In the mix is the inimitable Seattle entrepreneur Craig McCaw; John

Kluge of Metromedia, whose deft trading in cellular properties made him the richest man in America; and also Norma Rea, the unassuming Detroit secretary whose bizarre wireless bid was tainted by scandal and a battle with a powerful newspaper chain. Murray tells the story as only an insider can, detailing the incredible circumstances that shaped and defined the coming century's most promising business. It is a must-read for anyone interested in new technology and the American business landscape.
