Canada and Its Provinces: The Atlantic provinces Adam Shortt, Sir Arthur George Doughty, 1914

The Province of Burma Alleyne Ireland, 1907 Alleyne Ireland (1871-1951) was a Fellow of the Royal Geographic Society in London who, in 1901, was appointed by the University of Chicago to head a commission to study colonial administration in the Far East. Ireland's first major project, published in 1907, was this exhaustive, two-volume study of Burma, at the time under British rule as a province of the Indian Empire. Volume one contains a general description of Burma, a history of Britain's acquisition of the colony, and chapters on the people, government, general administration, civil service, police administration, judicial administration, prison administration, and educational system. Volume two is devoted to economic and administrative affairs, including financial administration, the land revenue system, public works, trade and shipping, and the administration of forests, towns, villages, and harbors. Twenty-one appendices provide additional detail, including economic and demographic statistics, the texts of treaties, agreements, and reports, a bibliography, and a glossary of Indian and Burmese words. At the end of volume one is a large foldout map of Burma by Edinburgh mapmakers John Bartholomew & Co.

Art of Sharing Mary Janigan, 2020-07-23 In 1957 after a century of scathing debates and threats of provincial separation Ottawa finally tackled the dangerous fiscal inequalities among its richer and poorer provinces. Equalization grants allowed the poorer provinces to provide relatively equal services for relatively equal levels of taxation. The Art of Sharing tells the dramatic history of Canada's efforts to save itself. The introduction of federal equalization grants was controversial and wealthier provinces such as Alberta – wanting to keep more of their taxpayers' money for their own governments – continue to attack them today. Mary Janigan argues that the elusive ideal of fiscal equity in spite of dissent from richer provinces has helped preserve Canada as a united nation. Janigan goes back to Confederation to trace the escalating tensions among the provinces across decades as voters demanded more services to survive in a changing world. She also uncovers the continuing contacts between Canada and Australia as both dominions struggled to placate disgruntled member states and provinces that blamed the very act of federation for their woes. By the mid-twentieth century trapped between the demands of social activists and Quebec's insistence on its right to run its own social programs Ottawa adopted non-conditional grants in compromise. The history of equalization in Canada has never been fully explored. Introducing the idealistic Canadians who fought for equity along with their radically different proposals to achieve it The Art of Sharing makes the case that a willingness to share financial resources is the real tie that has bound the

federation together into the twenty-first century.

The Voice of the Provinces Christopher Doughan,2019 Ireland's regional newspapers were among the first to record the turbulent events that took place in the country between 1914 and 1921. But who were the personalities behind these papers and what was their background? Did they remain as impassive bystanders while dramatic developments unfolded or were they willing or unwilling participants? What were the difficulties they faced when reporting such formative and sometimes violent events? This book addresses these questions and provides a comprehensive portrayal of the regional press across the entire island at that time. The origins of Ireland's contemporary provincial newspapers, both nationalist and unionist, as well as independent, are examined and those who ran such publications are profiled. Additionally, the manner in which many of these titles reacted to events during these years is scrutinised and analysed. How did they respond to the Easter Rising? Did they foresee the rise of Sinn Féin? Did they approve of the Anglo-Irish Treaty of 1921? This was a time when regional newspapers risked censorship, suppression, possible closure, and ultimately violent attack. This book records their experiences and charts the history of Ireland's regional press during the tumultuous and violent years leading up to independence.

The Interest of These United Provinces Joseph Hill, 1673

From Provinces Into Nations Susan Cotts Watkins, 2014-07 Between 1870 and 1960, national boundaries became more evident on the demographic map of Western Europe. In most of the fifteen countries examined here, differences in marital fertility, illegitimacy, and marriage from one province (counties, cantons, arrondissements) to another diminished considerably. *From Provinces into Nations* describes this shift to greater national demographic homogeneity and places it in the context of a parallel decline in linguistic diversity, as well as in the context of increases in national market integration, the expansion of state activities, and nation-building. The book interprets the shift as evidence of the influence of communities on demographic behavior, and as an indication of the growing predominance of national over local communities. The author uses demographic data, too often the property of specialists, to examine themes of interest to historians, sociologists, economists, and political scientists interested in the integration of modern societies. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
