Eastern Arabic with MP3 Files Frank A. Rice, Majed F. Sa'id, 2005 The Middle East has become an increasingly important place in the minds and concerns of the English-speaking world. This volume, originally published under the title *Jerusalem Arabic*, is the gold standard for anyone beginning to learn the Arabic spoken by Palestinians, or those who live in Syria or Lebanon. Written in transcription using the Roman alphabet, the Levantine Arabic, or Jerusalem dialect, is a central Middle Eastern dialect and is recognized by Arabs virtually anywhere--in large part due to the Palestinian diaspora--and a good choice for anyone wishing to learn a base Arabic dialect. Enhanced by a CD with MP3 files (replacing the former set of nine audiocassettes), *Eastern Arabic* provides the best available structured introduction to the essential features and vocabulary of spoken Palestinian Arabic.

formats for consumer audio storage and for transfer and playback of music on digital audio players. The MP3 compression standard along with the AAC (Advanced Audio Coding) algorithm are associated with the most successful music players of the last decade. This book describes the fundamentals and the MATLAB implementation details of the MP3 algorithm. Several of the tedious processes in MP3 are supported by demonstrations using MATLAB software. The book presents the theoretical concepts and algorithms used in the MP3 standard. The implementation details and simulations with MATLAB complement the theoretical principles. The extensive list of references enables the reader to perform a more detailed study on specific aspects of the algorithm and gain exposure to advancements in perceptual coding.
