Octavio Solis

Fórmula Mágica Harald Rothermel, 2012-12 i wrote this book as a proposal. its meant to be a tool for you to access the intrinsic joy, happiness and fulfillment in (your) life. its my vision that this book becomes full of you. i believe that we are the creators of our own reality. i dont want to create anything in your life. i am not here to tell you what or how to do. you know the best, you are the expert on yourself. i only wrote the words, that i found strictly necessary. simplicity is one of the major keys to perfect understanding and happiness. i wish this book to come alive through your inspiration and creativity. i wish to contribute to your growth, learning and expansion, because expansion is our natural state. i would love this book to be a contribution for you to let go of resistance and insistence and come back into the flow of (your) life and regain your natural state of health, ease and well-being. just let go and be(come). finding the message that we want to tell ourselves, is crucial in my point of view. the message that comes out of your inner wisdom, the still small voice within, your inner truth, your soul, whatever term you prefer to use. not the message of your head, that one you listen to all day long. no, i am talking about your message. i wish that this book can assist you in changing aspects of your life, that you would like to change. that for it is a practical book that you can use every day. please fill it with your own words, drawings, scribbles etc., let it grow with you.

La Clase Mágica Olga A. Vasquez, 2013-10-11 *La Clase Mágica: Imagining Optimal Possibilities in a Bilingual Community of Learners* vividly captures the social and intellectual developments and the promises of an ongoing after-school project called *La Clase Mágica*. It is a blow-by-blow description of the early transformations of a project that began as an educational activity and slowly but deliberately turned into a social action project whose aim was to serve those with low economic and political means and little access to educational resources. This multivocal account details research in action for effectively serving Spanish-English bilingual speakers from a Mexican origin community, as well as--on a broader level--the diverse populations that increasingly characterize American society today. The focus is on the early foundational work of the project between 1989-1996, though attention is also given to the national and international recognition the project has subsequently received, the college-going patterns of its long-term participants, and the transplantation of the project to other cultural communities. The book speaks out from the zones of contact between the university and a language minority community about new ways to extend and intersect theory and practice in many areas of the educational enterprise. Contact is defined not only in the physical sense of face-to-face interaction but also as symbolic interaction between languages, cultures, histories, and epistemologies. Thus, Vásquez speaks of optimal possibilities situated in the middle grounds, or more technically speaking, in the borders between Spanish and English, Mexican and mainstream culture, minority and majority designations, and between school and community contexts where contact is made and new arrangements are imagined. This account uses the reflections of participants at times to take readers from the scientific to the everyday, to make real and concrete the theoretical conceptualizations that box in human behavior. In this way, it defines the theories, methods, and philosophies for linking multiple disciplines, institutions, and participant groups into a

concerted effort with potential to reframe the educational opportunities of under-served populations. A close look is provided into the intricacies and the fundamental principles for building and sustaining effective learning environments and institutional relations necessary for enhancing the potential of learners of all ages. In the process, the book also suggests ways in which community members and institutional agents can play an active and integral role in creating learning opportunities that serve both constituencies. Educators and policymakers will find the systems approach for pursuing parent and community involvement in the educational enterprise useful. In sum, the book offers researchers, practitioners, and policymakers much needed guidance, insight, and perhaps inspiration for rethinking educational goals and objectives.

Technology-Mediated Learning Environments for Young English Learners L. Leann Parker, 2023-05-31 This book explores issues related to the use of technologies to support young second-language learners and looks at promising areas for research, design, and development. Grounded in a sociocultural theoretical framework, it invites educators, researchers, and educational technology developers to consider a range of social and cultural factors in utilizing technology as a tool to help children from diverse linguistic and cultural backgrounds develop their English-language and reading skills. A major contribution is the authors' consideration of ways that technology outside of school can benefit these students' English-language development in school. The central chapters are counterpointed by invited reflections that bring to the discussion different, yet complementary, perspectives from notable scholars in the field of second-language literacy and learning. *Technology-Mediated Learning Environments for Young English-Language Learners* is targeted to researchers, educators, and policymakers in the areas of elementary education, after-school learning, second-language teaching and learning, English language and literacy development, and reading.
