*Prioritizing Academic Programs and Services* Robert C. Dickeson, 2010-01-26  
Prioritizing Academic Programs and Services REVISED AND UPDATED Increasing economic concerns make the new edition of this best-selling classic an invaluable resource for those who want and need to implement a proven step-by-step approach to reallocating resources in tough times. Thoroughly revised and updated, *Prioritizing Academic Programs and Services* includes new recommendations from the field, communication strategies for more successful campus implementation, a new section on the sources of hidden costs, and a Prioritization Process and Implementation workbook designed to help administrators avoid costly mistakes. This book includes access to additional content online, including models for prioritization from a variety of campuses. Based on the author's extensive consulting experience, this necessary and timely resource offers the best advice for addressing the current economic concerns affecting most colleges and universities. Praise for *Prioritizing Academic Programs and Services* For more than a decade, higher education leaders have turned to Dickeson's practical guide to academic program assessment. These newly expanded approaches are just in time for today's competitive environment. –SUZANNE SHIPLEY, president, Shepherd University Dickeson provides a compelling rationale for program prioritization as well as a practical planning structure that promotes alignment between programs, resources, and university mission. Presidents and provosts can use his approach to frame campus discussions around the future of the institution and away from legacy programs whose time has passed. –KYLE R. CARTER, provost and senior vice chancellor, Western Carolina University Dickeson's approach ensures that critical decisions regarding academic programs and resource allocation are aligned with strategic goals and institutional mission. As one of the early adopters of the process that he proposes, I am convinced that it is a powerful and practical tool for any college or university committed to remaining focused, resilient, vital, and relevant in a dynamic and increasingly challenging environment. –DAVID MAXWELL, president, Drake University

**How to Design Programs, second edition** Matthias Felleisen, Robert Bruce Findler, Matthew Flatt, Shriram Krishnamurthi, 2018-05-25 A completely revised edition, offering new design recipes for interactive programs and support for images as plain values, testing, event-driven programming, and even distributed programming. This introduction to programming places computer science at the core of a liberal arts education. Unlike other introductory books, it focuses on the program design process, presenting program design guidelines that show the reader how to analyze a problem statement, how to formulate concise goals, how to make up examples, how to develop an outline of the solution, how to finish the program, and how to test it. Because learning to design programs is about the study of principles and the acquisition of transferable skills, the text does not use an off-the-shelf industrial language but presents a tailor-made teaching language. For the same reason, it offers DrRacket, a programming environment for novices that supports playful, feedback-oriented learning. The environment grows with readers as they master the material in the book until it supports a full-fledged language for the whole spectrum of programming tasks. This second edition has been completely revised. While the book continues to teach a systematic approach to program design, the second edition introduces

different design recipes for interactive programs with graphical interfaces and batch programs. It also enriches its design recipes for functions with numerous new hints. Finally, the teaching languages and their IDE now come with support for images as plain values, testing, event-driven programming, and even distributed programming.

**Three Lines in a Circle** Michael G. Long, 2021-08-31 One line straight down. One line to the right. One line to the left, then a circle. That was all—just three lines in a circle. This bold picture book tells the story of the peace symbol—designed in 1958 by a London activist protesting nuclear weapons—and how it inspired people all over the world. Depicting the symbol's travels from peace marches and liberation movements to the end of apartheid and the fall of the Berlin Wall, *Three Lines in a Circle* offers a message of inspiration to today's children and adults who are working to create social change. An author's note provides historical background and a time line of late twentieth-century peace movements.

**Structure and Interpretation of Computer Programs** Harold Abelson, Gerald Jay Sussman, 2022-05-03 A new version of the classic and widely used text adapted for the JavaScript programming language. Since the publication of its first edition in 1984 and its second edition in 1996, *Structure and Interpretation of Computer Programs* (SICP) has influenced computer science curricula around the world. Widely adopted as a textbook, the book has its origins in a popular entry-level computer science course taught by Harold Abelson and Gerald Jay Sussman at MIT. SICP introduces the reader to central ideas of computation by establishing a series of mental models for computation. Earlier editions used the programming language Scheme in their program examples. This new version of the second edition has been adapted for JavaScript. The first three chapters of SICP cover programming concepts that are common to all modern high-level programming languages. Chapters four and five, which used Scheme to formulate language processors for Scheme, required significant revision. Chapter four offers new material, in particular an introduction to the notion of program parsing. The evaluator and compiler in chapter five introduce a subtle stack discipline to support return statements (a prominent feature of statement-oriented languages) without sacrificing tail recursion. The JavaScript programs included in the book run in any implementation of the language that complies with the ECMAScript 2020 specification, using the JavaScript package *sicp* provided by the MIT Press website.

**Global Health** Michael H. Merson, Robert E. Black, Anne J. Mills, 2011-08-19 The Third Edition (formerly titled *International Public Health*) brings together contributions from the world's leading authorities into a single comprehensive text. It thoroughly examines the wide range of global health challenges facing low and middle income countries today and the various approaches nations adopt to deal with them. These challenges include measurement of health status, infectious and chronic diseases, injuries, nutrition, reproductive health, global environmental health and complex emergencies. This thorough revision also explores emerging health systems, their financing, and management, and the roles of nation states, international agencies, the private sector and nongovernmental organizations in promoting health. Your students will come away with a clear understanding of how globalization is impacting on global health, and of the relationship between health and economic development.

*Evaluating Public and Community Health Programs* Muriel J. Harris,2016-11-14

A practical introduction to participatory program evaluation *Evaluating Public and Community Health Programs* provides a comprehensive introduction to the theory and practice of evaluation, with a participatory model that brings stakeholders together for the good of the program. Each chapter includes classroom activities and group discussion prompts, and the companion website provides worksheets, lecture slides, and a test bank for instructors. Mini cases help illustrate the real-world applications of the methods described, and expanded case studies allow students to dig deeper into practice and apply what they've learned. Accurate and effective evaluation is the key to a successful program. This book provides a thorough introduction to all aspects of this critical function, with a wealth of opportunities to apply new concepts. Learn evaluation strategies that involve all program stakeholders Link theory to practice with new mini cases and examples Understand the uses, processes, and approaches to evaluation Discover how ongoing evaluation increases program effectiveness Public and community health programs are a vital part of our social infrastructure, and the more effective they are, the more people they can serve. Hilbert's Programs and Beyond Wilfried Sieg,2013-01-24 Hilbert's Programs & Beyond presents the foundational work of David Hilbert in a sequence of thematically organized essays. They first trace the roots of Hilbert's work to the radical transformation of mathematics in the 19th century and bring out his pivotal role in creating mathematical logic and proof theory. They then analyze techniques and results of classical proof theory as well as their dramatic expansion in modern proof theory. This intellectual experience finally opens horizons for reflection on the nature of mathematics in the 21st century: Sieg articulates his position of reductive structuralism and

explores mathematical capacities via computational models.

**Mentoring Programs That Work** Jenn Labin,2017-02-15 Amazing Benefits, Unique Risks A stellar mentor can change the trajectory of a career. And an enduring mentoring program can become an organization's most powerful talent development tool. But fixing a "broken" mentoring program or developing a new program from scratch requires a unique process, not a standard training methodology. Over the course of her career, seasoned program development specialist Jenn Labin has encountered dozens of mentoring programs unable to stand the test of their organizations' natural talent cycles. These programs applied a training methodology to a nontraining solution and were ineffective at best and poorly designed at worst. What's needed is a solid planning framework developed from hands-on experimentation. And you'll find it here. *Mentoring Programs That Work* is framed around Labin's AXLES model—the first framework devoted to the unique challenges of a sustained learning process. This step-by-step approach will help you navigate the early phases of mentoring program alignment all the way through program launch and measurement. Whether your goal is to recruit and retain Millennials or deepen organizational commitment, it's time to embrace mentoring as one of the most powerful tools of talent development. *Mentoring Programs That Work* will help your organization succeed by building mentoring programs that connect people and inspire learning transfer.

**Program Evaluation** Susan P. Giancola,2020-01-03 Program Evaluation: Embedding Evaluation into Program Design and Development provides an in-depth examination of the foundations, methods, and relevant issues in the field of evaluation. With an emphasis on an embedded approach, where evaluation is an explicit part of a program that leads to the refinement of the program, students will learn how to conduct effective evaluations that foster continual improvement and enable data-based decision making. This text provides students with both the theoretical understanding and the practical tools to conduct effective evaluations while being rigorous enough for experienced evaluators looking to expand their approach to evaluation.

**Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated)**

Naeyc,2021-08 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make

decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

Policy, Program and Project Evaluation Anwar Shah, 2020-11-02 Evaluation in recent decades has evolved from a tool for project appraisals to a more widely used framework for public decision-making and operational management. Most evaluation books are focused on traditional tools of analysis such as cost-effectiveness and cost-benefit analysis to the neglect of modern tools such as multi-criteria evaluation, social marginal cost of funds analysis, data envelopment analysis, results-oriented management and evaluation and theory based evaluations. This edited volume provides an easily accessible and comprehensive survey of both traditional and modern tools of analysis that are used in the evaluation literature to evaluate public projects, programs, policies and policy analysis and advice. The book will be of interest to students, scholars, researchers, practitioners and policy makers.
