Creating DSLR Video Richard Harrington, 2012-03-07

Nearly every DSLR camera available today also shoots beautiful high-definition video. YouTube and Facebook are bursting with user-generated content as people share their memories and travels. Whether it's highlights from a great vacation, the kids' soccer game, or family gatherings, everyone wants to create compelling video to document it. While DSLR cameras are quite capable of shooting video, for many, their foray into video

shooting can be frustrating. Footage tends to be dark and out of focus and suffers from camera shake and bad audio. In *Creating DSLR Video: From Snapshots to Great Shots*, photographer and video expert Rich Harrington demystifies the process and teaches a solid foundation for capturing great video. Whether readers have been dabbling in video already or have never even used that mode on their camera, they will learn how to go from capturing mediocre video to creating compelling footage--and all the steps in between! Readers will also learn the essentials of video editing and publishing to the web; how to make the most of their existing equipment; affordable options to improve video capture; and much more! To supplement the book, readers will gain sample videos that further demonstrate the techniques presented in the book.

Using Video to Assess Teaching Performance Carrie Eunyong Hong, Irene Van Riper, 2017-09-15 Recent performance-based teacher assessments have challenged teacher educators to rethink the ways that candidates are prepared in education programs. edTPA (formerly the Teacher Performance Assessment) requires teacher candidates to demonstrate knowledge and skills through authentic teaching artifacts, written commentary, and video clips recorded in real classroom settings. As part of the edTPA requirements, teacher candidates submit video clips of their own teaching to be viewed and assessed by evaluators. This implies that teacher candidates should know how to utilize their own videos for the purpose of improving their instructional skills as well as the learning of their students. These initiatives have urged teacher educators to prepare their candidates for the active use of video-recorded instruction either in university classrooms or in field-based practices. This book provides research-based strategies to support video analysis of authentic teaching in initial teacher education programs. It also presents a review of video recording tools in reference to their features and practicality for different educational settings.
