Introducing Liberation Theology Leonardo Boff,

The Library Book Susan Orlean, 2019-10-01 Susan Orlean's bestseller and New York Times Notable Book is "a sheer delight...as rich in insight and as varied as the treasures contained on the shelves in any local library" (USA TODAY)—a dazzling love letter to a beloved institution and an investigation into one of its greatest mysteries. "Everybody who loves books should check out *The Library Book*" (The Washington Post). On the morning of April 28, 1986, a fire alarm sounded in the Los Angeles Public Library. The fire was disastrous: it reached two thousand degrees and burned for more than seven hours. By the time it was extinguished, it had consumed four hundred thousand books and damaged seven hundred thousand more. Investigators descended on the scene, but more than thirty years later, the mystery remains: Did someone purposefully set fire to the library—and if so, who? Weaving her lifelong love of books and reading into an investigation of the fire, award-winning New Yorker reporter and New York Times bestselling author Susan Orlean delivers a "delightful...reflection on the past, present, and future of libraries in America" (New York magazine) that manages to tell the broader story of libraries and librarians in a way that has never been done before. In the "exquisitely written, consistently entertaining" (The New York Times) *The Library Book*, Orlean chronicles the LAPL fire and its aftermath to showcase the larger, crucial role that libraries play in our lives; delves into the evolution of libraries; brings each department of the library to vivid life; studies arson and attempts to burn a copy of a book herself; and reexamines the case of Harry Peak, the blond-haired actor long suspected of setting fire to the LAPL more than thirty years ago. "A book lover's dream...an ambitiously researched, elegantly written book that serves as a portal into a place of history, drama, culture, and stories" (Star Tribune, Minneapolis), Susan Orlean's thrilling journey through the stacks reveals how these beloved institutions provide much more than just books—and why they remain an essential part of the heart, mind, and soul of our country.

Inside Roman Libraries George W. Houston, 2014 *Inside Roman Libraries: Book Collections and Their Management in Antiquity*

Library Book, The: Design Collaborations in the Public Schools Anooradha Iyer Siddiqi, 2010-04-07 It's often said a child's lifelong love of reading begins at home. But declining literacy rates among the nation's public elementary school students suggests this maxim needs revision. For reading to become an everyday habit, it needs to be nurtured in a home of its own. Fortunately, there is space available inside most elementary schools. At just 5 percent of a school's total real estate, the school library is the most powerful and efficient way to reach 100 percent of the student body. But far too many of the nation's public school libraries lack even the most basic resources to support learning and encourage achievement. The nonprofit L!brary Initiative, created by the Robin Hood Foundation, has been working since 2001 to enhance student literacy and overall academic achievement by collaborating with school districts to design, build, equip, and staff new elementary school libraries. The L!brary Book takes readers behind the scenes of fifty groundbreaking library projects to show how widely varied

fields and communities—corporate underwriters, children's book publishers, architects, graphic designers, product manufacturers, library associations, teachers, and students—can join forces to make a difference in the lives of children. Based on the premise that good library design can actually inspire learning, the L!brary Initiative brings together some of the world's leading architects to reimagine the elementary school libraries in New York City—the nation's largest public school system. Working on a pro bono basis, architecture firms—including 1100 Architects, Weiss/Manfredi Architects, Della Valle Bernheimer, Tod Williams Billie Tsien Architects, and Dean/Wolf Architects—have in just eight years built or transformed more than fifty libraries into vital resources for the whole school community. These libraries—both beautiful learning spaces and innovative architecture—feature a wide range of design solutions, including creative uses of space, color, lighting, and furniture. Author and former L!brary Initiative director Anooradha Iyer Siddiqi documents every project with beautiful photos as well as renderings and measured drawings. The L!brary Book concludes with the chapter How to Make a Library which shows how community organizers and architects can pursue similar initiatives in their own communities.

Lost Libraries J. Raven, 2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

Resources for College Libraries Marcus Elmore, 2006 This seven-volume set offers a core collection of hand-selected titles in 58 curriculum-specific subject areas. Volumes are organized into broad subject areas such as Humanities, Languages and Literature, History, Social Sciences and Professional Studies, Science and Technology, and Interdisciplinary and Area Studies. The seventh volume provides helpful cross-referencing indexes which explain the relationship between RCL subject taxonomy and LC ranges. New to this edition are the inclusion of interdisciplinary subject areas and the selection of electronic resources and web sites essential for undergraduate library collections. Non-book selections will be easily identified by a graphic indicator included in the item record. All selections will be assigned an audience level marker indicating whether the title is most

appropriate for lower-division undergraduate, upper-division undergraduate, faculty, or general readership. Records will also include a notation if they previously appeared in BCL3 (Books for College Libraries, 1988) or have been reviewed by Choice.

Library: An Unquiet History Matthew Battles,2011-02-07 Splendidly articulate, informative and provoking....A book to be savored and gone back to.—Baltimore Sun On the survival and destruction of knowledge, from Alexandria to the Internet. Through the ages, libraries have not only accumulated and preserved but also shaped, inspired, and obliterated knowledge. Matthew Battles, a rare books librarian and a gifted narrator, takes us on a spirited foray from Boston to Baghdad, from classical scriptoria to medieval monasteries, from the Vatican to the British Library, from socialist reading rooms and rural home libraries to the Information Age. He explores how libraries are built and how they are destroyed, from the decay of the great Alexandrian library to scroll burnings in ancient China to the destruction of Aztec books by the Spanish—and in our own time, the burning of libraries in Europe and Bosnia. Encyclopedic in its breadth and novelistic in its telling, this volume will occupy a treasured place on the bookshelf next to Baker's Double Fold, Basbanes's A Gentle Madness, Manguel's A History of Reading, and Winchester's The Professor and the Madman.

Annual Report United States. National Commission on Libraries and Information Science,1980

Temples of Books gestalten,Marianne Julia Strauss,2022-03-29 In 2016, the world's oldest existing library reopened in Fes, Morocco. It opened for the first time in the 9th Century. These shrines to the written word date back even further, and continue to be built today. They're a place where some of the oldest written texts are preserved and some of the newest technology connects visitors with vast amounts of knowledge. Libraries are changing, but, as places that are fundamentally free and open to all, they're also staying the same. Libraries of the World explores the most stunning examples, but it also explores how varied the idea of a library can be. It can be a grand Baroque hall with leather-bound tomes or a mid-century masterpiece, but it can just as easily be a few shelves in a repurposed phone booth.

Report of the Libraries University of California. Library Council,1949

Shadow Libraries Joe Karaganis,2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, Shadow Libraries explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open”

publication models that have emerged in the higher education sector. From the bottom up, Shadow Libraries explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. Shadow Libraries is a study of that tension in the digital era.
