Mini Giles Chapman,2019-05-21 Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959.

Mini-India Philipp Zehmisch,2018-02-15 Often called ‘Mini-India’, the Andaman Islands have been a crucial site of encounter between different regimes, subjects, castes, creeds, languages, and ethnicities. Since 1858, subaltern convicts, refugees, repatriates, and labourers from South and Southeast Asia have moved to the islands, condemned to, or in search of a new life. While some migrants have achieved social mobility, others have remained disenfranchised and marginalized. This ethnographic study of the Andaman settler society analyses various shades of inequality that arise from migrant communities’ material and representational access to the state. The author employs the concept of subalternity to investigate political negotiations of island history, collective identity, ecological sustainability, and resource access. Interpreting characteristic views, practices, and voices of subaltern interlocutors, the author untangles their collective agency and consciousness in migration, settlement, and place-making processes. Further, the book highlights particular subaltern strategies in order to achieve autonomy and peaceful cohabitation through movement, cultural and social appropriation, and multi-layered methods of resistance.

The book describes the implementation of several active functionalities, including liquid crystal auto focus (AF) and optical image stabilization (OIS). It also explores how new technologies, such as the curved detector and transforming optics, are stimulating novel trends, including a miniature panoramic lens on mobile phones. By providing you with an understanding of the components and performance tradeoffs of MCMs, this book will help you achieve the best camera design.
