**Nourished Planet** Barilla Center for Food and Nutrition,2018-06-28 Nourished Planet illustrates what our global food system can be - a collection of the smartest ideas to nourish us all. From urban farmers in Kenya to American doctors to government officials in Egypt, its voices demonstrate how diverse perspectives are coming together to feed the world sustainably.--back cover.

**Lucky Planet** David Waltham,2014-05-01 Science tells us that life elsewhere in the Universe is increasingly likely to be discovered. But in fact the Earth may be a very unusual planet – perhaps the only one like it in the entire visible Universe. In Lucky Planet David Waltham asks why, and comes up with some surprising and unconventional answers. Recent geological, biological, and astronomical discoveries are bringing us closer to understanding whether we might be alone in the Universe, and this book uses these to question the conventional wisdom and suggest, instead, that the Earth may have had ‘four billion years of good weather’ purely by chance. If Earth-like worlds don’t have natural stabilising mechanisms, then intelligent observers such as ourselves will only ever look out onto those rare planets where, like the Earth, all the bad things that could have happened to the climate have fortunately cancelled each other out. So before you prepare to meet the aliens, consider that we are probably alone ...

*Why Isn't Pluto a Planet?* Michael Portman,2013-01-01 For many years, it was accepted as fact that our solar system had nine planets. However, one

important meeting of astronomers in 2006 reduced that number to eight. They decided that Pluto was not a planet, a declaration that outraged some people. Readers will learn more about distant Pluto, such as how it was accidentally discovered. Brilliant photographs accompany the fascinating facts.

**My First Book of Planets** Bruce Betts, 2021-10-19 Blast off on an exploration of our solar system—a fun space book for kids 3 to 5 Get even the smallest astronomer excited for the big universe of space, from the bright and burning sun to our own blue Earth to ice-capped Pluto and every planet in between. With this book, kids will explore the entire solar system through incredible photos and fascinating facts on what makes each planet so special—like their size, distance from the sun, what the surface is like, how many moons they have, and more! This planets for kids book includes: Big, beautiful images—Vibrant photos will take kids deep into space and onto each planet—no telescope required. Astronomy for kids—Learn all about the eight planets in our solar system, plus dwarf planets Ceres, Pluto, Eris, Haumea, and Makemake. Fun space facts—Did you know the bubbles in soda are the same gas that's on Venus? Out of this world facts will keep kids glued to the page and excited to explore the sky. Show kids the amazing universe that surrounds them with this fun and engaging astronomy book.

**Planets** William B. Rice, 2010-08-20 Earth is a planet, moving around the sun. But Earth is not the only planet in our solar system! It is one of eight planets, many moons, and other objects that orbit our sun. The planets have

much in common, but they have many differences, too. In this Spanish-translated book, learn all about these exciting planets.

**The Life and Death of Planet Earth** Peter D. Ward,Donald Brownlee,2003 Planet Earth is middle-aged. Science has worked hard to piece together the story of the evolution of our world up to this point, but only recently have we developed the understanding and the tools to describe the entire life cycle of a planet. Ward and Brownlee, a geologist and an astronomer respectively, combine their knowledge of how the critical sustaining systems of our planet evolve through time with their understanding of the life cycles of stars and solar systems, to tell the story of the second half of Earth's life. The process of evolution will essentially reverse itself: life as we know it will subside until only the simplest forms remain. Eventually, they too will disappear. The oceans will evaporate, the atmosphere will degrade, and, as the sun slowly expands, Earth itself will eventually meet a fiery end. --From publisher description.

**Four-Day Planet** Henry Beam Piper,2022-11-28 Fenris isn't a hell planet, but it's nobody's bargain. With 2,000-hour days and an 8,000-hour year, it alternates blazing heat with killing cold. A planet like that tends to breed a special kind of person: tough enough to stay alive and smart enough to make the best of it. When that kind of person discovers he's being cheated of wealth he's risked his life for, that kind of planet is ripe for revolution.

*The Secret of the Ninth Planet* Donald A. Wollheim,1959 A high school senior

takes part in the first circumnavigation of the solar system, an expedition designed to solve the mystery of the theft of the sun's rays.

*Report on Planet Three and Other Speculations* Arthur Charles Clarke, 1972

**ZigZag: Every Planet Has a Place** Becky Baines, Rebecca Baines, 2008 Look up Discover that Every Planet Has a Place. The Earth is just one of many planets in our solar system. Why is this the perfect place for us to live? Which are the gas planets? And why have we changed what we think of Pluto? Then Zigzag into other questions: what does Earth look like from space? Will I ever live on Mars? What experiment can I do to swing a planet into orbit?

**Basher Science: Planet Earth** Simon Basher, Dan Gilpin, 2017-01-31 Basher Science: Planet Earth, What planet are you on? Created & illustrated by Simon Basher, written by Dan Gilpin From Basher, the illustrator who showed the periodic table in a whole new light and gave us his fresh spin on physics, biology, astronomy and rocks and minerals, comes Planet Earth. Discover the secrets of the planet we call home, from its fiery insides to the landforms and lifeforms on its surface; unlock the mysteries of Earth's ever-moving surface with its watery depths and snowy peaks, the activity in its atmosphere and the teeming life that makes it unique. Planet Earth is a compelling guide to a community of characters who keep the world in motion.

**The 12th Planet** Zecharia Sitchin, 1991-05-01 Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of

beings who once inhabited our world. The product of thirty years of intensive research, The 12th Planet is the first book in Zecharia Sitchin's prophetic Earth Chronicles series--a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. The 12th Planet brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

**What's So Special about Planet Earth?** Robert E. Wells, 2009-09-01 Move to another planet? Sounds interesting! In our imaginary spaceship, let's check out the planets in our solar system. Mercury is closest, but it has no air, and it's either sizzling hot or bitterly cold. The atmosphere on Venus is poisonous; plus, human beings would cook there. Mars might work, but you'd always have to be in a protective shelter. And if you got to the outer

planets, you couldn't even land as they are mostly made of gas! Our home planet is looking good. Why is Earth so comfortable for plants, animals, and people? As Robert E. Wells explains, it's because of our just-right position from the sun, marvelous atmosphere, and abundant water. Our planet is very special and perfect for us, and that's why we must do all we can to keep Earth healthy.

Planet Hunter Vicki Oransky Wittenstein, 2010-03-01 He has discovered more planets than anyone in history. In this inspiring true story, winner of the American Institute of Physics Award, Geoff Marcy's love of space helped him overcome struggles in his studies until finally he became an astronomer. But he was not on track to make major discoveries. Eventually, he went back to the questions that thrilled him as a boy: Are we alone? Do Earth-like planets orbit the stars in the night sky? It would not be easy to find a planet outside our solar system. Others had tried and failed. But Marcy never gave up. Since 1995, he and his colleagues have discovered nearly half of the 380 known extrasolar planets. Stunning paintings transport the reader to the exotic worlds that he and others have found.

**Hello, World! Planet Earth** Jill McDonald, 2020-10-06 Learn from home and explore the world with these fun and easy board books! Toddlers love to learn about the solar system. Here's a book all about our amazing planet Earth, with easy-to-understand facts about countries, continents, oceans, landforms, habitats, and Earth's place in space. Hello, World! is a series designed to

introduce first nonfiction concepts to babies and toddlers. Told in clear and easy terms (Light from the sun makes the moon shine) and featuring bright, cheerful illustrations, Hello, World! makes learning fun for young children. And each page offers helpful prompts for engaging with your child. It's a perfect way to bring science and nature into the busy world of a toddler, where learning never stops. *Our Changing Planet* Michael D. King, Claire L. Parkinson, Kim C. Partington, Robin G. Williams, 2007-10-25 For over 40 years, satellites have been orbiting the Earth quietly monitoring the state of our planet. Unseen by most of us, they are providing information on the many changes taking place, from movements in the land and volcanic eruptions, to human-caused changes such as the growth of cities, deforestation and the spread of pollutants in the atmosphere and oceans. Led by four editors with support from a production team at NASA Goddard Space Flight Center, many of the world's top remote sensing scientists showcase some spectacular and beautiful satellite imagery along with informed essays on the science behind these images and the implications of what is shown. This is a stunningly attractive and informative book for anyone interested in environmental issues and the beauty

of our home planet, providing inspiration for students, teachers, environmentalists and the general public alike.

**Mercury** Lincoln James, 2010-08-01 Presents general information about the planet Mercury, including its place in the solar system, what its surface is like, and what it is made of.

*Lonely Planet's Best in Travel 2020* Lonely Planet, 2019-10-22 This annual bestseller ranks the hottest countries, regions and cities for 2020, and reveals how well-planned, sustainable travel can be a force for good. Drawing on the knowledge and passion of Lonely Planet's staff, authors and online community, we present a year's worth of inspiration to take you out of the ordinary and into the unforgettable.

A Life on Our Planet Sir David Attenborough, 2020-10-06 \*Goodreads Choice Award Winner for Best Science & Technology Book of the Year\* In this scientifically informed account of the changes occurring in the world over the last century, award-winning broadcaster and natural historian shares a lifetime of wisdom and a hopeful vision for the future. See the world. Then make it better. I am 93. I've had an extraordinary life. It's only now that I appreciate how extraordinary. As a young man, I felt I was out there in the wild, experiencing the untouched natural world - but it was an illusion. The tragedy of our time has been happening all around us, barely noticeable from day to day -- the loss of our planet's wild places, its biodiversity. I have been witness to this decline. *A Life on Our Planet* is my witness statement,

and my vision for the future. It is the story of how we came to make this, our greatest mistake -- and how, if we act now, we can yet put it right. We have one final chance to create the perfect home for ourselves and restore the wonderful world we inherited. All we need is the will to do so.

**Our Planet** Alastair Fothergill, Keith Scholey, Fred Pearce, 2019-04-02 With a foreword by Sir David Attenborough, this is the striking photographic companion to the Emmy-winning NETFLIX original documentary series, presenting never-before-seen visuals of nature's most intriguing animals in action and the environmental change that has to be seen to be believed. With six hundred members of crew filming in fifty countries over four years, the directors that brought us the original Planet Earth and Blue Planet now take readers on a journey across all the globe's different biological realms to present stunning visuals of nature's most intriguing animals in action, and environmental change on a scale that must be seen to be believed. Featuring some of the world's rarest creatures and previously unseen parts of the Earth—from deep oceans to remote forests to ice caps—Our Planet takes nature-lovers deep into the science of our natural world. Revealing the most amazing sights on Earth in unprecedented ways, alongside stories of the ways humans are affecting the world's ecosystems—from the wildebeest migrations in Africa to the penguin colonies of Antarctica—this book places itself at the forefront of a global conversation as we work together to protect and preserve our planet. With a keepsake package featuring debossing and foil

stamping, this groundbreaking coffee-table book reveals the most amazing sights on Earth in unprecedented ways.
