Xkill Dr Thomas D Michl,2023-12-28 Australia, 2035. Robotics engineer Tereza has never contemplated how to escape hell on earth ... until now. When her work trip to a remote island for a military tech company turns from mundane to murder in the blink of an eye, Tereza's sheltered world goes haywire. Hunted and haunted in a game of cat and mouse, the lines between friend and foe dissolve. Some want to help escape this madness; others want her dead. To stay alive, Tereza must make terrible decisions. But these decisions unearth nasty secrets. Secrets that shatter everything she ever believed in. Out of options, Tereza must fight back and run a macabre gauntlet, where any mistake spells doom worse than death. It's all in, and the stakes couldn't be higher, as her fate and sanity are far deeper intertwined with the island than she could have imagined. Ultimately, the question boils down to this: Will technology unravel the mystery of who Tereza truly is, or will it annihilate her?
