Connected Nicholas A. Christakis, James H. Fowler, 2009-09-28 Celebrated scientists Nicholas Christakis and James Fowler explain the amazing power of social networks and our profound influence on one another's lives. Your colleague's husband's sister can make you fat, even if you don't know her. A happy neighbor has more impact on your happiness than a happy spouse. These startling revelations of how much we truly influence one another are revealed in the studies of Dr. Christakis and Fowler, which have repeatedly made front-page news nationwide. In *Connected*, the authors explain why emotions are contagious, how health behaviors spread, why the rich get richer, even how we find and choose our partners. Intriguing and entertaining, *Connected* overturns the notion of the individual and provides a revolutionary paradigm—that social networks influence our ideas, emotions, health, relationships, behavior, politics, and much more. It will change the way we think about every aspect of our lives.

Everything Is Connected Jason Gruhl, 2019-02-05 A magical meditation on the powerful idea that we are connected to everything and everyone. Playful illustrations and funny, rhyming text show readers all of the many ways we are linked to every big, small, hairy, slimy, snuggly, scaly, floppy, flappy, bristly, buzzy, beautiful creature on Earth. “One of Bala Kids’s inaugural releases, this waggish picture book takes its title to heart, emphasizing readers’ connection to an eclectic roundup of people, objects, and phenomena.”—Publishers Weekly “Jason Gruhl invokes Dr. Seuss with some light rhyming and brings up everything that entrances children—tarantulas, slime, comets, you name it. Ignasi Font’s visually complex and incredibly funny illustrations (a blobfish that looks like Squidward?) will keep kids observing even on the hundredth read. The book is destined to become a dharma classic.”—Tricycle Everything is connected. And since you are part of everything, you are connected to everything: to pharaohs, Ben Franklin, T. Rex, ancient Greece, to love and to poverty, hunger and peace!

The Connected Company Dave Gray, Thomas Vander Wal, 2014-12-02 With a foreword by Alex Osterwalder. The future of work is already here. Customers are adopting disruptive technologies faster than your company can adapt. When your customers are delighted, they can amplify your message in ways that were never before possible. But when your company’s performance runs short of what you’ve promised, customers can seize control of your brand message, spreading their disappointment and frustration faster than you can keep up. To keep pace with today’s connected customers, your company must become a connected company. That means deeply engaging with workers, partners, and customers, changing how work is done, how you measure success, and how performance is rewarded. It requires a new way of thinking about your company: less like a machine to be controlled, and more like a complex, dynamic system that can learn and adapt over time. Connected companies have the advantage, because they learn and move faster than their competitors. While others work in isolation, they link into rich networks of possibility and expand their influence. Connected companies around the world are aggressively acquiring customers and disrupting the competition. In *The Connected Company*, we examine what they’re doing, how they’re doing it, and why it works. And we show you how your company can use the same principles to adapt—and thrive—in today’s ever-changing global marketplace.

Connected Roberto J. González, 2020-08-10 This is the true story of how, against all odds, a remote Mexican pueblo built its own autonomous cell phone network—without help from telecom companies or the government. Anthropologist Roberto J. González paints a vivid and nuanced picture of life in a Oaxaca mountain village and the collective tribulation, triumph, and tragedy the community experienced in

pursuit of getting connected. In doing so, this book captures the challenges and contradictions facing Mexico's indigenous peoples today, as they struggle to wire themselves into the 21st century using mobile technologies, ingenuity, and sheer determination. It also holds a broader lesson about the great paradox of the digital age, by exploring how constant connection through virtual worlds can hinder our ability to communicate with those around us.

Combining the forces of some of today's most popular and confessional poets, *[DIS]CONNECTED* presents poems and short stories about connection wrapped up in a most unique exercise in creative writing. Follow along as your favorite poets connect with each other; offering their work to the next poet who tells a story based on the concept presented to them. Connected David Random, 2021-01-21 There's been a murder. An eyewitness has come forward, and the killer has confessed. But there's a problem. The two are conjoined twins, literally joined at the hip since birth. For the police, keeping the murderer in custody means locking up his innocent brother along with him-an untenable situation. The frustrated legal system wrestles with how to prosecute a murderer who is apparently immune from punishment, as any attempt to exact justice would surely affect his conjoined twin. It appears there can be no satisfactory outcome. That is, until a surprising discovery is made.

A Connected Curriculum for Higher Education Dilly Fung, 2017-06-07 Is it possible to bring university research and student education into a more connected, more symbiotic relationship? If so, can we develop programmes of study that enable faculty, students and 'real world' communities to connect in new ways? In this accessible book, Dilly Fung argues that it is not only possible but also potentially transformational to develop new forms of research-based education. Presenting the Connected Curriculum framework already adopted by UCL, she opens windows onto new initiatives related to, for example, research-based education, internationalisation, the global classroom, interdisciplinarity and public engagement. A Connected Curriculum for Higher Education is, however, not just about developing engaging programmes of study. Drawing on the field of philosophical hermeneutics, Fung argues how the Connected Curriculum framework can help to create spaces for critical dialogue about educational values, both within and across existing research groups, teaching departments and learning communities. Drawing on vignettes of practice from around the world, she argues that developing the synergies between research and education can empower faculty members and students from all backgrounds to contribute to the global common good.

with a past that refuses to stay buried, is it possible for their future to begin?

Connected or Disconnected Micke Darmell, Kapil Rampal, 2019-01-17 The promise of a connected world... Democratization, strengthened personal relationships, and all the knowledge in the world available at your fingertips, more or less for free. And all this regardless of whether you are in India, China, Chile, or Chad. Indeed, the connected world has changed the premise of what it means to be human, and it will continue to impact lives at a rapidly growing pace in the years to come, both on a personal and professional level. Many organizations take advantage of the “anytime, anywhere office” without accepting responsibility for the flip side. On an individual level we have accepted the promise of the connected world and headed into this new way of living without reflecting and acting upon its ramifications. This book will advise you on how to handle the challenges constant connectedness poses to our wellbeing—sleeping patterns, close relations, work-life balance, and parenting. It does not discuss whether this is a threat or an opportunity for us, because it is both. What we really need to start discussing is how to handle the new challenges that constant connection brings and when to step out of it in order to tend to our wellbeing. The book concludes that while accepting that we live in a constantly connected world, we at times need to disconnect to reconnect with the world.

Connected George E. Marcus, 1996-07-15 From the frontiers of cyberspace to Tibetans in exile, from computer bulletin boards to faxes, film, and videotape, the ongoing and often startling evolution of media continues to generate fresh new avenues for cultural criticism, political activism, and self-reflection. How is contemporary life affected by this stunning proliferation of information technologies? How does the Internet influence, and perhaps alter, users' experience of community and their sense of self? In what way are giant media conglomerates implicated in these far-reaching developments? *Connected*, the third volume in the groundbreaking and highly acclaimed Late Editions series, confronts these provocative questions through unique experiments with the interview format. It explores both the new pathways being forged through media and the predicaments of those struggling to find their way in the twilight of the twentieth century.

Connected Planning Ron Dimon, 2021-04-06 Ron Dimon's thought-leading second edition of the book originally entitled *Enterprise Performance Management Done Right*, published in 2012, is a practical roadmap for using Connected Planning to develop an agile organization and to navigate the complex Enterprise Performance Management landscape. According to esteemed author, researcher, and Management professor Dr. Christopher Neck, "In the same way that one needs to be self-leading to finish a grueling marathon, an organization must be self-leading in order to execute on its plans in an efficient and effective manner. What drives self-leadership at all levels in an organization? The people within the organization of course—and those people must be involved in the planning occurring in an organization. Without a plan, an organization has no direction." Since 2012, much has changed in the world of connecting strategy with improved performance: new, cloud-based, in-memory technologies have been adopted by the largest organizations in the world. This book is for CFOs, CIOs, their direct reports, and any organizational visionary or aspiring leader who wants to "bring it all together" and create an actionable vision and plan for improving readiness, resilience, and performance.

Connected Code Yasmin B. Kafai, Quinn Burke, 2016-09-02 Why every child needs to learn to code: the shift from "computational thinking" to computational participation. Coding, once considered an arcane craft practiced by solitary techies, is now recognized by educators and theorists as a crucial skill, even a new literacy, for all children. Programming is often promoted in K-12 schools as a way to encourage "computational thinking"—which has now become the umbrella term for understanding what computer science has to contribute to reasoning and communicating in an ever-increasingly digital world. In *Connected Code*, Yasmin Kafai and Quinn Burke argue that although computational thinking represents an excellent starting point, the broader conception of "computational participation" better captures the twenty-first-century reality. Computational participation moves beyond the individual to focus on wider social networks and a DIY culture of digital "making." Kafai and Burke describe contemporary examples of computational participation: students who code not for the sake of coding but to create games, stories, and animations to share; the emergence of youth programming communities; the practices and ethical challenges of remixing (rather than starting from scratch); and the move beyond stationary screens to programmable toys, tools, and textiles.

The Connected Leader Karen Joy Hardwick M.Div. MSW, 2021-11-23 Connection is the antidote—yet, many of us don't know how to connect to ourselves compassionately in order to enhance self-discovery. Without this gift, we cannot connect—in a meaningful way—to a higher purpose or engage with others to ignite inspiration. With the help of Hardwick's connection architecture, we can transform. By utilizing her strategies of connection, we can empower workplaces and relationships through the grace and grit, resilience and empathy that occur when our connection wiring is activated in healthy ways. Hardwick's

willingness to share her story of struggle and triumph—along with anecdotes from the boardroom and family room—help us to awaken, heal, and courageously lead. She synthesizes the emotional, spiritual, and relational, giving us permission to look honestly at how we do damage to ourselves and others while inviting us to live and lead from a place of true well-being. “The Connected Leader is profoundly important. Karen's written a guide that is at once both practical and actionable while vividly authentic and real. Using her own broken open heart, she shows how each of us is seeking presence and connection and that the best leaders, leading from a connected soul, create the conditions for a lasting sense of belonging.” —Jerry Colonna, author, *Reboot: Leadership and the Art of Growing Up* “Hardwick’s inspiring message is there’s a more fully human way to lead rooted in emotional, spiritual, and relational wholeness. Connected leadership is the way of the future. Highly recommended!” —Ian Morgan Cron, author, *The Road Back to You*
