## **Bomb Hunters: In Afghanistan with Britain's Elite Bomb Disposal Unit** Sean

Rayment,2011-02-03 'Afghanistan is just like Iraq – hot, dusty and full of people who want to kill you', SSgt Simon Fuller, Royal Engineer Search Advisor Bomb Hunters tells the story of the British army's elite bomb disposal experts, men who face death every day in the most dangerous region of the most lethal country on earth – Helmand Province, Afghanistan.

A Bomb Hunter's Story Eric Herrera,2020-07-02 We all have turning points in our lives. One man's turning point led him to join the army. Despite the opposition from shocked family members, he makes the commitment one fateful day in June. What follows is a series of hardships, both physical and emotional, that will change his life forever. After ten years of silence, he is ready to tell his story. It is a story of friendship, politics, loss, and love. When Private Eric Herrera begins his military journey, he starts at the bottom, like they all do. Basic training gives him the courage to do things he hadn't realized he was capable of. It also sets the stage for brother-like friendships that will last a lifetime. Upon arriving in Iraq, he experiences firsthand the consequences of narcissists in power. Not all fit that description though. When a night mission turns into tragedy, he and his platoon must search the ranks for someone who will come to their aid. They find the few who are truly worthy of their rank. Left to deal with the loss of his friends, Eric must choose to move forward in spite of his grief. His struggle is real, but in the end, love comes to the rescue, helping him to pull through when he otherwise may have given up.

*Hunting the Nazi Bomb* Damien Lewis,2018-11-20 A “gripping” and “heart-stopping” account of the combined Norwegian and British sabotage raids to stop Hitler from making an atomic bomb (Saul David, Evening Standard). Nothing terrified the Allies more than Adolf Hitler’s capacity to build a nuclear weapon. In a heavy water production plant in occupied Norway, the Führer was well on his way to possessing the raw materials to manufacture the bomb. British Special Operations Executive (SOE)—Churchill’s infamous “Ministry of Ungentlemanly Warfare”—working with the Norwegian resistance executed a series of raids in the winter of 1942–43, dropping saboteurs to destroy Hitler’s potential nuclear capability: operations Musketoon, Grouse, Freshman, and finally Gunnerside, in which a handful of intrepid Norwegians scaled a 600-foot cliff to blow the heavy water plant to smithereens. Nothing less than the security of the free world depended on their success. The basis for the movie, *The Heroes of Telemark*, starring Kirk Douglas and Richard Harris, this true story is more harrowing than any thriller, and “Lewis does the memory of these extraordinary men full justice in a tale that is both heart-stopping and moving” (Saul David, Evening Standard).

**Hunting Hitler's Nukes** Damien Lewis,2017-05-04 'You couldn't make these stories up: yet they're true, and Lewis does the memory of these extraordinary men full justice in a tale that is both heart-stopping and moving' Evening Standard 'Suicidal bravery, untold moral courage and awe-inspiring survival. An utterly compelling read' Bear Grylls From the bestselling author of true military classics *ZERO SIX BRAVO*, *THE NAZI HUNTERS* and *CHURCHILL'S SECRET WARRIORS* In the Spring of 1940, as Britain reeled from defeats on all fronts and America seemed frozen in isolation, one fear united the British and American leaders like no other: the Nazis had stolen a march on the Allies towards building the atomic bomb. So began the hunt for Hitler's nuclear weapons - nothing else came close in terms of priorities. It was to be the most secret war of those wars fought amongst the shadows. The highest stakes. The greatest odds. Prior to the outbreak of the war the massive German chemicals conglomerate I.G. Farben - the future manufacturers of Zyklon-B, the gas used in the Nazi concentration camps - had started producing bulk supplies of deuterium oxide - heavy water - at the remote Norwegian plant of Vemork. This was the central target of three separate missions - Operations GROUSE, FRESHMAN and GUNNERSIDE - over the ensuing four years. As Churchill commented: 'The actual facts in many cases were equal to the most fantastic inventions of romance and melodrama. Tangle with tangle, plot and counter-plot, ruse and treachery, cross and double-cross, true agent, false agent, double agent, gold and steel, the bomb, the dagger and the firing party were interwoven in a texture so intricate as to be incredible yet true.' Damien Lewis's new bestseller intercuts the hunt for the scientists, the raw materials and the plant, with the cloak and dagger

intelligence game being played in the shadows. This relied in part on ENIGMA intercepts to guide the SOE's hand. Lewis delves into some of the most extraordinarily inventive and Machiavellian innovations at the SOE, and their related research and training schools, whereby the enemy were tricked, deceived, framed, blackmailed and double and triple-crossed, all in the name of stopping the Reich from getting the bomb.

**Military Adaptation in Afghanistan** Theo Farrell, Frans Osinga, James A. Russell, 2013-07-17  
When NATO took charge of the International Security Assistance Force (ISAF) for Afghanistan in 2003, ISAF conceptualized its mission largely as a stabilization and reconstruction deployment. However, as the campaign has evolved and the insurgency has proved to more resistant and capable, key operational imperatives have emerged, including military support to the civilian development effort, closer partnering with Afghan security forces, and greater military restraint. All participating militaries have adapted, to varying extents, to these campaign imperatives and pressures. This book analyzes these initiatives and their outcomes by focusing on the experiences of three groups of militaries: those of Britain, Canada, Denmark, the Netherlands, and the US, which have faced the most intense operational and strategic pressures; Germany, whose troops have faced the greatest political and cultural constraints; and the Afghan National Army (ANA) and the Taliban, who have been forced to adapt to a very different sets of circumstances.

*Sub Hunters* Anthony Cooper, 2021-01-29 • Excellent photographs from the Australian War Memorial collection • Dramatic air battles over a turbulent sea, hundreds of miles from land and without hope of rescue • Striking U-boat 'kills' as concrete proof of operational successes • Beautifully illustrated with many rare and unpublished photographs • Of interest to aviation and military historians, modellers, gamers and flight simulator enthusiasts  
1943 was the turning point in the Battle of the Atlantic when forces, technologies and tactics turned against Germany's U-boats. The victory not only secured Britain's trans-Atlantic lifeline to the United States, but also enabled the vast build-up in military forces in Britain necessary to launch D-Day in 1944. The Allied battle to defeat the U-boat menace was a combined effort by the naval and air forces of several Allied nations, and this is the story of one part during the decisive mid-war period. Nos 10 and 461 Squadrons of the Royal Australian Air Force flew Sunderland flying boats from bases in Wales and Devon as part of RAF Coastal Command; these two squadrons flew long-range daylight missions over the eastern Atlantic, patrolling Britain's southwest approaches. They hunted and killed U-boats transiting between their mid-Atlantic hunting grounds and their bases in Bordeaux and fought furious air battles over the Bay of Biscay against Luftwaffe Ju 88 long-range fighters tasked specifically with shooting them down. These two Australian squadrons established a combat record.

*Unwinnable* Theo Farrell, 2017-09-07 Afghanistan was an unwinnable war. As British and American troops withdraw, discover this definitive account that explains why. It could have been a very different story. British forces could have successfully withdrawn from Afghanistan in 2002, having done the job they set out to do: to defeat al-Qaeda. Instead, in the years that followed, Britain paid a devastating price for their presence in Helmand province. So why did Britain enter, and remain, in an ill-fated war? Why did it fail so dramatically, and was this expedition doomed from the beginning? Drawing on unprecedented access to military reports, government documents and senior individuals, Professor Theo Farrell provides an extraordinary work of scholarship. He explains the origins of the war, details the campaigns over the subsequent years, and examines the West's failure to understand the dynamics of local conflict and learn the lessons of history that ultimately led to devastating costs and repercussions still relevant today. 'The best book so far on Britain's...war in Afghanistan' International Affairs 'Masterful, irrefutable... Farrell records all these military encounters with the irresistible pace of a novelist' Sunday Times

**Word Hunters** Nick Earls, Terry Whidborne, 2013 From award-winning author Nick Earls and illustrator Terry Whidborne comes the third and final book in a mysterious, action-packed series for the word nerd in us all. The final battle is coming, the grey-robos are armed and dangerous and ready for war. Lexi, Al and their friends are ready too - or as ready as they can be. The journey so far has been harder than they imagined - they have fought ancient warriors, searched long-lost cities for

clues, and trained night and day for the moment when they face their arch enemy. But will it be enough? Can they defeat him and save the English language forever? In this amazing last adventure, Lexi and Al plunge back into the past to fight for English, and to discover that language isn't the only thing worth fighting for.

*The Winter Fortress* Neal Bascomb, 2016-05-03 From the internationally acclaimed, best-selling author of *Hunting Eichmann* and *The Perfect Mile*, a World War II spy adventure set in Norway that draws on top-secret documents and memoirs of the saboteurs. In 1942, the Nazis were racing to complete the first atomic bomb. All they needed was a single, incredibly rare ingredient: heavy water, which was produced solely at Norway's Vemork plant. Under threat of death, Vemork's engineers pushed production into overdrive. If the Allies could not destroy the plant, they feared the Nazis would soon be in possession of the most dangerous weapon the world had ever seen. But how would the Allied forces reach the castle fortress, set on a precipitous gorge in one of the coldest, most inhospitable places on earth? Based on a trove of top-secret documents and never-before-seen diaries and letters of the saboteurs, *The Winter Fortress* is an arresting chronicle of a brilliant scientist, a band of spies on skis, perilous survival in the wild, Gestapo manhunts, and a last-minute operation that would alter the course of the war. "Riveting and poignant . . . *The Winter Fortress* metamorphoses from engrossing history into a smashing thriller . . . Mr. Bascomb's research and, especially, his storytelling skills are first-rate."—Wall Street Journal

**No Holiday** Martin Cohen, 2006-06-01 In this first Disinformation Travel Guide, Martin Cohen visits exotic locations (80 of them!) but with a different aim than the usual travel book: to seek out the suffering and injustices, not to skirt them. We will see the dark red waters of "Murdering Creek" in Australia, silent testament to the ongoing genocide of the world's oldest people... we will visit the olive groves of Palestine where the helicopter gunships of the Israeli Army patter by like so many gigantic marauding insects, and we will queue up to see not museums and art galleries, but the more sinister monuments of politics, like the academy of terror funded by the CIA at Fort Benning in Georgia, or the poisoned shores of the Aral Sea revealing an abandoned biological warfare center... We will visit not the great "sights" but the great "sores," the forever cursed cities of Hiroshima and Nagasaki, where so many died, as Churchill might have said, for so little. We'll enter the no-man's lands of the demilitarized zones of past conflicts—between North and South Korea, between Syria and Israel, even between Catholic and Protestants in Northern Ireland.

**The Nazi Hunters: How a Team of Spies and Survivors Captured the World's Most Notorious Nazi** Neal Bascomb, 2013-08-27 A thrilling spy mission, a moving Holocaust story, and a first-class work of narrative nonfiction. This Sydney Taylor Book Award- and YALSA Excellence in Nonfiction Award-winning story of Eichmann's capture is now a major motion picture starring Oscar Isaac and Ben Kingsley, *Operation Finale*! In 1945, at the end of World War II, Adolf Eichmann, the head of operations for the Nazis' Final Solution, walked into the mountains of Germany and vanished from view. Sixteen years later, an elite team of spies captured him at a bus stop in Argentina and smuggled him to Israel, resulting in one of the century's most important trials -- one that cemented the Holocaust in the public imagination. This is the thrilling and fascinating story of what happened between these two events. Illustrated with powerful photos throughout, impeccably researched, and told with powerful precision, *THE NAZI HUNTERS* is a can't-miss work of narrative nonfiction for middle-grade and YA readers.

*Laos* A. Kamala Dalal, 2009 Discusses current, detailed information on virtually everything that defines life in Laos, from its economy and environment to its geography and social trends.

**Sabotage** Neal Bascomb, 2016-05-31 "This richly detailed nonfiction account of Norwegians who spied for the British and organized resistance against the Nazis unfolds like a spy thriller" (Library Journal). The invasion begins at night, with German cruisers slipping into the harbor, and soon the Nazis occupy all of Norway. They station soldiers throughout the country. They institute martial rule. And at Vemork, an industrial fortress high above a dizzying gorge, they gain access to an essential ingredient for the weapon that could end World War II: Hitler's very own nuclear bomb. When the Allies discover the plans for the bomb, they agree Vemork must be destroyed. But after a British

operation fails to stop the Nazis' deadly designs, the task falls to a band of young Norwegian commandos. Armed with little more than skis, explosives, and great courage, they will survive months in the snowy wilderness, elude a huge manhunt, and execute two dangerous missions. The result? The greatest act of sabotage in all of World War II. "A strong choice for students of history or science. This title is easy to recommend to those who enjoy nonfiction and to thriller fans interested in true tales of heroism." —School Library Journal "Riveting." —Publishers Weekly "A rich, well-paced narrative." —Kirkus Reviews

**Dung in My Foxhole** Gordon L Ewell, 2011-06-02 Improvised Explosive Devices (IEDs) are the enemy's weapon of choice in Iraq, and to date they are the number-one killer of Coalition forces on the battlefield. Their ever-increasing sophistication is a challenge but not an insurmountable one. Generally speaking, IEDs are roadside bombs that threaten our Soldiers and logistical convoys taking much-needed supplies to them. Master Sergeant Ewell, a Combat Engineer, and Expert in the Tactics and Techniques the Enemy was using in Iraq to assemble, disguise and detonate IEDs, became one of the first two Soldiers ever to make up a special team, whose mission was vital in the fight to find and render safe the Improvised Explosive Devices, before they could unleash their deadly force upon other Soldiers, Convoys, and the local traffic of Iraqi civilian commuters. In Iraq, he performed 59 dangerous missions, co-authored a first of its kind manual used for the training of special teams that would have the mission of finding IEDs, was Blown up six different times and saved countless lives. A recipient of the Bronze Star and the Purple Heart Medal. This is a powerful account of his experience during War, and his Post-War struggles with Severe Injuries and PTSD thru Poetry.

**Deep Sea Hunters** Martin W. Bowman, 2014-09-11 With vivid firsthand accounts, this WWII history examines the RAF Coastal Command's operations at sea against U-boats and the German Navy. In *Deep Sea Hunters*, historian Martin Bowman delves into the Royal Air Force Coastal Command's dynamic role in countering German naval power during the Second World War. Beginning with the disastrous Norwegian Campaign, he covers the numerous attacks on the bustling German submarine base at Lorient, the attack on Brest, as well as many other pivotal and dramatic events of the conflict at sea. The hunt for U-boats is relayed in full and gripping detail, with first-hand accounts from U-boat attackers—as well as German submariners—punctuating Bowman's dramatic prose. This two-sided history is sure to appeal to all enthusiasts interested in gaining a balanced insight into Second World War naval history.

**From Northern Ireland to Afghanistan** Jon Moran, 2016-04-22 Moran concentrates on three aims: to provide an overview of British military intelligence operations in the last 30 years which concentrates on operational not strategic intelligence; to examine the debates over ethics and effectiveness that have followed these operations; and to examine the increasing attempts to place military intelligence under the same type of regulation that police and security intelligence operations have been subject to. As such, he provides a timely overview of intelligence effectiveness and ethics in this area of heightened interest and relevance in terms of the recent UK deployments to Iraq and Afghanistan, and in the light of the UK Strategic Defence Review. This book is not a philosophical discussion of military ethics; nor is it a study of operations alone. In the light of experiences from Northern Ireland to Afghanistan, it examines the debates over effectiveness which have surrounded British military intelligence activities whilst tying these debates closely to the ethical issues they raise. Each stage of operations is evaluated in context. Interest will cut across disciplines and as such this book will appeal to intelligence, counter-terrorism, military studies, politics, human rights and philosophy practitioners, scholars and students.

**Red One** Kevin Ivison, 2010-08-19 The gripping true story of bomb disposal work that won Ivison a George Medal - and started a living nightmare... When two of his colleagues are killed by a roadside bomb in Iraq, young bomb disposal officer Kevin Ivison is called in to defuse a second even deadlier bomb just a hundred yards from the bodies of his friends. To make things worse, the entire area is under fire from snipers, and a crowd of angry Iraqis have begun to hurl petrol bombs... With little chance of living through this impossible task, Kevin leaves final messages for his loved ones and sets out alone towards the bomb that he is sure will be the last thing he sees. In this gut-wrenching and

terrifying true story of heroism and survival, Kevin Ivison explains why he chose to be a bomb disposal expert in the first place, how he found the courage to face his death, and the unendurable stress that has given him nightmares ever since.

**Night Hunters** William P. Head,2012

*The Hunters of Blood – The First Hunt* Veronica U St. Claire,2022-11-02 Arven Fiercis is a young boy who dreams of becoming a worldrenowned hunter along with his friends Seravanna and Ferran. However, when an attack on Shoren, his hometown, causes him to be separated from his friends, Arven is forced to join the legendary Scarlet Blades all on his own. Over the course of his journey, Arven goes on a number of different hunts and is on the road to becoming a hunter known all throughout the world of Ivaria. That is until a demon presents herself to Arven and tells him that he is meant to serve a higher purpose than simply hunting for the rest of his life and that it is her responsibility to train him to be prepared for that purpose, though she will not tell him what that purpose is. Now, Arven must fight to live the life he wants to live instead of the life that is forced upon him.

**Night Hunters** William Pace Head,2014-03-18 In *Night Hunters*, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, *Night Hunters* offers a clear view of the role of gunships and of close air support in US wars. In today's never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.
