Plant-Fire Interactions Víctor Resco de Dios,2020-03-17 This book provides a unique exploration of the inter-relationships between the science of plant environmental responses and the understanding and management of forest fires. It bridges the gap between plant ecologists, interested in the functional and evolutionary consequences of fire in ecosystems, with foresters and fire managers, interested in effectively reducing fire hazard and damage. This innovation in this study lies in its focus on the physiological responses of plants that are of relevance for predicting forest fire risk, behaviour and management. It covers the evolutionary trade-offs in the resistance of plants to fire and drought, and its implications for predicting fuel moisture and fire risk; the importance of floristics and plant traits, in interaction with landform and atmospheric conditions, to successfully predict fire behaviour, and provides recommendations for pre- and post- fire management, in relation with the functional composition of the community. The book will be particularly focused on examples from Mediterranean environments, but the underlying principles will be of broader utility.

Patton in Mexico Michael Lee Lanning,2023-11-01 Had Lieutenant George S. Patton not served on the southern border during the Mexican Expedition of 1916, there might never have been a General George S. Patton who took the world by storm as a bold and daring commander during World War II. Relying on Patton's detailed personal journals of his eight months in Mexico, Michael Lee Lanning describes the young officer's exploits during the hunt for Pancho Villa. As an aide to General John Pershing, Patton learned leadership and logistics from the man who would soon

command American forces in World War I. Begging for a field command, he received it—and led the first motorized attack in U.S. military history and may or may not have killed two of Villa’s lieutenants. The press ate it up, and Patton learned not only how much he loved attention, but how to promote himself. In Mexico are the roots of Patton the World War II general, and Lanning tells the story deftly, focusing on Patton the man as well as Patton the commander, and always casting an eye forward to Patton’s future career. This is how Patton became Patton.
