Visible Light Communications Zhaocheng Wang, Qi Wang, Wei Huang, Zhengyuan Xu,2017-11-29 A complete and comprehensive reference on modulation and signal processing for visible light communication This informative new book on state-of-the-art visible light communication (VLC) provides, for the first time, a systematical and advanced treatment of modulation and signal processing for VLC. Visible Light Communications: Modulation and Signal Processing offers a practical guide to designing VLC, linking academic research with commercial applications. In recent years, VLC has attracted attention from academia and industry since it has many advantages over the traditional radio frequency, including wide unregulated bandwidth, high security, and low cost. It is a promising complementary technique in 5G and beyond wireless communications, especially in indoor applications. However, lighting constraints have not been fully considered in the open literature when considering VLC system design, and its importance has been underestimated. That's why this book—written by a team of experts with both academic research experience and industrial development experience in the field—is so welcome. To help readers understand the theory and design of VLC systems, the book: Details many modern techniques on both modulation and signal processing aspects Links academic research with commercial applications in visible light communications as well as other wireless communication systems Combines theoretical rigor with practical examples in presenting optical camera communication systems Visible Light Communications: Modulation and Signal Processing serves as a useful tool and reference book for visible light communication professionals, as well as wireless communication system professionals and project managers. It is also an important guide for undergraduates and graduates who want to conduct research in areas of wireless communications.

The Problem of Integrable Discretization Yuri B. Suris,2012-12-06 An exploration of the theory of discrete integrable systems, with an emphasis on the following general problem: how to discretize one or several of independent variables in a given integrable system of differential equations, maintaining the integrability property? This question (related in spirit to such a modern branch of numerical analysis as geometric integration) is treated in the book as an immanent part of the theory of integrable systems, also commonly termed as the theory of solitons. Most of the results are only available from recent journal publications, many of them are new. Thus, the book is a kind of encyclopedia on discrete integrable systems. It unifies the features of a research monograph and a handbook. It is supplied with an extensive bibliography and detailed bibliographic remarks at the end of each chapter. Largely self-contained, it will be accessible to graduate and post-graduate students as well as to researchers in the area of integrable dynamical systems.

Locally Analytic Vectors in Representations of Locally -adic Analytic Groups Matthew J. Emerton, 2017-07-13 The goal of this memoir is to provide the foundations for the locally analytic representation theory that is required in three of the author's other papers on this topic. In the course

of writing those papers the author found it useful to adopt a particular point of view on locally analytic representation theory: namely, regarding a locally analytic representation as being the inductive limit of its subspaces of analytic vectors (of various "radii of analyticity"). The author uses the analysis of these subspaces as one of the basic tools in his study of such representations. Thus in this memoir he presents a development of locally analytic representation theory built around this point of view. The author has made a deliberate effort to keep the exposition reasonably self-contained and hopes that this will be of some benefit to the reader.

Guide to Reliable Internet Services and Applications Charles R. Kalmanek, Sudip Misra, Yang (Richard) Yang, 2010-06-09 An oft-repeated adage among telecommunication providers goes, "There are ve things that matter: reliability, reliability, reliability, time to market, and cost. If you can't do all ve, at least do the rst three. "Yet, designing and operating reliable networks and services is a Herculean task. Building truly reliable components is unacceptably expensive, forcing us to c- struct reliable systems out of unreliable components. The resulting systems are inherently complex, consisting of many different kinds of components running a variety of different protocols that interact in subtle ways. Inter-networks such as the Internet span multiple regions of administrative control, from campus and cor- rate networks to Internet Service Providers, making good end-to-end performance a shared responsibility borne by sometimes uncooperative parties. Moreover, these networks consist not only of routers, but also lower-layer devices such as optical switches and higherlayer components such as rewalls and proxies. And, these components are highly con gurable, leaving ample room for operator error and buggy software. As if that were not dif cult enough, end users understandably care about the performance of their higher-level applications, which has a complicated relationship with the behavior of the underlying network. Despite these challenges, researchers and practitioners alike have made trem-dous strides in improving the reliability of modern networks and services.

Promoting All-Round Education for Girls Patricia P. K. Chiu,2020-06-02 Promoting All-Round Education for Girls presents the history of Heep Yunn School, one of the oldest girls' schools in Hong Kong. Amalgamated from two British mission schools founded in the 1880s for destitute girls and daughters of Christian parents, and renamed Heep Yunn School in 1936, the institution has witnessed and responded to the dramatic changes of Hong Kong over the years. By the time of the outbreak of the Second World War, Heep Yunn had expanded to offer a full Chinese middle school course for girls based upon Christian principles of all-round education. The school expanded rapidly after the war and became a bilingual institution to meet the demand for English language education. Eventually English would become the primary medium of instruction soon after the introduction of nine-year universal education in 1978. Heep Yunn strives to provide a full-fledged all-round education in the midst of political and education reforms. The school opted to switch its status from a government-aided school to a direct subsidy scheme school in the early 2010s so as to retain a larger degree of autonomy. This history of Heep Yunn School documents the concerted efforts of the school council, staff, students,

alumnae, and parents to achieve the evolving visions of Christian education for girls as Hong Kong grew from a colonial trading port to a global financial centre in the twenty-first century. 'Promoting All-Round Education for Girls convincingly charts the shifting purposes and practices of girls' education in Hong Kong. The text moves seamlessly between the history of the school and the wider context of Hong Kong's history. Patricia P. K. Chiu illustrates how the school's educational policy evolved according to the wider strategies and shifts that relate models of femininity and nation-building.' —Joyce Goodman, University of Winchester 'This solidly-referenced work provides a balanced and detailed outlook on the unique, evolving features of education in Hong Kong. It shows the effects on Heep Yunn School of major historical changes in education policy and how the school has contributed to the education of girls in Hong Kong in periods of dramatic challenge like the Sino-Japanese War and the disturbances of the late 1960s.' —Ruth Hayhoe, University of Toronto

Communication and Networking Alan Chin-Chen Chang, MingChu Li, Chunming Rong, Charalampos Z. Patrikakis, Dominik Ślęzak, 2010-11-25 Welcome to the proceedings of the 2010 International Conference on Future Gene- tion Communication and Networking (FGCN 2010) - one of the partnering events of the Second International Mega-Conference on Future Generation Information Te-nology (FGIT 2010). FGCN brings together researchers from academia and industry as well as practit- ners to share ideas, problems and solutions relating to the multifaceted aspects of communication and networking, including their links to computational sciences, mathematics and information technology. In total, 1,630 papers were submitted to FGIT 2010 from 30 countries, which - cludes 228 papers submitted to the FGCN 2010 Regular Sessions. The submitted papers went through a rigorous reviewing process: 395 of the 1,630 papers were - cepted for FGIT 2010, while 45 papers were accepted the FGCN 2010 Regular S- sions. Of the 45 papers, 8 were selected for the special FGIT 2010 volume published by Springer in LNCS series. 29 papers are published in this volume, and 8 papers were withdrawn due to technical reasons. We would like to acknowledge the great effort of the FGCN 2010 International Advisory Board and members of the International Program Committee, as well as all the organizations and individuals who supported the idea of publishing this volume of proceedings, including SERSC and Springer. Also, the success of the conference would not have been possible without the huge support from our Sponsors and the work of the Chairs and Organizing Committee.

<u>Energy Efficient Smart Phones for 5G Networks</u> Ayman Radwan, Jonathan Rodriguez, 2014-10-09 This book addresses current technology trends and requirements leading towards the next era in mobile communication handsets; and beyond that the book proposes innovative solutions that could

be candidate solutions for 5G phones.
