How to Structure a Thesis, Report or Paper Robert P. Ormrod,2022-11-23 How to Structure a Thesis, Report or Paper provides concise practical guidance for students to help make their writing more structured at any level. It assists students in demonstrating what they have learned in the relevant course or degree programme in a way that is accessible to the supervisor and the examiner. Drawing on almost 20 years of supervision experience, the author presents the eight sections of a well-structured thesis, report or paper, together with discussing other relevant issues. Each chapter provides a detailed description of why each section of a thesis, report or paper is structured in the way it is, and its relationship to the whole piece of work. Good and bad examples are provided throughout the book, and there is a focus on key areas such as the six parts of an Introduction and its relationship to the Conclusion, how to phrase clear research questions and hypotheses to the use of references and how to make the thesis, report or paper easier to read. The structure presented in this book can be used to support many courses on the student's entire degree programme, as the structure can be

adapted by re-arranging or deleting sections. This book is an invaluable aid to students at all stages in higher education, from their first report or paper until they write their final thesis. It provides clear guidelines for when students should ask their supervisors for advice, and when students can use their own initiative to learn the most. It makes writing a thesis, report or papers more straightforward!

Logic Programming in Action Gerard Comyn,Norbert E. Fuchs,1992-08-25 Logic programming enjoys a privileged position. It is firmly rooted in mathematical logic, yet it is also immensely practical, as a growing number of users in universities, research institutes, and industry are realizing. Logic programming languages, specifically Prolog, have turned out to be ideal as prototyping and application

development languages. This volume presents the proceedings of the Second Logic Programming Summer School, LPSS'92. The First Logic Programming Summer School, LPSS '90, addressed the theoretical foundations of logic programming. This volume focuses on the relationship between theory and practice, and on practical applications. The introduction to the volume is by R. Kowalski, one of the pioneers in the field. The following papers are organized into sections on constraint logic programming, deductive databases and expert systems, processing of natural and formal languages, software engineering, and education.

Patient Education for People with Parkinson's Disease and their Carers Marcia Smith

Pasqualini,Gwenda Simons,2006-10-02 This manual provides the information and materials needed to conduct an eight-session patient education programme for people with Parkinson's disease and their carers, complementing medical treatment. This programme was developed within an interdisciplinary European consortium, comprising research and clinical centres in Germany, Spain, Finland, Italy, The Netherlands, Estonia and the United Kingdom. In addition to dealing with the motor symptoms of Parkinson's disease, many people also struggle with the psychological and social effects. In fact, people at every stage of the disease can be faced with problems such as depression, anxiety, stressful

social interactions, and difficulties communicating, all of which can disrupt their lives. This programme draws upon basic psychological principles and presents specific strategies that people can use to manage these difficulties. The ultimate goal of the programme is to empower people with Parkinson's disease and their carers to improve their own quality of life. Although the programme is standardised, flexibility is built into the programme to facilitate its use in different cultures, and with different types of patient and carer groups. Patient Education for People with Parkinson's Disease and Their Carers: A Manual is essential reading for all health care professionals and trained volunteers working with people with Parkinson's disease and their carers.
