Startup Accelerators Richard Busulwa,Naomi Birdthistle,Steve Dunn,2020-01-22 The must – read guidebook for entrepreneurs looking to get into accelerator programs and to build and scale their startups with speed Accelerator programs have become one of the most powerful and valuable resources for entrepreneurs seeking to learn rapidly, build powerful networks, raise capital, build their startups and do this at speed and scale. In recent years, the number of accelerator programs around the world has grown at an incredible rate, propelling startups such as AirBnB, Uber, DropBox, Reddit, and others — many to billion-dollar valuations. The number of accelerators, the differences in accelerator program offerings and the unique benefits and costs of different accelerator locations makes choosing the right accelerator a challenge. Selecting the wrong accelerator, failing to be accepted in the right one, or not fully taking advantage of all the accelerator has to offer can be costly, sometimes fatal. With the stakes so high, entrepreneurs need to understand all their options, choose carefully and do the right things to maximize their chances of success. Startup Accelerators is the go to guide for any entrepreneur, providing a firsthand look into the acceptance criteria and inner workings of different accelerator programs. Written by entrepreneurs for entrepreneurs, this indispensable resource explains what different accelerator programs offer, how to get accepted, what to do during the program, how to raise money during accelerators, what to do after the program ends, and much more. Packed with real-world case studies and advice from leading experts on startup accelerator programs, this one-stop resource provides step-by-step guidance on the entire accelerator process. Reveals how accelerators help founders navigate different challenges in the startup journey Describes the differences in the benefits and costs of different accelerator programs Explains how to prepare accelerator applications Discloses what actions to take during an accelerator to make the most of it Depicts case studies of entrepreneurs' accelerator applications, experiences and outcomes across different accelerators Features interviews with accelerator program managers, founders who went through accelerators, and investors in companies going through or having gone through accelerators Includes insightful data and reflections from entrepreneurship education researchers and academics Startup Accelerators: A Field Guide will prove to be invaluable for startup founders considering or going through accelerators, as well as aspiring entrepreneurs, educators, and other startup accelerator stakeholders.

Accelerate Luke Deering,Matt Cartagena,Chris Dowdeswell,2013-12-14 Ever wondered what entrepreneurs learn from participating in the world's leading startup accelerator programs?'Accelerate is a great survey of a wide range of entrepreneurs that will give anyone interested in participating in an accelerator, a deep understanding of what goes on' Brad Feld - Managing Director, Foundry Group and Co-founder of TechstarsKey takeaways from Accelerate Do Stuff - If you haven't acted at least twice as much as you've talked then there is something wrong. User Acquisition: it starts here and it ends here, almost everything else depends on it. Focus - Know what's a waste of time and what's important. In other words, separate the ice cream from the horseshit ... the ice cream does nothing for the horseshit, but the horseshit ruins the taste of the ice cream.Accelerators - In 1959 there was one accelerator/incubator - Batavia Industrial Center in New York; in 2005 there was one accelerator - Y Combinator, which graduated a class of eight startups that included Reddit. Now, in 2013, there are hundreds of accelerators, each offering a unique set of values. The story this trend tells us is that accelerator programs are growing in popularity just as startups are. Teams - Accelerators pick teams, not individuals, not necessarily ideas and not your pitch. Your team is the linchpin of it all - it ties all the other good stuff together. Accelerator-Startup Fit - You need to figure out what's most important to your company, who you need to know, what you need to know, and which accelerator can get you that. Know the type of founders, industry experts and influencers you need to know. If the network or community that you need to bring your product to market isn't there, then it isn't there and maybe you shouldn't be either. Fundraising is of course a factor, but it shouldn't be of the highest priority. The money you'll get out of an accelerator experience is one form of currency, but the various other forms such as mentorship, exposure and introductions have far greater multiplier effects than the linear nature of money.

Observing Acceleration Peter W. Roberts,Saurabh A. Lall,2018-12-20 This book summarizes five years of learning from data collected as part of the Global Accelerator Learning Initiative. The authors present data describing impact-oriented ventures and accelerators that operate in both high-income countries and in emerging markets. Blending survey data with insights from sector experts, their various analyses shed light on the basic structure of accelerators, showing where they are having their most promising results. Unlike previous studies, this book does not focus on a few high-profile accelerators (like TechStars and Y Combinator) and startups (like AirBnB and Uber). Instead, it compares a range of accelerator programs that target specific impact areas, challenging regions, and marginalized entrepreneurs. Therefore, it serves as a valuable tool for scholars, policymakers, and practitioners interested in the effectiveness of accelerator programs as tools that unleash the economic potential currently trapped in entrepreneurial dead spaces.

Accelerators Mike Wright,2018 Accelerators are a rapidly growing new form of organization that aim to stimulate entrepreneurship through intensive, limited-period educational programs, including mentoring and networking for the cohort of start-up participants selected for each program, to improve their ability to attract investment at the end of the program. Drawing on novel evidence from across the world, this is the first book to provide rigorous analysis of the nature and effectiveness of accelerators that will be invaluable for researchers, policymakers and entrepreneurs.

Research Infrastructures for Hardware Accelerators Yakun Sophia Shao,David Brooks,2022-05-31 Hardware acceleration in the form of customized datapath and control circuitry tuned to specific applications has gained popularity for its promise to utilize transistors more efficiently. Historically, the computer architecture community has focused on general-purpose processors, and extensive research infrastructure has been developed to support research efforts in this domain. Envisioning future computing systems with a diverse set of general-purpose cores and accelerators, computer architects must add accelerator-related research infrastructures to their toolboxes to explore future heterogeneous systems. This book serves as a primer for the field, as an overview of the vast literature on accelerator architectures and their design flows, and as a resource guidebook for

researchers working in related areas.

The Great Accelerator Paul Virilio,2012-06-11 On 10 September 2008, amid much fanfare, the Great Collider run by CERN in Geneva was turned on. The Collider was supposed to fire protons around a seventeen-mile loop of tunnels, causing them to crash into one another at close to the speed of light and break into even tinier particles. Nine days later the Collider broke down and had to be switched off, the accelerator temporarily silenced, the reckless search for 'God's particle' put on hold. At the same time the speeded-up markets of global finance, with screens of multi-coloured numbers designating the rapid flows of capital, are suddenly thrown into confusion when news spreads that the great Titan of Wall Street, Lehman Brothers, has filed for bankruptcy. Investors panic, share prices plunge and the accelerated markets of global finance seize up. In his latest book, Paul Virilio - the leading theorist of our obsession with technology, speed and power - rewrites 'The Book of Exodus', but the exodus he talks about is no longer conducted in a single file of people headed for some possible Promised Land. It is a closed-circuit exodus within a cramped world, where reduction in human stocks will suddenly look like the only solution to the lockdown of history.

Lean Accelerator Eric Morrow,2014-12-14 A look inside a Lean Startup-style accelerator In the summer of 2014, five new startups went through a Lean Startup-focused Accelerator. The ten-week program helped them develop their initial ideas into practical businesses with a few actual paying customers. By testing critical assumptions about their product's value proposition, the teams quickly found the beginnings of product-market fit. That turned into cash commitments from early customers to help the startup develop solutions to their real problems. This book explores the lessons learned from these startups and empowers anyone with a business idea to gain traction and to find paying customers. It includes weekly journal entries written by the startups explaining what their hypotheses were, the exact tests they ran to validate their ideas, and the results of their experiments. 99% of startups fail - use the tools described in this book to join the 1% that succeed.

Accelerate This! Ryan Kushner,2018-07-05 Soooo, what is an accelerator?! And should you do one to grow your business? What's an accelerator versus an incubator? How do you find a good one, get in, and make the most of it? If you're running a program, how can you do that more effectively? Accelerate This! will cut through all the confusion so you can: - Decide if you want to join a program - Learn how to grow your idea into a business - Create a program (or run yours better!) Accelerate This! covers the whole shebang, tip to tail, inside out, and outside in. We've collected quotes, insights and best practices from the world's best programs (Y Combinator, 500 Startups, Techstars, Cleantech Open, Google/Alphabet X, The Buckminster Fuller Institute, XPrize, Elemental Excelerator, Free Electrons and a TON more), most interesting entrepreneurs (Justin Rosenstein, Casey Fenton, and more), gathered some of the most useful tools (Lean Startup, Four Steps To The Epiphany, and so on) and put it all together a super NOT

boring format for you to learn, work smarter and create change. The book is written by Ryan Kushner (The Accelerator Guru), and is full of anecdotes and perspectives from his experience working around the world, in various industries, and with hundreds of startups, corporate clients and accelerators, prizes and incubators. Supported by New Energy Nexus (the global association of clean energy incubators and accelerators), The World Bank, Asian Development Bank and the World Wildlife Fund, the book takes a deep dive into clean energy/cleantech entrepreneurship as a test case for what accelerators can (and can't) do. Bonus! This is a carbon neutral/impact free book! We worked with CQuest Capital (www.cquestcapital.com), calculated the impact of each book, then offset that impact through their program installing improved cookstoves with families in rural Zambia, which reduces deforestation and indoor air pollution (which mainly effects women and children). Carbon offsets are the new hot hotness... get on it! Did we mention it's not boring? Buy, enjoy, share, turn into paper airplanes and throw at your friends. Just get busy doing, creating and making positive change in the world. We need it -and we hope Accelerate This! gives you the kick in the pants you need. Waaaabam! :)
