Straits Felipe Fernandez-Armesto, 2022-03-29 An uncompromising study of the fictions, the failures, and the real man behind the myth of Magellan. With Straits, celebrated historian Felipe Fernández-Armesto subjects the surviving sources to the most meticulous scrutiny ever, providing a timely and engrossing biography of the real Ferdinand Magellan. The truth that Fernández-Armesto uncovers about Magellan's life, his character, and the events of his ill-fated voyage offers up a stranger, darker, and even more compelling narrative than the fictional version that has been celebrated for half a millennium. Magellan did not attempt—much less accomplish—a journey around the globe. In his lifetime he was abhorred as a traitor, reviled as a tyrant, self-condemned to destruction, and dismissed as a failure. Straits untangles the myths that made Magellan a hero and discloses the reality of the man, probing the passions and tensions that drove him to adventure and drew him to disaster. We see the mutations of his character: pride that became arrogance, daring that became recklessness, determination that became ruthlessness, romanticism that became irresponsibility, and superficial piety that became, in adversity, irrational exaltation. As the real Magellan emerges, so do his real ambitions, focused less on circumnavigating the world or cornering the global spice market than on exploiting Filipino gold. Straits is a study in failure and the paradox of Magellan's career, showing that renown is not always a reflection of merit but often a gift and accident of circumstance.

Straits Used for International Navigation José Antonio de Yturriaga, 1991 After an introductory chapter concerning the definition of Straits used for international navigation', the author examines in detail the evolution of the question in the years prior to the convening of UNCLOS-III, during the preparatory works of the Sea-Bed Committee and throughout the Conference. The second part of the book studies the legal norms set up by the 1982 UN Convention on the Law of the Sea concerning the regime of transit passage for maritime and air navigation applicable in most of the straits used for international navigation and the regime of innocent passage residually applied in the other straits. In the final chapter, the author makes a critical appraisal of the new regimes of navigation and overflight in straits, exposes the implications of such regimes in Spain, analyzes the applicability of the Convention's regulations before their coming into force, and examines the practice followed in the last few years by the most important States which favoured or opposed the regime of transit passage. From his position as Deputy-Head of the Spanish Delegation to the Law of the Sea Conference, Ambassador de Yturriaga participated from the very beginning in the work of UNCLOS-III and was an active protagonist in the debates of the straits' question. The book offers a first hand testimony of the straits' negotiation, which will be extremely useful for scholars and students of the Law of the Sea.

Bridging the Straits Lawrence A. Rubin, 1985-06-30 The project—the longest total suspension bridge in the world—would span the Straits of Mackinac where winds exceed eighty miles an hour and ice windrows reach a height of forty feet. It would connect two largely rural communities with a combined population of less than four thousand and would require the largest bond issue ever proposed for the construction of a bridge. Little wonder that some Wall Street investors labeled the proposition as ludicrous. Nonetheless, the Mackinac Bridge became a reality.

Tijuana Straits Kem Nunn, 2013-09-17 From Kem Nunn, the National Book Award-nominated author of *Tapping the Source* and *The Dogs of Winter*, comes an exquisitely written tale of loss and redemption. Nunn renders the dangerous beaches and waters of California's borderland as only the critically acclaimed poet laureate of surf noir can, and Tijuana Straits confirms his reputation as a master of suspense and a novelist of the first rank. When Fahey, once a great surfer, now a reclusive ex-con, meets Magdalena, she is running from a pack of wild dogs along the ragged wasteland where California and Mexico meet the Pacific Ocean -- a spot once known to the men who rode its giant waves as the Tijuana Straits. Magdalena has barely survived an attack that forced her to flee Tijuana, and Fahey takes her in. That he is willing to do so runs contrary to his every instinct, for Fahey is done with the world, seeking little more than solitude from this all-but-forgotten corner of the Golden State. Nor is Fahey a stranger to the lawless ways of the border. He worries that in sheltering this woman he may not only be inviting further entanglements but may be placing them both at risk. In this, he is not wrong. An environmental activist, Magdalena has become engaged in the struggle for the health and rights of the thousands of peasants streaming from Mexico's enervated heartland to work in the maquiladoras -- the foreign-owned factories that line her country's border, polluting its air and fouling its rivers. It is a risky contest. Danger can come from many directions, from government officials paid to preserve the status quo to thugs hired to intimidate reformers. As Magdalena and Fahey become closer, Magdalena tries to discover who is out to get her, attempting to reconstruct the events that delivered her, battered and confused, into Fahey's strange yet oddly seductive world. She examines every lead, never guessing the truth. For into this no-man's-land between two countries comes a trio of killers led by Armando Santoya, a man beset by personal tragedy, an aberration born of the very conditions Magdalena has dedicated her life to fight against, yet who in the throes of his own drug-fueled confusions has marked her for death. And so will Fahey be put to the test, in a final duel on the beaches of his Tijuana Straits.

The Straits of Malacca, Indo-China, and China John Thomson, 1875

Straits Kenneth Koch, 1998 Kenneth Koch continues to expand the range of what is possible to do in poetry. His title poem is a stirring collection of disconnected and connected sentences on such themes as love, politics, and the exploration of sub-polar seas. *Vous êtes plus beaux que vous ne pensez* is a series of bright, rapid sketches of the lives of ten artists and writers. Writing in a variant of the style of the eighteenth-century poet James Thomson, Koch revives an old genre--praise of the seasons--with his own characteristic mixture of clarity and sensuous excitement. A group of twenty-five poems called *Songs from the Plays* creates a new genre: songs written for plays that don't exist but from which plays might be imagined or constructed. *My Olivetti Speaks* is perhaps Koch's clearest and wittiest meditation on the nature of poetry itself. The themes of time and change in individual lives are given an unusual look in *Study of Time* and the Villon-like *Ballade*.

Straits and Narrows Sidney Wade, 2013-04-09 Sidney Wade's imagination is as powerful as any American poet's since Wallace Stevens." —Jordan Davis, *Slate* Sidney Wade continues to showcase her talents as a poet of potent play in this buoyant sixth collection. Oftentimes reminiscent of the work of Marianne Moore, these striking new poems—rustic, reflective, and typically set lakeside—are limber and unbelievably lean, quick as bubbling brooks, and packed with whimsy and wisdom in equal measure.

The Russian Arctic Straits R. Douglas Brubaker, 2005-01-01 The issues surrounding the regimes of ice-covered areas, international straits, and passage rights of State vessels are analysed for the purpose of assessing the status of law and State practice in Russian Arctic waters.

The Regime of Straits in International Law Bing Bing Jia, 1998 Straits are peripheral formations in the study of geography, but have long been a source of controversy in international relations. They connect separate seas and divide the territory of states. This geographical fact invites legal disputes over international boundary drawing, request for passage by foreign ships, assertion of territorial control over the waters forming straits, and the basis for a regime generally accepted as law in our times. This is a thorough and well-documented book which combines elements of history, geography, international shipping, and the law of the sea. It asks the central question: what exactly is the current law governing this area, and also goes on to consider the concept of international straits, the distinction between existing treaty-based regimes and the general regime, and the special characteristics of straits that separate them from similar arms of the sea in terms of law. In answering these questions, the author takes us back to the first regime for international straits in 1949, through to the practices of the present day. This will be an invaluable text for all international lawyers, particularly those specializing in the law of sea.

The Legal Regime of the Turkish Straits Nihan Ünlü, 2021-10-25 This is the thirteenth book in the series *International Straits of the World* initiated and

edited at the Graduate College of Marine Studies of the University of Delaware. In 1987 the ninth book in this series dealt with the Turkish Straits. Since then, however, the rapid developments of the law of the sea, especially with regard to coastal state jurisdiction and the status of international straits, has called for a new analysis of the heavily-trafficked, narrow waterway that links the Mediterranean Sea with the Black Sea. The 1982 UN Convention on the Law of the Sea provided a special regime for straits used for international navigation. [...Nothing in this part of the convention, however, affected the legal regime of the Turkish Straits. The convention exempted those straits in which passage was regulated in whole or in part by long-standing international conventions specifically related to that strait. The Montreux Convention of 1936, still in force, was designed to regulate passage through the Dardanelles, the Sea of Marmara, and the Bosphorus - or the Turkish Straits. Dr. Ünlü has addressed a key international policy question, namely, in the light of the evolving law of the sea and the special role of the International Maritime Organization, should the 1936 Montreux Convention be amended or denounced - or changed by some unilateral act of Turkey.[...] In sum, can the convention be sustained as it is, modified by unilateral action, denounced by the parties, or its provisions changed in some other way by international action? The author has even explored the possibility of making the straits a particularly sensitive sea area, allowing the coastal state to take expanded jurisdiction to prevent marine pollution. Dr. Ünlü has done a great service to scholarship on the legal regime of the Turkish Straits. She has left her readers with policy options that will be useful in trying to reconcile the use of a strait not covered by the 1982 Law of the Sea Convention with the exigencies of modern international law.

China-Taiwan Rapprochement Min-Hua Chiang,2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China. It goes beyond a consideration of trade and investment flows, and discusses also the large population flows, the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level. It considers the impact of growing economic integration on society and politics, assesses how China-Taiwan economic integration is affecting the East Asian region more widely, and explores the implications for international relations, including the United States dominance in the region. Overall, the book presents a comprehensive analysis of all the issues.
