminates the deeper character and influence of relationships among social network participants. Drawing on artificial intelligence, the philosophy of language, and epistemic game theory, Moldoveanu and Baum formulate a lexicon and array of conceptual tools that enable readers to explain, predict, and shape the fabric and behavior of social networks. With an innovative and strategically-minded look at the assumptions that enable and clog our networks, this book lays the groundwork for a leap forward in our understanding of human relations.

Broadcasting the Blues Paul Oliver,2014-02-04 Broadcasting the Blues: Black Blues in the Segregation Era is based on Paul Oliver's award-winning radio broadcasts from the BBC that were created over several decades. It traces the social history of the blues in America, from its birth in the rural South through the heyday of sound recordings. Noted blues scholar Paul Oliver draws on decades of research and personal interviews with performers--some of whom he discovered and recorded for the first time--to draw a picture of how the blues aesthetic developed, giving new insights into the role blues played in American society before racial integration. The book begins by outlining the history of the blues from African music through country stomps, ragtime songs, and field hollers. From the heroic figures of black folksong--including the steel-driving railroad worker John Henry and the destructive Boll Weevil--to the content of the emerging blues, the author discusses the meaning behind the often coded words of the blues, evoking topics such as playful sexuality, magic and medicine, the stresses of segregation, and commentary on national events. Finally, the author traces the history of blues documentation, showing how our views of the early blues have been shaped through a complex interplay of social forces, and indicating possible lines for future research.

Large-Scale System Analysis Under Uncertainty Alejandro D. Domínguez-García,2022-02-17 Discover a comprehensive set of tools and techniques for analyzing the impact of uncertainty on large-scale engineered systems. Providing accessible yet rigorous coverage, it showcases the theory through detailed case studies drawn from electric power application problems, including the impact of integration of renewable-based power generation in bulk power systems, the impact of corrupted measurement and communication devices in microgrid closed-loop controls, and the impact of components failures on the reliability of power supply systems. The case studies also serve as a guide on how to tackle similar problems that appear in other engineering application domains, including automotive and aerospace engineering. This is essential reading for academic researchers and graduate students in power systems engineering, and dynamic systems and control engineering.

Sustainable Education and Development – Making Cities and Human Settlements Inclusive, Safe, Resilient, and Sustainable Joseph N.

Mojekwu,Wellington Thwala,Clinton Aigbavboa,Emmanuel Bamfo-Agyei,Lawrence Atepor,Rexford Assasie Oppong,2022-01-01 This book presents papers from the 10th Applied Research Conference in Africa (ARCA), showcasing the latest research on education and inclusive, safe, resilient, and sustainable communities. The conference is focused on applied research discussion and its dissemination, developing understanding about the role of research and researchers in the development of the continent. Education is a key driver to transform lives, build peace, eradicate poverty and drive sustainable development in Africa. Researchers face large challenges to making a meaningful contribution to the development of Africa. It is a continent where research can at time be not viewed directly related to development. The aim of the Applied Research Conference in Africa is to provide a platform for capacity building and networking among researchers in Africa. The proceedings is focussed on applied research, its discussion and dissemination and will be of interest to researchers, professors, graduate students, policymakers and professionals in industry.

Estimating and Costing for the Metal Manufacturing Industries Robert Creese, M. Adithan, 1992-08-25 This practical reference/text provides a thorough overview of cost estimating as applied to various manufacturing industries, with special emphasis on metal manufacturing concerns. It presents examples and study problems illustrating potential applications and the techniques involved in estimating costs.; Containing both US and metric units for easy conversion of world-wide manufacturing data, Estimating and Costing for the Metal Manufacturing Industries: outlines professional societies and publications dealing with cost estimating and cost analysis; details the four basic metalworking processes - machining, casting, forming, and joining; reveals five techniques for capital cost estimating, including the new AACE International's Recommended Practice 16R-90 and the new knowledge and experience method; discusses the effect of scrap rates and operation costs upon unit costs; offers four formula methods for conceptual cost estimating and examines material-design-cost relationships; describes cost indexes, cost capacity factors, multiple-improvement curves, and facility cost estimation techniques; offers a generalized metal cutting economics model for comparison with traditional economic models; and more.; Estimating and Costing for the Metal Manufacturing Industries serves as an on-the-job, single-source reference for cost, manufacturing, and industrial engineers and as a text for upper-level undergraduate, graduate, and postgraduate students in cost estimating, engineering economics, and production operations courses.; A Solutions manual to the end-of-chapter problems is available free of charge to instructors only. Requests for the manual must be made on official school stationery.

A Textbook of Production Engineering P C Sharma, 1999 This is the revised edition of the book with new chapters to incorporate the latest developments in the field. It contains approx. 200 problems from various competitive examinations (GATE, IES, IAS) have been included. The author does hope that with this, the utility of the book will be further enhanced.

Reliability Engineering and Services Tongdan Jin,2019-03-11 Offers a holistic approach to guiding product design, manufacturing, and after-sales support as the manufacturing industry transitions from a product-oriented model to service-oriented paradigm This book provides fundamental knowledge and best industry practices in reliability modelling, maintenance optimization, and service parts logistics planning. It aims to develop an integrated product-service system (IPSS) synthesizing design for reliability, performance-based maintenance, and spare parts inventory. It also presents a lifecycle reliability-inventory optimization framework where reliability, redundancy, maintenance, and service parts are jointly coordinated. Additionally, the book aims to report the latest advances in reliability growth planning, maintenance contracting and spares inventory logistics under non-stationary demand condition. Reliability Engineering and Service provides in-depth chapter coverage of topics such as: Reliability Concepts and Models; Mean and Variance of Reliability Estimates; Design for Reliability; Reliability Growth Planning; Accelerated Life Testing and Its Economics; Renewal Theory and Superimposed Renewals; Maintenance and Performance-Based Logistics; Warranty Service Models; Basic Spare Parts Inventory Models; Repairable Inventory Systems; Integrated Product-Service Systems (IPPS), and Resilience Modeling and Planning Guides engineers to design reliable products at a low cost Assists service engineers in providing superior after-sales support Enables managers to respond to the changing market and customer needs Uses end-of-chapter case studies to illustrate industry best practice Lifecycle approach to reliability, maintenance and spares provisioning Reliability Engineering and Service is an important book for graduate engineering students, researchers, and industry-based reliability practitioners and consultants.

Proceedings of the European Automotive Congress EAEC-ESFA 2015 Cristian Andreescu,Adrian Clenci,2015-11-25 The volume includes selected and reviewed papers from the European Automotive Congress held in Bucharest, Romania, in November 2015. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in fuel economy and environment, automotive safety and comfort, automotive reliability and maintenance, new materials and technologies, traffic and road transport systems, advanced engineering methods and tools, as well as advanced powertrains and hybrid and electric drives.

Function Theory on Planar Domains Stephen D. Fisher,2014-06-10 A high-level treatment of complex analysis, this text focuses on function theory on a finitely connected planar domain. Clear and complete, it emphasizes domains bounded by a finite number of disjoint analytic simple closed curves. The first chapter and parts of Chapters 2 and 3 offer background material, all of it classical and important in its own right. The remainder of the text presents results in complex analysis from the far, middle, and recent past, all selected for their interest and merit as substantive mathematics. Suitable for upper-level undergraduates and graduate students, this text is accessible to anyone with a background in complex and functional analysis. Author Stephen D. Fisher, a professor of mathematics at Northwestern University, elaborates upon and extends results with a set of exercises at the end of each chapter.
