**Timeless Secrets of Health and Rejuvenation** Andreas Moritz,2007 Flying in the face of mainstream medicine and society's many health myths, this text reveals the most common but rarely recognized reasons behind illness and aging and provides remedies for continuous vibrant health.

**Reverse Aging** Sang Whang,1994\*

*Reverse Aging* Sang Whang,1990-12-01 This book is the first common sense scientific explanation of the aging process and how to reverse it. The nutrients that we deliver to our cells burn with oxygen and become acidic wastes after giving energy to our body. The body tries its best to get rid of these acidic wastes through urine and perspiration. Unfortunately, our lifestyle, diet and environment prevent our body to get rid of all the wastes that it generates. Gradually, these leftover acidic wastes accumulate somewhere within our body. Since acid coagulates blood, the blood circulation near the waste areas becomes poor, causing all kinds of degenerative diseases to develop. The author defines the aging process as the accumulation of non-disposed acidic wastes within the body. According to this theory, the reduction of accumulated wastes is reverse aging. This book explains how some of the adult degenerative diseases are caused by too much acidic wastes, and describes the various scientific devices and methods to reduce these wastes without any harmful side effects. These devices and methods are being widely used in Japan. Alkaline water makers (water ionizers) have been in existence in Japan for more than 40 years. Many in the alternative health industry of water ionizers, magnet and far-infrared devices regard this book as the most comprehensive and up-to-date reference book of its kind in the English language. It is a must read for all who are health-conscious.
