Coloring into Existence Isabel Millán, 2023-12-05 Argues that queer picture books with main characters of color can disrupt structures of power in both literature and real life Coloring into Existence investigates the role of authors, illustrators, and independent publishers in producing alternative narratives that disrupt colonial, heteropatriarchal notions of childhood. These texts or characters unsettle the category of the child, and thus pave the way for broader understandings of childhood. Often unapologetically politically motivated, queer and trans of color picture books can serve as the basis for fantasizing about disruptions to structures of power, both within and outside literary worlds. Fusing literary criticism and close readings with historical analysis and interviews, Isabel Millán documents the emergence of a North American queer of color children's literary archive. In doing so, she considers the sociopolitical circumstances out of which queer of color children's literature emerged; how a queer and trans of color aesthetic translates to picture books; and how the acts of imagination and worldmaking inspired by picture books produce a realm of freedom, healing, and transformation for queer and trans of color children and adults. Coloring into Existence explores the curious ways that queer and trans of color publications "color outside the lines"—refusing to conform to industry standards, intermixing fiction with nonfiction, and mobilizing alternative modes of production and distribution to create new worlds.

Day into Night Gunther Klinge, 2016-05-10 This is a beautiful book for all seasons! Gunther Klinge illustrates that the difference between oriental and western mind is a myth and fantasy. His haiku never startle, never strain. —Book News Previews In this exquisite collection of haiku, accomplished haiku author Gunther Klinge takes us on a journey through the days and nights of each of the seasons, beginning with spring dawn and ending with winter midnight. It is the human journey which Gunther Klinge so movingly depicts as it progresses through the eternal youthfulness of spring toward the richness of summer, and on through the ripening maturity of autumn in the deepening stillness of winter. The universal appeal of these haiku and the contemplative comments which introduce and reiterate the mood of the seasons, bind us all together as we make our own journeys from day into night.

Epic into Novel Henry Power, 2015-02-19 *Epic into Novel* examines an unexplored tension in Fielding's work: the tension between his commitment to the classical tradition and his immersion in a print culture in which books were regarded as consumable commodities. It gives a fresh account of Fielding's engagement with classical literature, showing how he fashioned his novels out of ancient epic. It also shows how Fielding drew on the language of cookery and consumption in order to characterize his relationship with the market. This interest in the place of the ancients in a world of consumerism was inherited from the previous generation of satirists. The 'Scriblerians'—among them Jonathan Swift, John Gay, and Alexander Pope—repeatedly suggest in their work that classical values are at odds with modern tastes and appetites. Fielding, who had idolized these writers as a young man, developed many of their satiric routines in his own writing. But Fielding broke from Swift, Gay, and Pope in creating a version of epic designed to appeal to modern consumers. Henry Power draws on a range of sources—including eighteenth-century cookery books as well as works of classical literature—to offer fresh readings of works by Swift, Gay, and Pope, and of Fielding's major novels. *Epic into Novel* explores Fielding's engagement with various Scriblerian themes, primarily the consumption of literature, but also the professionalization of scholarship, and the status of the author. It shows ultimately that Fielding broke with the Scriblerians in acknowledging and celebrating the influence of the marketplace on his work.

Parachuting Cats into Borneo Axel Klimek, Alan AtKisson, 2016-08-17 A toolkit

of proven strategies and practices for building capacity and creating transformation. Recent years have seen a proliferation of information on how to make change—in business, in social and environmental movements, and on a more personal scale. But, even with all this attention, two out of three change efforts fail to achieve their desired result. How can you make your own effort buck this trend? In *Parachuting Cats into Borneo*, change-management experts Axel Klimek and Alan AtKisson offer crisp, concise, and targeted advice for success. They expose the most significant impediments—helping readers recognize their habitual patterns of thinking and perceiving a situation, critique their own beliefs regarding change, and then move beyond these unhelpful patterns using improved systems thinking. Named after a classic tale of unintended consequences, *Parachuting Cats into Borneo* delivers tools that help leaders and others keep their change initiatives on track. The advice imparted will help you move away from agonizing over immediate problems toward stoking action, identifying collaborators, focusing at the right level for your cause, and aiding others in pursuing their change. Klimek and AtKisson draw from their decades of helping corporations, networks, governments, and NGOs reach their change goals to demonstrate how to use system-based change tools to their maximum advantage. A closing section is devoted to change making in the realm of sustainability, where complexity abounds but the right tools, used well, can help us tackle some of the most significant challenges of our time.

Introduction into Capital Theory Gunter Stephan, 2013-03-14 Capital theory is a cornerstone of modern economics. Its ideas are fundamental for dynamic equilibrium theory and its concepts are applied in many branches of economics like game theory, resource and environmental economics, although this may not

be recognized on a first glance. In this monograph, an approach is presented, which allows to derive important results of capital theory in a coherent and readily accessible framework. A special emphasis is given on infinite horizon and overlapping generations economics. Irreversibility of time, or the failure of the market system appear in a different light if an infinite horizon framework is applied. To bridge the gap between pure and applied economic theory, the structure of our theoretical approach is integrated in a computable general equilibrium model.

Into the Slave Nebula John Brunner, 2011-09-29 It was carnival time on Earth. Prosperity was at its peak; science had triumphed over environment; all human needs were taken care of by computers, robots and androids. There was nothing left for humans to do but enjoy, themselves . . . to seek pleasure where they found it, without inhibitions and without thinking of the price. Then an android died - in a senseless, brutal murder. And young Derry Horn was shocked out of his boredom and alienation. His life of flabby ease had not prepared him for a fantastically dangerous mission to outlying, primitive stars - but now, at last, he had a reason for living. And even when he found himself a prisoner of ruthless slavers, even when he learned the shocking truth about what the androids really were and where they came from . . . even when he saw all the laws of the orderly, civilised universe he knew turned upside-down and inside-out . . . he fought on. For that universe had to be shattered and reborn - even if Derry Horn and the Earth he had irrevocably left behind died in the process! (First published 1968)
