Intellectual Property Excesses Enrico Bonadio, Aislinn O'Connell, 2022-06-30 This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property (IP) may lead to. It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes. From individuals being sued for hundreds of thousands of dollars for sharing a playlist, to sports spectators being arrested for wearing the 'wrong' dresses, passing through granting patents for inventions obtained by misappropriating traditional knowledge, and trademark protection of merely descriptive signs, this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on unreasonable and/or untenable grounds. The aim of the book is to criticise these excesses precisely because they harm IP; and because they contribute to creating an environment where more and more people are led to 'hate' IP, and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade, competition and people's freedom. This is not, therefore, a book against IP, it is instead a call for change and an attempt to 'save' IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism. The book includes a foreword by Jason Mazzone, Albert E Jenner Jr Professor of Law at the University of Illinois, USA.

Sex For Sale Ronald Weitzer,2022-11-22 Since the publication of the second edition in 2010, the field of sex work studies has expanded. This fully updated edition of Sex for Sale: Prostitution, Pornography, and Erotic Dancing presents an innovative, in-depth, and nuanced analysis of sex work, its risks, and benefits, and pays attention to newer and everchanging types of sex work and its actors, as well as public policies and laws that govern its trade. Now in its third edition, this volume includes updated research on traditional forms of sexual labor and incorporates original, empirically grounded research on newer or less researched phenomena. New chapters explore the use of technology among street sellers, blurring the line between street and online solicitation, in addition to chapters on historical prostitution, transgender workers, illicit massage parlors, male strippers, commercial webcamming, alternative policies and legal systems, and the sex workers' rights movement. The combination of cutting-edge and comprehensive analyses and carefully constructed methodologies in Sex for Sale makes it an excellent source of information for scholars and university students in gender studies, sociology, and criminology.

Unparenting Reema Ahmad,2022-09-26 Through her own awkward journey as a confused single parent with mental health issues, Reema Ahmad explores what it means to unravel newer ways of bringing up children-ways that nurture their sense of innocence and curiosity whilst giving them the freedom to choose their own truths. Reema invites you to hop along as she and Imaad, her son, learn to laugh and understand less explored and serious questions regarding abuse, adult relationships, divorce and death that adults often forget to wonder at, and seldom question. More than anything else, Unparenting is a vibrant, whacky testimony to a parent-child relationship where the child leads and the parent follows. Written in the form of deeply personal, engaging and often humorous essays that span the life of the mother and child from when he was seven-year-old till he turns fourteen, the book is a powerful reminder of what it feels like to be lost and misunderstood as a child and how important it is to challenge parents' knowledge about everything.

The Definitive ANTLR 4 Reference Terence Parr,2013-01-15 Programmers run into parsing problems all the time. Whether it's a data format like JSON, a network protocol like SMTP, a server configuration file for Apache, a PostScript/PDF file, or a simple spreadsheet macro language--ANTLR v4 and this book will demystify the process. ANTLR v4 has been rewritten from scratch to make it easier than ever to build parsers and the language applications built on top. This completely rewritten new edition of the bestselling Definitive ANTLR Reference shows you how to take advantage of these new features. Build your own languages with ANTLR v4, using ANTLR's new advanced parsing technology. In this book, you'll learn how ANTLR automatically builds a data structure representing the input (parse tree) and generates code that can walk the tree (visitor). You can use that combination to implement data readers, language interpreters, and translators. You'll start by learning how to identify grammar patterns in language reference manuals and then slowly start building increasingly complex grammars. Next, you'll build applications based upon those grammars by walking the automatically generated parse trees. Then you'll tackle some nasty language problems by parsing files containing more than one language (such as XML, Java, and Javadoc). You'll also see how to take absolute control over parsing by embedding Java actions into the grammar. You'll learn directly from well-known parsing expert Terence Parr, the ANTLR creator and project lead. You'll master ANTLR grammar construction and learn how to build language tools using the built-in parse tree visitor mechanism. The book teaches using real-world examples and shows you how to use ANTLR to build such things as a data file reader, a JSON to XML translator, an R parser, and a Java class->interface extractor. This book is your ticket to becoming a parsing guru! What You Need: ANTLR 4.0 and above. Java development tools. Ant build system optional(needed for building ANTLR from source)

Dad, How Do I? Rob Kenney,2021-05-18 “Like the YouTube channel, this is a touching yet informative guide for those seeking fatherly advice, or even a few good dad jokes.” — Library Journal

Horse Girls Halimah Marcus,2021-08-03 “A wild, rollicking ride into the heart of horse country—these essays get at what it means to love horses, in all that love's complexity.” —Anton DiSciafani, author of *The Yonahlossee Riding Camp for Girls* A compelling and provocative essay collection that smashes stereotypes and redefines the meaning of the term “horse girl,” broadening it for women of all cultural backgrounds. As a child, horses consumed Halimah Marcus’ imagination. When she wasn’t around horses she was pretending to be one, cantering on two legs, hands poised to hold invisible reins. To her classmates, girls like Halimah were known as “horse girls,” weird and overzealous, absent from the social worlds of their peers. Decades later, when memes about “horse girl energy,” began appearing across social media—Halimah reluctantly recognized herself. The jokes imagine girls as blinkered as carriage ponies, oblivious to the mockery behind their backs. The stereotypical horse girl is also white, thin, rich, and straight, a daughter of privilege. Yet so many riders don’t fit this narrow, damaging ideal, and relate to horses in profound ways that include ambivalence and regret, as well as unbridled passion and devotion. Featuring some of the most striking voices in contemporary literature—including Carmen Maria Machado, Pulitzer-prize winner Jane Smiley, T Kira Madden, Maggie Shipstead, and Courtney Maum—*Horse Girls* reframes the iconic bond between girls and horses with the complexity and nuance it deserves. And it showcases powerful emerging voices like Braudie Blais-Billie, on the connection between her Seminole and Quebécois heritage; Sarah Enelow-Snyder, on growing up as a Black barrel racer in central Texas; and Nur Nasreen Ibrahim, on the colonialist influence on horse culture in Pakistan. By turns thought-provoking and personal, *Horse Girls* reclaims its titular stereotype to ask bold questions about autonomy and desire, privilege and ambition, identity and freedom, and the competing forces of domestication and wildness.
