Choosing Web 2.0 Tools for Learning and Teaching in a Digital World Pam Berger, Sally Trexler, 2010-04-09 Choosing Web 2.0 Tools for Learning and Teaching in a Digital World provides practical strategies and examples to effectively integrate Web 2.0 tools to support the inquiry process in the school library program and the classroom curriculum. Targeted for school librarians, this book addresses the questions: What is digital literacy? How is learning different in a digital world? And the most important questions, what are the best strategies, resources, and tools to support effective teaching and learning in a digital environment? The first two chapters of the book provide the important context for school librarians: research on student learning behaviors in a digital environment, Web 2.0 background and characteristics, and alignment with the new AASL Standards for the Twenty-first Century Learner and the Stripling Inquiry Process. Grades 4-12.

HTML5 Guidelines for Web Developers Klaus Förster, Bernd Öggl, 2011-06-23 In HTML5 Guidelines for Web Developers, two pioneering web developers provide a comprehensive guide to HTML5's powerful new elements and techniques through compact, practical, easy-to-understand examples. You'll discover just how much you can do with HTML5—from programming audio/video playback to integrating geographical data into pages and applications. This concise, friendly reference is packed with tips, tricks, and samples for making the most of HTML5 with JavaScript and the DOM. The authors present "pure HTML5" examples that are supported by browsers right now, and they share realistic insights into the challenges of leading-edge HTML5 development. All examples are available for download, with links to web resources for new information and specification updates. Topics covered include Browser support: What you can (and can't) do with HTML5 today HTML5 document structure and semantics Intelligent forms, including new input types, elements, and client-side validation The "video" and "audio" elements, and scripting media solutions Advanced graphics with Canvas and SVG Geolocation in the browser, including location tracking via Google Maps Web storage, offline web applications, WebSockets, and Web Workers Embedding semantic markup with Microdata and the Microdata DOM API Implementing drag-and-drop with the "draggable" attribute New global attributes: "data-*, " "hidden," "contenteditable," "spellcheck," and more If you're a web developer or designer with at least basic knowledge of HTML, JavaScript, and CSS, this book is all you need to master HTML5—and get to the cutting edge of web development.

The Craft of Information Visualization Benjamin B. Bederson, Ben Shneiderman, 2003-05-22 Since the beginning of the computer age, researchers from many disciplines have sought to facilitate people's use of computers and to provide ways for scientists to make sense of the immense quantities of data coming out of them. One gainful result of these efforts has been the field of information visualization, whose technology is increasingly applied in scientific research, digital libraries, data mining, financial data analysis, market studies, manufacturing production control, and data discovery. This book collects 38 of the key papers on information visualization from a leading and prominent research lab, the University of Maryland's Human-Computer Interaction Lab (HCIL). Celebrating HCIL's 20th anniversary, this book presents a coherent body of work from a respected community that has had many success stories with its research and commercial spin-offs. Each chapter contains an introduction specifically written for this volume by two leading HCI researchers, to describe the connections among those papers and reveal HCIL's individual approach to developing innovations. *Presents key ideas, novel interfaces, and major applications of information visualization tools, embedded in inspirational prototypes. *Techniques can be widely applied in scientific research, digital libraries, data mining, financial data analysis, business market studies, manufacturing production control, drug discovery, and genomic studies. *Provides an insider view to the scientific process and evolution of innovation, as told by the researchers themselves. *This work comes from the prominent and high profile University of Maryland's Human Computer Interaction Lab

Special Edition Using Groove 2.0 Bill Pitzer, 2002 Special Edition Using Groove gives the reader a quick overview of what Groove is capable of. This content will be comprised of screenshots and other graphics to explain the concepts. More technical readers will be able to more quickly develop applications with the Groove framework and completely understand how their new application operates behind the scenes. Tables and other supporting materials will be included to make this book an excellent flip-to-page-X reference. Programmers planning to develop with the Groove framework will need this book to jump-start his or her application development. Those who have read articles about Groove need this book to see real life applications of the product. Those who have been frustrated with Groove's poor documentation need this book. Bill Pitzer is a member of the Pervasive Technology Group at Divine/Whittman-Hart consulting, formerly marchFIRST. His background includes certification in both networking (MCSE+I) and development (MCSD). As a consultant, he is responsible for educating Business Development personnel on the prospects of peer-to-peer technology. His MBA from Xavier University also gives him a background in business that makes him comfortable talking not only about the technical aspects, but also the strategic aspects of technology. Bill is also a regular contributor to WebTechniques magazine, Microsoft Web Builder, and ASPToday.com.

HTML5 Mastery Anselm Bradford, Paul Haine, 2012-01-29 Markup is synonymous with the development of the web, but most people only scratch the surface of its capabilities. Why settle for average HTML, when you can become an HTML5 master? That's where this unique book comes in. It's aimed at web designers and developers who want to take their markup even further in the exciting new directions the web has taken in multimedia, interactivity and improved semantics.

HTML5 isn't for just any web site, but for a web site that will contribute to tomorrow's "web of data." HTML5 Mastery will introduce the new markup elements of HTML5—including less commonly used ones—and show you where and how to use them. It also provides clever styling and scripting techniques that you can employ on your web site. It is completely standards-compliant, and up-to-date with modern web design techniques.

A Speaker's Guidebook Dan O'Hair, Rob Stewart, Hannah Rubenstein, 2011-10-26 A Speaker's Guidebook is the best resource in the classroom, on the job, and in the community. Praised for connecting with students who use and keep it year after year, this tabbed, comb-bound text covers all the topics typically taught in the introductory course and is the easiest-to-use public speaking text available. In every edition, hundreds of instructors have helped us focus on the fundamental challenges of the public speaking classroom. Improving on this tradition, the fifth edition does even more to address these challenges with stronger coverage of overcoming speech anxiety, organizing and outlining, and more. And as the realities of public speaking change, so does A Speaker's Guidebook; the new edition also focuses on presentational speaking in a digital world — from finding credible sources online to delivering presentations in a variety of mediated formats. Read the preface.

Google SketchUp For Dummies Aidan Chopra, 2007-06-15 Considerably easier to use than other 3D software, Google SketchUp has found a niche in architecture, landscaping, real estate development, furniture building, and other design professions The fun and friendly approach assumes no previous 3D modeling experience and explains the basic concepts involved in 3D modeling Shows readers how to build a 3D model, print it, share it, export it to another professional design package, export it to Google Earth, and create a 3D animated tour Helps readers harness the power of Google SketchUp so that they can populate Google Earth with 3D buildings, monuments, and other sculptures

Handheld and Ubiquitous Computing Hans-W. Gellersen, 2003-06-29 Truly personal handheld and wearable technologies should be small and unobtrusive and allow access to information and computing most of the time and in most circumstance. Complimentary, environment-based technologies make artifacts of our surrounding world computationally accessible and facilitate use of everyday environments as a ubiquitous computing interface. The International Symposium on Handheld and Ubiquitous Computing, held for the first time in September 1999, was initiated to investigate links and synergies in these developments, and to relate advances in personal technologies to those in environment-based technologies. The HUC 99 Symposium was organised by the University of Karlsruhe, in particular by the Telecooperation Office (TecO) of the Institute for Telematics, in close collaboration with ZKM Karlsruhe, which generously hosted the event in its truly inspiring Center for Arts and Media Technology. The symposium was supported by the Association of Computing Machinery (ACM) and the German Computer Society (Gesellschaft für Informatik, GI) and held in cooperation with a number of special interest groups of these scientific societies. HUC 99 attracted a large number of paper submissions, from which the international programme committee selected 23 high-quality contributions for presentation at the symposium and for inclusion in these proceedings. In addition, posters were solicited to provide an outlet for novel ideas and late-breaking results; selected posters are also included with these proceedings. The technical programme was further complemented by four invited keynote addresses, and two panel sessions.
