Contesting Austerity Anuscheh Farahat, Xabier Arzoz, 2021-07-01 This book addresses the different forms of austerity, contestation and resistance, in order to understand how they relate to one another and the impact they have on the democratic quality of public debates, the trust in public institutions and the legitimacy of law. Contestation of austerity includes not only traditional activism strategies such as human rights litigation and direct democracy instruments, but also new forms of collective action and collaborative resistance. Most importantly, many of the new anti-austerity initiatives also aim to renovate existing modes of democratic decision-making on the European, national, regional and local levels. The book focuses on different types of contesting austerity measures and the interaction between institutional and civil society actors. It will enhance understanding of how the various actors frame not only their goal but also the underlying social conflict to contest austerity and through which means they try to achieve political and legal changes. With 16 chapters written by contributors from Spain, Germany, Greece, Portugal and the UK, the book approaches 3 crucial areas of austerity policies: cuts in payment and pensions, labour law reform, and old and new poverty. In each field, the contributors analyse the processes of decision-making and contestation from 3 perspectives: institutions, democratic theory and societal responses.

Europe – Germany and the Migrant Crisis Frank Keith, The migrant crisis has a solid grip on Europe. For months it's been in the forefront of news accounts. As 2015 comes to a close, it's apparent that the challenges and problems this situation poses for the EU are only the beginning. The continent faces ever greater numbers of people fleeing the third-world. The reasons are many, the problems they bring with them too. If allowed to go unchecked, they could prove to be insurmountable. The essay encompasses many facts and figures, some scarcely known to the general public, even to those who are forced to live through the largest waves of human migration seen in this part of the world since WWII.

Exhaustivity, Contrastivity, and the Semantics of Mandarin Cleft-related Structures Ying Liu, 2022-12-30 Exhaustivity, Contrastivity, and the Semantics of Mandarin Cleft-related Structures investigates the semantics of the cleft and cleft-related structures in Mandarin, which, over several decades, have presented analytical challenges for semantic theory. The goal of this book, in broad terms, is three-fold: (i) to figure out what clefting adds to the semantics of a sentence; (ii) to set apart the meaning and the discourse function of each type of cleft-related structure; and (iii) to provide a uniform analysis of Mandarin clefts and their related structures. More specifically, it addresses the following questions: (i) what is the semantics of Mandarin clefts? (ii) what do exhaustivity and contrastivity contribute to the meaning of clefts? (iii) what are the semantic (or pragmatic) factors that determine the variation of clefts, related structures, and canonical sentences? and (iv) cross-linguistically speaking, how do Mandarin shi...de cleft and its related structures differ from similar constructions such as English it-cleft, French c'est cleft, and German es-cleft? This book will be informative for linguists who are working on cleft constructions and focus on sensitive structures cross-linguistically, and those interested in experimental semantics and pragmatics.

Learning Rates of Electric Vehicles Andreas Zerfuß, 2017-07-25 Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the

techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

Discurso y conocimiento Teun van Dijk, 2016-10-20 *Discurso y conocimiento* se trata de un libro sobre las maneras que tienen los usuarios del lenguaje en gestionar el conocimiento en el discurso. Trata sobre el tipo de conocimiento general, sociocultural, que periodistas y lectores, entre muchos otros usuarios del lenguaje, han de tener para ser capaces de escribir o leer y comprender una noticia, para participar en una conversación, para dictar una clase o participar en reuniones profesionales, así como para muchos otros géneros de discursos. Hay muchos miles de libros sobre conocimiento, en variadas disciplinas, y muchos cientos de libros sobre discurso. Sin embargo, pese a las múltiples e interesantes relaciones entre las dos nociones, no existe ni siquiera una monografía que, sistemáticamente, se centre en el estudio de esas relaciones. La intención de este libro es, justamente, hacer eso. En esta monografía hemos mostrado, necesariamente a los más altos y, por lo tanto, más superficiales niveles, que el estudio del conocimiento se debe llevar a cabo de una manera profundamente integrada, como acabamos de mostrar en las últimas décadas para el estudio del discurso.

Football Nation Rebecca Dawson, Bastian Heinsohn, Oliver Knabe, Alan McDougall, 2022-10-14 Over the past century, the impact of football on Germany has been manifold, influencing the arts, political debates, and even contributing to the construction of cultural memories and national narratives. *Football Nation* analyses the game's fluid role in shaping and reflecting German society, and spans its focus on modern German history, from the Wilhelmine era to the early 21st century. Expounding on topics of gender, class, fandom, spectatorship, antisemitism, nationalism, and internationalism, a diverse group of interdisciplinary scholars offer a novel approach to understanding the many influences of football throughout its extensive history which until recently has only been available to a German-speaking readership.

Contrasts and Positions in Information Structure Ivona Kučerová, Ad Neeleman, 2012-07-26 Information structure, or the way the information in a sentence is 'divided' into categories such as topic, focus, comment, background, and old versus new information, is one of the most widely debated topics in linguistics. This volume incorporates exciting work on the relationship between syntax and information structure. The contributors are united in rejecting accounts that assume designated syntactic positions associated with specific information-structural interpretations, and aim instead to derive information-structural conditions on word order and other phenomena from the way syntax and syntax-external systems interact. Beyond this shared aim, the authors of the various chapters advocate a number of approaches, based on different types of data (syntactic, semantic, phonological/phonetic) from a range of languages. The book is aimed at specialists in syntax and/or information structure, as well as students and linguists in related fields keen to familiarise themselves with current issues in this fascinating area of research.

Global Islamophobia George Morgan, 2016-04-22 The decade since 9/11 has seen a decline in liberal tolerance in the West as Muslims have endured increasing levels of repression. This book presents a series of case studies from Western Europe, Australia and North America demonstrating the transnational character of Islamophobia. The authors explore contemporary intercultural conflicts using the concept of moral panic, revitalised for the era of globalisation. Exploring various sites of conflict, *Global Islamophobia*

considers the role played by 'moral entrepreneurs' in orchestrating popular xenophobia and in agitating for greater surveillance, policing and cultural regulation of those deemed a threat to the nation's security or imagined community. This timely collection examines the interpenetration of the global and the local in the West's cultural politics towards Islam, highlighting parallels in the responses of governments and in the worrying reversion to a politics of coercion and assimilation. As such, it will be of interest to scholars of sociology and politics with interests in race and ethnicity; citizenship and assimilation; political communication, securitisation and The War on Terror; and moral panics.

Social - Local - Mobile Gerrit Heinemann, Christian Gaiser, 2014-11-20 In the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the 'SoLoMo synergies' that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of kaufDA - a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.

Emerging Market Multinationals and Europe Andreas Breinbauer, Louis Brennan, Johannes Jäger, Andreas G. M. Nachbagauer, Andreas Nölke, 2019-11-15 Recently, there have been public concerns about the impact of emerging market multinationals. The expansion of China's multinationals to Europe and the Belt and Road Initiative is a prominent example that has kindled hope but also started to increase awareness of the long-term implications. Based on a systematic analysis of internationalization theories, the role of foreign direct investment and multinational companies combined with in-depth empirical research using case studies in Turkey, Russia, Latin America, Asia and Europe, this timely edited volume addresses opportunities and concerns related to this new trend. It also provides new insights that are highly relevant for scholars, policy makers, regional business agencies and students, as well as the public at large. By focusing on the (potential) impact of the expansion of emerging market multinationals on Europe and by including a long-term perspective, the book offers a fresh perspective on a highly controversial issue.

Religion in Gender-Based Violence, Immigration, and Human Rights Mary Nyangweso, Jacob K. Olupona, 2019-07-23 This book builds on work that examines the interactions between immigration and gender-based violence, to explore how both the justification and condemnation of violence in the name of religion further complicates our societal relationships. Violence has been described as a universal challenge that is rooted in the social formation process. As humans seek to exert power on the other, conflict occurs. Gender based violence, immigration, and religious values have often intersected where patriarchy-based power is exerted on the other. An international panel of contributors take a multidisciplinary approach to investigating three central themes. Firstly, the intersection between religion, immigration, domestic violence, and human rights. Secondly, the possibility of collaboration between various social units for the protection of immigrants' human rights. Finally, the need to integrate faith-based initiatives and religious leaders into efforts to transform attitude formation and general social behavior. This is a wide-ranging and multi-layered examination of the role of religion in gender-based violence and immigration. As such, it will be of keen interest to academics working in religious studies, gender studies, politics, and ethics.

The Drivers of Digital Transformation Ferri Abolhassan, 2016-08-31 In this

book, leading CEOs, CIOs and experts from international corporations explore the role of digitalization and cloud-based processes as the main business drivers of the 21st century. Focusing on how to get started with digitalization and how to handle the technologies involved, they employ analyses and practical case studies to demonstrate how to unleash the potential offered by the cloud, and how to achieve the most critical success factors – quality and security – through the right partnerships. Readers will discover why the cloud will soon take over the driver's seat in cars, and why Heineken CIO Anne Teague claims that innovation is impossible without high-quality IT. The book reveals what IT managers can learn from Silicon Valley and China today, and why Deutsche Telekom CEO Tim Hoettges believes Europe's future depends on successful digitalization. In a closing strategic assessment, the editor Ferri Abolhassan presents the cloud as the essential backbone of digitalization. In short, the book provides readers the first comprehensive, high-level assessment of cloud-based digital transformation in the era of Industry 4.0.

Being Jewish in 21st-Century Germany Olaf Glöckner, Haim Fireberg, 2015-09-25 An unexpected immigration wave of Jews from the former Soviet Union mostly in the 1990s has stabilized and enlarged Jewish life in Germany. Jewish kindergartens and schools were opened, and Jewish museums, theaters, and festivals are attracting a wide audience. No doubt: Jews will continue to live in Germany. At the same time, Jewish life has undergone an impressive transformation in the second half of the 20th century– from rejection to acceptance, but not without disillusionments and heated debates. And while the 'new Jews of Germany,' 90 percent of them of Eastern European background, are already considered an important factor of the contemporary Jewish diaspora, they still grapple with the shadow of the Holocaust, with internal cultural clashes and with difficulties in shaping a new collective identity. What does it mean to live a Jewish life in present-day Germany? How are Jewish thoughts, feelings, and practices reflected in contemporary arts, literature, and movies? What will remain of the former German Jewish cultural heritage? Who are the new Jewish elites, and how successful is the fight against anti-Semitism? This volume offers some answers.

Organizational Cultures of Remembrance Daniel Mai, 2015-05-19 In a business world predominantly oriented toward the future, it has paradoxically become ever more common that companies turn towards their pasts. This book empirically explores the phenomenon of organizational remembrance from a holistic cultural perspective. Based on a twelve-month ethnographic case study conducted at the headquarters of the German automobile company, AUDI AG, this study dissects the relationships between memory, identity, and image in a corporate setting. The greater aim in doing so is twofold: First, this study examines exactly why and how a company officially manages its past in terms of 'history' and 'tradition.' And second, this study scrutinizes what effect organizational remembrance has on the workforce – how it impacts their collective identification with a corporate community and influences their understanding of their daily working life. By investigating the interplay between different stakeholder groups, as well as their practices, media, mental models, and other vehicles of remembrance, an integrated account is offered which makes sense of the complex cultural forces at work in the corporate handling of the past, the present, and the future.

A todas estas cuestiones te doy respuesta en este libro. Es para todos aquellos que buscan la libertad, la coherencia y la presencia en la gestión. Es para todos aquellos que quieren abrir definitivamente su vida y sus organizaciones a una nueva forma de percibir, de pensar, de sentir, de hacer y de ser. Una nueva forma de liderar más consciente, más organizada, más constante en su esfuerzo, más enfocada, más saludable, y al final, más rentable. Menos estresada y sufrida. En este libro te propongo el Modelo Ejecutivo de Liderazgo, el primer modelo diseñado desde el conocimiento neuropsicológico de la inteligencia ejecutiva y sus funciones. En este libro te desvelo las claves para entender la parte ejecutiva de la inteligencia humana, y el cómo aplicarlo al día a día de liderar. Porque necesitamos un conjunto de competencias nuevas, que nos ayuden a dirigir la inteligencia en todas sus funciones: desde la percepción, hasta el paso a la acción. Doce funciones para liderar un futuro mejor. Visión Cumplida es para todas aquellas personas que desean transformar la inteligencia de sus organizaciones, y convertirlas en sistemas que evolucionan y se preadaptan a las necesidades de su contexto interno y externo actuales y futuros. La inteligencia de los líderes nunca antes se ha enfrentado a una complejidad, volatilidad y multiplicidad de opciones de pensamiento y acción como las actuales. Y, en medio de todo esto, tiene un gran reto: construir y seguir una visión mejor. Solo construyendo mejores visiones, y moviéndonos hacia ellas, conseguiremos evolución. Este fue siempre el fin último de la inteligencia.

The Future of Money Harald Seiz,2017-08-14 Never before in times of peace has the subject of money evoked the uncertainty it does today. Although, we live in affluence here in Germany, many people begin to ask themselves whether the value of our money is dwindling away. Cash seems permanently under attack as the media bombards us with theories on the 'End of Cash'. Concerns about the future of money are not without basis: in many countries, massive restrictions on the use of cash have now become a reality, with India at the forefront. Overnight, 86 percent of their rupee reserves were removed from circulation and declared worthless - is cash in the eurozone next? What is the future of money - a means of exchange, anonymous payment or an opportunity to hoard wealth? How will we pay in the future? What forms will digitization open up to us? And what forms could be forced on us by the state

or circumstances, such as a crisis or catastrophe? Are you prepared if ATMs or online banking no longer function?
