Zone to Win Geoffrey A. Moore, 2015-11-03 Over the last 25 years, Geoffrey Moore has established himself as one of the most influential high-tech advisors in the world—once prompting Conan O’Brien to ask “Who is Geoffrey Moore and why is he more famous than me?” Following up on the ferociously innovative *ESCAPE VELOCITY*, which served as the basis for Moore’s consulting work to such companies as Salesforce, Microsoft, and Intel, *ZONE TO WIN* serves as the companion playbook for his landmark guide, offering a practical manual to address the challenge large enterprises face when they seek to add a new line of business to their established portfolio. Focused on spurring next-generation growth, guiding mergers and acquisitions, and embracing disruption and innovation, *ZONE TO WIN* is a high-powered tool for driving your company above and beyond its limitations, its definitions of success, and ultimately, its competitors. Moore’s classic bestseller, *CROSSING THE CHASM*, has sold more than one million copies by addressing the challenges faced by start-up companies. Now *ZONE TO WIN* is set to guide established enterprises through the same journey. “For any company, regardless of size or industry, *ZONE TO WIN* is the playbook for succeeding in today’s disruptive, connected, fast-paced business world.” —Marc Benioff, CEO, Salesforce “Once again Geoffrey Moore weighs in with a prescient examination of what it takes to win in today’s competitive, disruptive business environment.” —Satya Nadella, CEO, Microsoft With this book, Geoffrey Moore continues to lead us all through ever-changing times...His work has changed the game of changing the game! —Gary Kovacs, CEO, AVG “*ZONE TO WIN* uses crystal-clear language to describe the management plays necessary to win in an ever-disrupting marketplace. Regardless of your level of management experience, you will find this book an invaluable tool for building long-term success for your business.” —Lip-Bu Tan, President and CEO, Cadence Design Systems

LEXX Unauthorized: Backstage at the Dark Zone D.G.

Valdron, 2022-07-01 *LEXX Unauthorized* - The story of Kai, an undead assassin, Zev, a combination of love slave and cluster lizard, Stanley Tweedle, a hapless security guard and 790, a robot head, careening through space together in the *LEXX*, a planet destroying biological warship shaped like a dragonfly, stolen from the malevolent Divine Order. *LEXX* was one of the strangest and most wildly surreal space operas ever conceived, owing as much to Luis Bunuel and Alejandro Jodorowsky as to *Star Trek* and *Star Wars*. It was unique and unforgettable, mixing black comedy and absurdism with epic drama, and an astonishing visual sense. Featured guest stars for the first season included cult icons Rutger Hauer, Malcolm McDowell and Tim Curry. *Backstage*, the story of the creation of the series was even more extraordinary, a tale of regional Atlantic film makers, renegade artists, American corporate takeovers, Canadian cultural nationalism, German entrepreneurs and new computer generated imagery technologies intersecting in wildly unpredictable ways, to give birth to the show. The product of years of research and dozens of interviews, this is a 'must buy' for any fan of the show itself or of science fiction movies television generally, and an eye opening insight into film and television production, especially Canadian and international productions.

Sleep, Epilepsies, and Cognitive Impairment Peter

Halasz, Anna Szucs, 2018-02-26 Translational research connects science and clinical medicine from the bench to the bedside. In *Sleep, Epilepsies and Cognitive Impairment*, the authors look back from the bedside to the brain function underlying clinical symptoms and reveal mechanisms explored by contemporary neuroimaging and signal analysis in the overlapping fields of sleep and epilepsy. This book will help the reader to see epilepsy from a new viewpoint. The common pathophysiology binding together the diverse manifestations of epilepsies is the exaggeration of plastic functions of the brain involving the hippocampus, the non-specific thalamocortical system and the perisylvian cognitive network. Epileptic derailment seems to be the price for the latest achievements of the mammal and human brain; namely the highly developed ability to change and learn. The contemporary results of sleep research provide new viewpoints to explain why sleep and epilepsy are bedfellows. Converging evidence supports the concept that one of the most important biological roles of NREM

sleep is the renewal of synaptic balance ensuring learning ability from one day to the next and consolidation of new memories. Epilepsy and NREM sleep use overlapping structures and functions, therefore epilepsy beginning in early childhood may interfere with sleep plastic functions. NREM sleep, which affects original learning and memory, may become the hidden source of chronic cognitive impairment when epilepsy occurs during sleep and blocks the plastic processes. Sleep, Epilepsies and Cognitive Impairment abandons the academic classification of epilepsy by following the system epilepsy concept, binding major epilepsies with structures and functions of physiological brain systems. It tries to show within this system the close interrelationship between sleep, epilepsy and cognition. Neuroscientists, clinical epileptologists and neurologists interested in brain processes underlying brain plasticity, sleep and epilepsy will find this book thought provoking. It offers good brain-gymnastics for reconsidering the ideas on epilepsy. It provides contemporary knowledge about the neurophysiological and functional anatomical background of major epilepsies Treats major epilepsies as system epilepsies of brain networks Reveals the interrelationship of sleep, epilepsy and cognitive impairment showing how epileptic manifestations became facilitated in NREM sleep and interferes with sleep plastic functions

Dilemma Zone Protection and Signal Coordination at Closely-spaced High-speed Intersections Prahlad D. Pant,2001 A feasibility study of dilemma zone problems, performed by collecting and analyzing traffic flow data at a high-speed signalized intersection, showed that the maximum green extension or cutback needed to get a vehicle out of the dilemma zone is generally no more than 2 seconds. If we scan all vehicles on a link just a few seconds before the beginning of a yellow interval, we may be able to extend or cut back the green interval so that the vehicles can avoid the dilemma zone. For each vehicle approaching an intersection on the link that is about to turn yellow, there is a time interval such that (a) the vehicle will be in the dilemma zone without green extension (or cutback) or (b) it will be in the dilemma zone when there are T seconds of extension (or cutback). So the task is to find the smallest nonnegative integer T that is not in any of these time intervals and extend (or cut back) the current interval by T seconds. This T can always be found and assuming there are no other restrictions, dilemma zones can be avoided and the extension (or cutback) is done at most once for each green interval. The simulation study, performed by modifying the source codes of NETSIM, showed that the signal timing generated by a bandwidth maximization program (PASSER-II) resulted in a lower number of vehicles in the dilemma zone than that generated by a delay minimization program (TRANSYT-7F). Additionally, the signal timing generated by the combination of the two programs, that is, by minimizing delay within the constraint of bandwidth maximization, resulted in an even lower number of vehicles in the dilemma zone than those generated by each program alone. The technique developed in this study can be implemented if the

speeds and positions of all vehicles on the roadway can be recorded at small time intervals (e.g., 1 sec). Recommendations are made for implementing and testing the developed technique.

The Impact Of Ash Deposition On Coal Fired Plants Jim Williamson, 2022-10-12 Coal provides almost 40% of the world's electricity, and despite the understandable concern with respect to the environmental impact associated with coal use, forecasts from the International Energy Agency predict, that worldwide coal use will increase by up to 2% per annum until the year 2010. Faced with this increase, it is clearly important that the most efficient and environmentally acceptable clean coal technologies are available. This book is comprised of the proceedings of the Engineering Foundation Conference held in June 1993 in England.

The objective of the conference was to present ideas on methods of predicting and reducing the effects of ash deposition in coal conversion systems, highlighting the problems experienced in industry, considering both utilities and industrial plants, and providing a view of the technology of coal ash deposition and its impact. Better techniques are needed to reduce the impact of ash deposition in coal fired plants, and these proceedings should form a reference document for anyone either experiencing slagging or actively engaged in trying to understand or eliminate the phenomenon.

Design Out Crime Ian Colquhoun, 2007-03-14 Here is a book about the practical design of communities and housing in which people can enjoy a good quality of life, free from crime and fear of crime. Recognising that crime, vandalism and anti-social behaviour are issues of high public concern, and that the driving forces behind crime are numerous, this book argues that good design can help tackle many of these issues. It shows how, through integrating simple crime prevention principles in the design process, it is possible, almost without notice, to make residential environments much safer. Written from the perspective of an architect and town planner, this book offers practical design guidelines through a set of accessible case studies drawn from the UK, USA, The Netherlands and Scandinavia. Each example illustrates how success comes when design solutions reflect local characteristics and where communities are truly sustainable; where residents feel they belong, and where crime is dealt with as part of the bigger picture of urban design.
