Feed Mira Grant,2010-05-01 Feed is an electrifying and critically acclaimed novel of a world a half-step from our own that the New York Times calls “Astonishing” — a novel of zombies, geeks, politics, social media, and the virus that runs through them all — from New York Times bestseller Mira Grant. The infection spread, virus blocks taking over bodies and minds with one, unstoppable command: FEED. Now, twenty years after the Rising, Georgia and Shaun Mason are on the trail of the biggest story of their lives—the dark conspiracy behind the infected. The truth will out, even if it kills them. More from Mira Grant: Newsflesh Feed Deadline Blackout Feedback Rise Praise for Feed: I can't wait for the next book.—N.K. Feed Tommy Pico,2019-11-05 A Finalist for the Kingsley Tufts Award for Poetry A New York Times Notable Book of the Year From the Winner of the Whiting Award, an American Book Award, and finalist for a Lambda, Tommy Pico's Feed is the final book in the Teebs Cycle. Feed is the fourth book in the Teebs tetralogy. It's an epistolary recipe for the main character, a poem of nourishment, and a jaunty walk through New York's High Line park, with the lines, stanzas, paragraphs, dialogue, and registers approximating the park's cultivated gardens of wildness. Among its questions, Feed asks what's the difference between being alone and being lonely? Can you ever really be friends with an ex? How do you make perfect mac & cheese? Feed is an ode of reconciliation to the wild inconsistencies of a northeast spring, a frustrating season of back-and-forth, of thaw and blizzard, but with a faith that even amidst the mess, it knows where it's going.

Livestock Feeds and Feeding Richard O. Kellems,D. C. Church,2002 With new World Markets opening, the challenge to boost the Production efficiency of livestock products is increasing. The cost of feeding accounts for the largest single input in a production operation, thus, there is a need for a better understanding of nutrition and feeding. Written to appeal to both experts and beginners in the field, this new edition provides the reader with an understanding of the principles relating to livestock feeding. Parts I and II cover everything from nutrients, feedstuffs, minerals, vitamins, and additives to feed preparation/processing and ration formulation. Part III provides detailed information on different livestock species, such as, swine, poultry, dairy cows, beef cows and cattle. Domesticated species, such as horses, sheep, goats, dogs, cats, and rabbits are covered in Part IV Each species chapter discusses the management and feeding practices unique to that particular species. Feedstuff characteristics and nutrient guidelines are given for various classes of the species in the Appendix Tables. Advances in genetics, changes in scientific knowledge, food security, and concerns about the environment are just a few of the areas that have had an impact on livestock production. Because of these changes, it is essential that individuals and companies understand the effect feeding and

management of livestock have on livestock production systems. Kellems and Church's *Livestock Feeds and Feeding*, 5th edition, provides the basis for this understanding and is a handy reference for anyone involved in livestock production.

The Feed Nick Clark Windo, 2018-03-13 Now a Streaming Series! Blake Crouch's *Recursion* meets *Mad Max* and *The Girl with All the Gifts* in this startling and timely debut that explores what it is to be human and what it truly means to be connected in the digital age. The Feed is accessible everywhere, by everyone, at any time. It instantaneously links us to all information and global events as they break. Every interaction, every emotion, every image can be shared through it; it is the essential tool everyone relies on to know and understand the thoughts and feelings of partners, parents, friends, children, colleagues, bosses, employees . . . in fact, of anyone and everyone else in the world. Tom and Kate use the Feed, but Tom has resisted its addiction, which makes him suspect to his family. After all, his father created it. But that opposition to constant connection serves Tom and Kate well when the Feed collapses after a horrific tragedy shatters the world as they know it. The Feed's collapse, taking modern society with it, leaves people scavenging to survive. Finding food is truly a matter of life and death. Minor ailments, previously treatable, now kill. And while the collapse has demolished the trappings of the modern world, it has also eroded trust. In a world where survival of the fittest is a way of life, there is no one to depend upon except yourself . . . and maybe even that is no longer true. Tom and Kate have managed to protect themselves and their family. But then their six-year-old daughter, Bea, goes missing. Who has taken her? How do you begin to look for someone in a world without technology? And what happens when you can no longer even be certain that the people you love are really who they claim to be?

Exogenous Enzymes as Feed Additives in Ruminants Abdelfattah Zeidan Mohamed Salem, Abubeker Hassen, Uchenna Y. Anele, 2023-07-04 This book addresses a global issue of increasing high quality food from ruminant animals while reducing their impacts on the environment. However, one of the main constraints to livestock development and the underlying cause of the low productivity in many developing countries is inadequate nutrition associated with inefficient utilization of forages and fibrous feed resources. In many countries, fibrous feed makes up the bulk of available feed resource base, which is characterized by scarcity and fluctuating supply in the quantity and quality of feed resources, nutrient imbalance as seen in many native pastures, grasslands and crop residues-based feeding systems with limited use of commercial concentrate feeds such as soybean, cottonseed and groundnut meals, etc. Furthermore, the production of methane, an important greenhouse gas (GHG), from ruminants fed highly fibrous diets such as straws and stover is higher than those animals fed better quality forages or concentrate diets. Recent research shows that supplementing livestock diets with exogenous fibre degrading enzymes can improve feed utilization by enhancing intake, fibre degradation in the rumen and overall digestibility of fibrous feeds which in turn leads to improved animal performance, farmers' income, and a reduction in GHG emissions. The book editors would like to acknowledge the Joint FAO/IAEA Division of Nuclear Techniques in Food and Agriculture for funding part of the studies that make up some of these chapters and were part of the final reports of a coordinated research project financed by IAEA.
