*Remote Instrumentation for eScience and Related Aspects* Franco Davoli,Marcin Lawenda,Norbert Meyer,Roberto Pugliese,Jan Węglarz,Sandro Zappatore,2011-12-16 This book will focus on new Remote Instrumentation aspects related to middleware architecture, high-speed networking, wireless Grid for acquisition devices and sensor networks, QoS provisioning for real-time control, measurement instrumentation and methodology. Moreover, it will provide knowledge about the automation of mechanisms oriented to accompanying processes that are usually performed by a human. Another important point of this book is focusing on the future trends concerning Remote Instrumentation systems development and actions related to standardization of remote instrumentation mechanisms.

**The House of Serenos, Part II** Paola Davoli,2022-09-06 A comprehensive study of the archaeology of the House of Serenos The House of Serenos, Part II is the second of four books devoted to publishing the archaeology of the House of Serenos, a richly decorated, late antique villa of a local élite, located in Amheida (ancient Trimithis) in the Dakhla Oasis of Egypt. The House of Serenos, Part II synthesizes the archaeological information presented in detail in other volumes in a comprehensive study of the architectural and archaeological history of the house and its relationship to its natural and built environments, from construction through expansion and renovation to its eventual abandonment around the end of the fourth century. The volume includes discussions of archaeological method, stratigraphy, architecture, and the archaeological assemblages discovered in the House of Serenos--and reveals what all this can tell us about the inhabitants and their experience living in this high-status residence at the edge of the Roman Empire.

**Scandal** Marc E Vargo,2013-11-12 Examine the cornerstone incidents of modern gay political history! Scandal: Infamous Gay Controversies of the Twentieth Century is a compelling and thorough examination of same-sex controversies that range from accusations of obscenity and libel to espionage, treason, murder, and political dissent, with penalties that included censorship, imprisonment, deportation, and death. In each case, scandal brought the subject of homosexuality into public view in an explosive, sensational manner, stalling (and sometimes reversing) any progress made by the gay and lesbian community in mainstream society. Author Marc E. Vargo details the dignity, courage, and wisdom displayed by the gay men and women under attack in the face of public judgment. A unique blend of biography and gay political history, Scandal: Infamous Gay Controversies of the Twentieth Century recounts seven international incidents that tally the cost of being homosexual in a heterosexual society. In each episode, gay men or lesbians are targeted for legal persecution, subjected to sensationalized media coverage, and publicly condemned. The book examines the short- and long-term consequences of each controversy for those involved and the impact each scandal had on gay and mainstream society. Scandal: Infamous Gay Controversies of the Twentieth Century documents the stories of: Italian filmmaker Pier Paolo Pasolini--his 1975 murder and its subsequent cover-up British diplomats Guy Burgess and Donald Maclean--their defection to Russia at the height of the Cold War Cuban political dissident Reinaldo Arenas--his imprisonment in the 1960s that led to the exposure of the violent homophobia of the Castro regime Irish consul Roger Casement--his execution on treason charges and the later accusation that crucial evidence had been forged South African human rights activist Simon Nkoli--his persecution by his country's all-white, pro-apartheid government British writer Radclyffe Hall--the obscenity trial in the 1920s surrounding her novel, The Well of Loneliness German emperor Kaiser Wilhelm II--the exposé of his relationship with Prince Eulenburg A scholarly work of historical significance, Scandal: Infamous Gay Controversies of the Twentieth Century is written in a straightforward tone that appeals to academics, students, and interested readers, gay or straight. The book stands alone as a record of the role played by public opinion in modern gay history.

**Taking a hands-on approach: Current perspectives on the effect of hand position on vision** Philip Tseng, Christopher Davoli,2015-10-05 An exciting new line of research that investigates the impact of one's own hands on visual processing has flourished in the past several years. Specifically, several studies have demonstrated that objects near the hands receive prioritized attention, enhanced perceptual sensitivity, altered figure-ground assignment, prolonged and detail-oriented processing, and improved visual working memory. Taken together, these results demonstrate that the visual system reveals a new pattern of processing when one's hands are in proximity of viewed objects. Therefore, the vast majority of studies on visual processing, in which one's hands are kept away from the stimuli, may constitute but one side of a more complex story of the inner workings of the visual system. With several consistent behavioral demonstrations of hand-altered vision now in the literature, the present challenge facing this growing field, and the aim of this Research Topic, is four-pronged: 1) Isolate and elucidate the underlying cognitive and neural mechanisms of hand-altered vision; 2) Map the parameters and conditions of hand-nearness that permit/prevent the onset or maintenance of hand-altered vision; 3) Determine the consequences of hand-altered vision for higher-level cognition and assess its applied potential (e.g., as a neuropsychological intervention); and, 4) Present a cohesive and predictive theoretical account of hand-altered vision. We welcome submissions that fit into any one (or a combination) of the above domains. For behavioral research, we particularly encourage submissions that are relevant to the advancement of our understanding of the neural mechanisms of hand-altered vision (e.g., demonstrations that might corroborate or disconfirm proposed neural systems).

*Using Ostraca in the Ancient World* Clementina Caputo,Julia Lougovaya,2020-12-16 Throughout Egypt's long history, pottery sherds and flakes of limestone were commonly used for drawings and short-form texts in a number of

languages. These objects are conventionally called ostraca, and thousands of them have been and continue to be discovered. This volume highlights some of the methodologies that have been developed for analyzing the archaeological contexts, material aspects, and textual peculiarities of ostraca.

**Script Switching in Roman Egypt** Edward O. D. Love,2021-12-06 Script Switching in Roman Egypt studies the hieroglyphic, hieratic, demotic, and Old Coptic manuscripts which evidence the conventions governing script use, the domains of writing those scripts inhabited, and the shift of scripts between those domains, to elucidate the obsolescence of those scripts from their domains during the Roman Period. Utilising macro-level frameworks from sociolinguistics, the textual culture from four sites is contextualised within the priestly communities of speech, script, and practice that produced them. Utilising micro-level frameworks from linguistics, both the scripts of the Egyptian writing system written, and the way the orthographic methods fundamental to those scripts changed, are typologised. This study also treats the way in which morphographic and alphabetic orthographies are deciphered and understood by the reading brain, and how changes in spelling over time both resulted from and responded to dimensions of orthographic depth. Through a cross-cultural consideration of script obsolescence in Mesoamerica and Mesopotamia and by analogy to language death in speech communities, a model of domain-bydomain shift and obsolescence of the scripts of the Egyptian writing system is proposed.
