Driscoll, 2004-12-13 This volume offers unique and timely insights on the state of online news, exploring the issues surrounding this convergence of print and electronic platforms, and the public's response to it. It provides an overview of online newspapers, including current trends and legal issues and covering issues of credibility and perceptions by online news users. The heart of the book is formed by empirical studies--mostly social surveys--coming out of the media effects and uses traditions. The chapters are grounded in theoretical frameworks and bring much-needed theory to the study of online news. The frameworks guiding these studies include media credibility, the third-person effect, media displacement, and uses and gratifications. The book ends with a section devoted to research on online news postings. This book is appropriate for scholars, researchers, and students in journalism, mass communication, new media, and related areas, and will be of interest to anyone examining how people use the web as a source for news.

Violence in Post-Conflict Societies Anders Themnér, 2011-05-10 This book compares post-civil war societies to look at the presence or absence of organized violence, analysing why some ex-combatants return to organised violence and others do not. Even though former fighters have been identified as a major source of insecurity, there have been few efforts to systematically examine why some ex-combatants re-engage in organized violence, while others do not. This book compares the presence or absence of organized violence in different ex-combatant communities – former fighters that used to belong to the same armed faction and who share a common, horizontal identity based on shared war-and peacetime experiences – in the Republic of Congo (ex-Cobras, Cocoyes and Ninjas) and Sierra Leone (ex-Armed Forces Revolutionary Council, Civil Defense Force and Revolutionary United Front). The main determinants of ex-combatant violence are whether former fighters have access to elites and to second-tier individuals – such as former mid-level commanders – who can act as intermediaries between the two. By utilizing relationships based on selective incentives and social networks, these two kinds of remobilizers are able to generate the needed enticements and feelings of affinity, trust or fear to convince ex-combatants to resort to arms. These findings demonstrate that the outbreak of ex-combatant violence can only be understood by more clearly incorporating an actor perspective, focusing on three levels of analysis: the elite, midlevel and grass-root. This book will be of much interest to students of peacebuilding, civil wars, post-conflict reconstruction, war and conflict studies, security studies and IR.
