CU 2.0 Kirk Drake,2017-06-14 In recent decades, credit unions have seen unprecedented threats, due in large part to an eighty-year-old business model and an inability to adapt quickly to a digital economy. But Kirk Drake has devised a powerful plan to revitalize these noble institutions, making them more competitive, more creative, more connected with their membership, and more in tune with the times. A serial entrepreneur focused on credit-union technology, Drake has written a must-read manual for every CU board member, CEO, and management team in America. The first and only book of its kind, CU 2.0 offers essential strategies for leveraging the latest technologies to facilitate organizational growth and foster more even competition with the banking industry. With the tools provided here, the CU of tomorrow will be better equipped to empower its employees, while giving its members the superior financial service they want and need. It's time to be innovative and bold, to challenge long-standing inefficiencies and move away from the old school methods of doing business. CU 2.0 provides the skills, the savvy, and the fresh ideas necessary to finally transport the credit union out of the twentieth century and into the twenty-first.

American Like Me America Ferrera,2019-09-03 INSTANT NEW YORK TIMES BESTSELLER From award-winning actress and political activist America Ferrera comes a vibrant and varied collection of first-person accounts from prominent figures about the experience of growing up between cultures. America Ferrera has always felt wholly American, and yet, her identity is inextricably linked to her parents' homeland and Honduran culture. Speaking Spanish at home, having Saturday-morning-salsa-dance-parties in the kitchen, and eating tamales alongside apple pie at Christmas never seemed at odds with her American identity. Still, she yearned to see that identity reflected in the larger American narrative. Now, in American Like Me, America invites thirty-one of her friends, peers, and heroes to share their stories about life between cultures. We know them as actors, comedians, athletes, politicians, artists, and writers. However, they are also immigrants, children or grandchildren of immigrants, indigenous people, or people who otherwise grew up with deep and personal connections to more than one culture. Each of them struggled to establish a sense of self, find belonging, and feel seen. And they call themselves American enthusiastically, reluctantly, or not at all. Ranging from the heartfelt to the hilarious, their stories shine a light on a quintessentially American experience and will appeal to anyone with a complicated relationship to family, culture, and growing up.

Cu Organocopper Compounds ,2013-06-29 Organocopper reagents have found wide use in synthetic organic chemistry during the past few decades. Structural elucidation has not yet received much attention in organocopper chemistry and the aggregation of most products is unknown. This last volume brings to an end the series of organocopper compounds and contains an Empirical Formula and Ligand Formula Index for about 3000 organocopper compounds and reagents described in Parts 1 to 4.

Cu Organocopper Compounds Helmut Bauer,Jürgen Faust,Rolf Froböse,Johannes Füssel,Ulrich Krüerke,Manfred Kunz,Herman M. Somer,2013-06-29 The present volume finalizes the coverage of organocopper compounds. A complete formula and ligand index for the Gmelin organocopper series will appear shortly as Organa copper Compounds 5. The volume describes mononuclear compounds with ligands bonded by two or more carbon atoms as well as all di- to octanuclear and polymeric compounds. Mononuclear compounds with ligands bonded by one carbon atom have already been described in Volumes 1 (published in 1985), 2 (published in 1983), and 3 (published in 1986). As structural elucidation in organocopper chemistry gained more attention only in the last few years, the terms mononuclear, dinuclear etc. have been used as explained in Organocopper Compounds 1, 1985, pp. 3/4: all compounds are treated with their smallest formula unit unless a higher nuclearity has been proved. As a consequence, most of the species treated in volumes 1 to 3 are described there because of insufficient structural information although they are alleged not to be monomeric. This way, many of the better characterized compounds appear in the present volume which is reflected by the more than eighty X-ray structure figures. Generally, nuclearity and structure are not only determined by the coordination properties of the ligands, but also by steric requirements, and may therefore widely differ for analogous compounds. For abbreviations and dimensions used throughout this volume, see p. X. Frankfurt am Main, July 1987 Johannes Füssel Remarks on Abbreviations and Dimensions Most compounds and reagents in this volume are presented in tables.

A Review of the Alumina/Ag-Cu-Ti Active Metal Brazing Process Tahsin Ali Kassam,2018-10-30 A Review of the Alumina/Ag-Cu-Ti Active Metal Brazing Process is based on the PhD thesis entitled The Effects of Alumina Purity, Ticusil® Braze Preform Thickness and Post-grinding Heat Treatment, on the Microstructure, Mechanical and Nanomechanical Properties of Alumina-to-Alumina Brazed Joints which was awarded by Imperial College London's CASC Steering Group as the 2017 recipient of the Professor Sir Richard Brook Prize (sponsored by Morgan Advanced Materials plc) for Best Ceramics PhD Thesis in the UK. It focusses on the alumina/Ag-Cu-Ti system to cover the active metal brazing of ceramics, variables involved in the process, and the effects of these variables on wetting, interfacial reaction layer formation, and joint strength. The comprehensive review brings together findings from the literature into one place, and presents key concepts in a concise and easy-to-read manner.

Superconducting Glass-ceramics in Bi-Sr-Ca-Cu-O Yoshihiro Abe,1997 High c oxide superconductors such as Bi(Pb)-Sr-Ca-Cu-O (BSCCO) and Y-Ba-Cu-O (YBCO) systems are usually fabricated by sintering given mixtures of raw materials. Generally, sintering processing takes a longer heating time and the products are mechanically low strength and cannot be formed into complex shapes such as a coil, a curved fine tube or a fine rod. Another way to produce the ceramics is a glass-ceramic process in which the glasses prepared by melt-quenching are reheated for crystallization. A given mixture of raw materials in BSCCO is easily melted and quenched to form a given shape of glass, while that in YBCO is not glassified. This invaluable book has been written by authors from five countries. It presents a unique way to fabricate superconducting ceramics in BSCCO by glass-ceramic processing.

Cu(In_{1-x}Ga_x)Se₂ Based Thin Film Solar Cells Subba Ramaiah Kodigala,2011-01-03 Cu(In_{1-x}Ga_x)Se₂ Based Thin Film Solar Cells provides valuable contents about the fabrication and characterization of chalcopyrite Cu(In_{1-x}Ga_x)Se₂ based thin film solar cells and modules. The growth of chalcopyrite Cu(In_{1-x}Ga_x)(S_{1-y}Se_y)₂ absorbers, buffers, window layers, antireflection coatings, and finally metallic grids, which are the sole components of solar cells, is clearly illustrated. The absorber, which contains multiple elements, segregates secondary phases if the growth conditions are not well optimized i.e., the main drawback in the fabrication of solar cells. More importantly the solutions for the growth of thin films are given in detail. The properties of all the individual layers and single crystals including solar cells

analyzed by different characterization techniques such as SEM, AFM, XPS, AES, TEM, XRD, optical, photoluminescence, and Raman spectroscopy are explicitly demonstrated. The electrical analyses such as conductivities, Hall mobilities, deep level transient spectroscopy measurements etc., provide a broad picture to understand thin films or single crystals and their solar cells. The book clearly explains the working principle of energy conversion from solar to electrical with basic sciences for the chalcopyrite based thin film solar cells. Also, it demonstrates important criteria on how to enhance efficiency of the solar cells and modules. The effect of environmental factors such as temperature, humidity, aging etc., on the devices is mentioned by citing several examples. Illustrates a number of growth techniques to prepare thin film layers for solar cells Discusses characterization techniques such as XRD, TEM, XPS, AFM, SEM, PL, CL, Optical measurements, and Electrical measurements Includes I-V, C-V measurements illustrations Provides analysis of solar cell efficiency Presents current trends in thin film solar cells research and marketing

Nanostructure formation and thermal stability of Cu and Cu-based alloys Mohsen Samadi Khoshkhoo,2015-01-12 Nanostructured materials are materials with grain size smaller than 100 nm. Due to the very small grain size, a large fraction of atoms belong to the grain-boundaries. As a result, their properties are significantly different compared to their coarse-grained counterparts. Generally, a considerable improvement in the properties is observed when the size is reduced to nanometer dimensions. These include high strength and hardness, improved ductility and toughness, as well as enhanced diffusivity, which make this category of materials of particular interest for a wide range of applications. The properties of nanocrystalline materials are strongly affected by their structure and defects density, which in turn are determined by the method of production. As a result, the knowledge of the mechanism of nanostructure formation is a prerequisite for the structure/property optimization.

High Cycle Fatigue of Al and Cu Thin Films by a Novel High-Throughput Method Sofie Burger,2014-05-19 In the last two decades, the reliability of small electronic devices used in automotive or consumer electronics gained researchers attention. Thus, there is the need to understand the fatigue properties and damage mechanisms of thin films. In this thesis a novel high-throughput testing method for thin films on Si substrate is presented. The specialty of this method is to test one sample at different strain amplitudes at the same time and measure an entire lifetime curve with only one experiment.

Vanillin- Aminoquinoline Schiff Bases and their Co(II), Ni(II) and Cu(II) Complexes Dr. S. N. Battin,

Investigations on Microstructure and Mechanical Properties of the Cu/Pb-free Solder Joint Interfaces Qingke Zhang,2015-10-31 This thesis presents a series of mechanical test methods and comprehensively investigates the deformation and damage behavior of Cu/Pb-free solder joints under different loading conditions. The fracture behavior of Pb-free joint interfaces induced by stress, deformation of solder and substrate are shown, the shear fracture strength of the Cu₆Sn₅ IMC is measured experimentally for the first time, and the dynamic damage process and microstructure evolution behavior of Pb-free solder joints are revealed intuitively. The thesis puts forward the argument that the local cumulative damage is the major cause of failure in solder joints. The research results provide the experimental and theoretical basis for improving the reliability of solder joints.

New Results and Advances in PGE Mineralogy in Various Ni-Cu-Cr-PGE Ore Systems Andrei Y. Barkov,Federica Zaccarini,2019-11-14 The book (Special Issue) presents impressive new results related to a wide spectrum of occurrences of platinum-group minerals (PGM) and natural compounds enriched in platinum-group elements (PGE), which are associated with various complexes and deposits, such as Uralian-Alaskan-type complexes, layered intrusions and placers. The geographical locations of the involved deposits and complexes include, on a truly international scale, different areas of the Urals, Western and Eastern Sayans and Gornaya Shoria in Siberia, Southern Central Asian Orogenic Belt in China, Northern Michigan, USA, South Africa and Zimbabwe, etc. Of particular interest is the first description of a new species of PGM, thalhammerite (approved by the Commission on New Minerals, Nomenclature and Classification of the International Mineralogical Association), which is a new species of palladium-silver sulfobismuthide discovered in the Noril'sk region of Russia. Additionally, comprehensive reviews, on compositional variations in Pt-Fe alloy minerals and processes of transformations of PGM in exogenic environments, are presented which will also attract attention from international readers.

Radical Hope Kevin M. Gannon,2020 Kevin Gannon asks that the contemporary university's manifold problems be approached as opportunities for critical engagement, arguing that, when done effectively, teaching is by definition emancipatory and hopeful. Considering individual pedagogical practice, the students who are teaching's primary audience and beneficiaries, and the institutions and systems within which teaching occurs, Radical Hope surveys the field, tackling everything from imposter syndrome to cellphones in class to allegations of a campus free speech crisis--

Cu-RE Your Fatigue: The Root Cause and How To Fix It On Your Own Morley Robbins,2021-11-01 The leading cause of death on Planet Earth is Metabolic Syndrome. Some 40% of all Earthlings now suffer from this condition which covers the gamut of Heart Disease, Cancer, Neurodegeneration, Liver disease, and PCOS. What is worth knowing is that ALL of these and related conditions start with Fatigue, known in scientific circles as energy deficiency. 40% of the Earth's population has a formal clinical diagnosis that their mitochondria cannot make adequate levels of energy. [Cu]re Fatigue is a book devoted to educating the masses and their doctors exactly how and why this is happening. Our mitochondria make energy by a series of enzymes to work synergistically to create ATP, the cellular currency of energy. These

mitochondrial enzyme reactions rely on minerals that are easily lost to stress. This book explains these concepts, how these challenges can be overcome and introduces the reader to a simple, proven Root Cause Protocol that is designed to generate more energy and end fatigue. This book is designed for those seeking the truth in human metabolism and those wanting to take back control of their health. It is one part textbook and one part user's guide based on a decade of research and client experience.
