Digital Media Sport Brett Hutchins, David Rowe, 2013-09-05 Live broadband streaming of the 2008 Beijing Olympics accounted for 2,200 of the estimated 3,600 total hours shown by the American NBC-Universal networks. At the 2012 London Olympics, unprecedented multi-platforming embraced online, mobile devices, game consoles and broadcast television, with the BBC providing 2,500 hours of live coverage, including every competitive event, much in high definition and some in 3D. The BBC also had 12 million requests for video on mobile phones and 9.2 million browsers on its mobile Olympics website and app. This pattern will only intensify at future sport mega events like the 2014 FIFA World Cup and 2016 Summer Olympics, both of which will take place in Brazil. Increasingly, when people talk of the screen that delivers footage of their favorite professional sport, they are describing desktop, laptop, and tablet computer screens as well as television and mobile handsets. *Digital Media Sport* analyzes the intersecting issues of technological change, market power, and cultural practices that shape the contemporary global sports media landscape. The complexity of these related issues demands an interdisciplinary approach that is adopted here in a series of thematically-organized essays by international scholars working in media studies, Internet studies, sociology, cultural studies, and sport studies. .

*Cut the Cord* Tom Magrini,2019-08-26 High monthly cost, inflexible bundles of hundreds of channels you never watch, long-term contracts, equipment rental fees, cancellation fees, lousy customer service, and yearly price increases - why would anyone want cable or satellite TV? There is a revolution that has giant cable and satellite TV corporations worried. A major shift in how we watch TV is underway as each month hundreds of thousands of cable and satellite TV subscribers cut the cord and cancel their expensive subscriptions. Over 33 million Americans have cut the cord, opting to watch TV for free using an over-the-air antenna or by taking advantage of low-cost streaming video services that cost a small fraction of the price of cable or satellite TV. In 2018, the number of households who have cut the cord rose by 32.8% with the top five cable and satellite TV providers losing 3.2 million subscribers. In the first quarter of 2019 alone, the top ten U.S. cable and satellite TV providers lost 1.28 million customers. If that trend continues, more than 5 million cable and satellite TV subscribers will have cut their cable cord and ditched their satellite dish by the end of 2019. By the end of 2019, 34% of Americans are expected to have cut their cable TV cord or ditched their satellite TV dish. 61% of U.S. adults aged 18 to 29 and 37% aged 30 to 49 do not have cable or satellite TV and use online streaming services as their primary way to watch TV. 71% of cord-cutters stated their reason for cutting the cord was the high cost of cable and satellite TV. A survey of cord-cutters found the longer they went without cable or satellite TV, the more satisfied they were with their decision to cut the cord. The average cable TV bill is a whopping \$107 per month - nearly \$1,300 a year! Most of us pay more. I will show you how to cut the cord and save \$75 or more each month, even if you are paying as little as \$100 a month for cable or satellite TV. Think it's not worth the time or effort? The average cord-cutter saves \$104 a month - \$1,248 a year! Are you tired of throwing good money away on high cable or satellite TV bills? Do you want to enjoy television without emptying your bank account? Let me show you how to how to watch TV without paying a cable or satellite TV bill. It's time you joined the revolution!

High Definition Television Philip J. Cianci,2014-01-10 The 40-year history of high definition television technology is traced from initial studies in Japan, through its development in Europe, and then to the United States, where the first all-digital systems were implemented. Details are provided about advances in HDTV technology in Australia and Japan, Europe's introduction of HDTV, Brazil's innovative use of MPEG-4 and China's terrestrial standard. The impact of HDTV on broadcast facility conversion and the influx of computer systems and information technology are described, as well as the contributions of the first entrepreneurial HD videographers and engineers. This thoroughly researched volume highlights several of the landmark high-definition broadcasts from 1988 onward, includes input gathered from more than 50 international participants, and concludes with the rollout of consumer HDTV services throughout the world.
