The World in a Second Isabel Minhós Martins, 2015 A story inspired by the question, What are people doing right at this moment on the other side of the world? depicts natural and human events happening all over the world—from New York and Turkey to South Africa and Greece—at the same second.

Any Second Kevin Emerson, 2018-11-20 Marieke Nijkamp's *This is Where it Ends* meets Kathleen Glasgow's *Girl in Pieces* in a gripping novel that explores the depths of trauma and the strength it takes to rise again. Perfect for readers of Ellen Hopkins. Five years after being kidnapped, Elian's captor sends him into the mall—with a bomb strapped to his chest. Across the mall is Maya, a girl whose crippling anxiety holds her prisoner in its own way. Whether it's chance or fate, Maya keeps Eli from ending them all. And now nothing is the same. Drawn together by their dark pasts, Maya and Eli know it takes only seconds for their entire worlds to change. But time will tell if meeting each other will change them for better or worse. A riveting novel about the capacity for hope in the midst of evil. – Sara Zarr, National Book Award finalist

Second Philosophy Penelope Maddy, 2007-04-19 Many philosophers these days consider themselves naturalists, but it's doubtful any two of them intend the same position by the term. In this book, Penelope Maddy describes and practises a particularly austere form of naturalism called 'Second Philosophy'. Without a definitive criterion for what counts as 'science' and what doesn't, Second Philosophy can't be specified directly – 'trust only the methods of science!' or some such thing – so Maddy proceeds instead by illustrating the behaviours of an idealized inquirer she calls the 'Second Philosopher'. This Second Philosopher begins from perceptual common sense and progresses from there to systematic observation, active experimentation, theory formation and testing, working all the while to assess, correct and improve her methods as she goes. Second Philosophy is then the result of the Second Philosopher's investigations. Maddy delineates the Second Philosopher's approach by tracing her reactions to various familiar skeptical and transcendental views (Descartes, Kant, Carnap, late Putnam, van Fraassen), comparing her methods to those of other self-described naturalists (especially Quine), and examining a prominent contemporary debate (between disquotationalists and correspondence theorists in the theory of truth) to extract a properly second-philosophical line of thought. She then undertakes to practise Second Philosophy in her reflections on the ground of logical truth, the methodology, ontology and epistemology of mathematics, and the general prospects for metaphysics naturalized.

Second Language Acquisition Roumyana Slabakova, 2016 This textbook approaches second language acquisition from the perspective of generative linguistics. Roumyana Slabakova reviews and discusses paradigms and findings from the last thirty years of research in the field, focussing in particular on how the second or additional language is represented in the mind and how it is used in communication. The adoption and analysis of a specific model of

acquisition, the Bottleneck Hypothesis, provides a unifying perspective. The book assumes some non-technical knowledge of linguistics, but important concepts are clearly introduced and defined throughout, making it a valuable resource not only for undergraduate and graduate students of linguistics, but also for researchers in cognitive science and language teachers.

Peer Interaction and Second Language Learning Masatoshi Sato, Susan Ballinger, 2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

The Second Bride Katharine Swartz, Kate Hewitt, 2017-02-17 Ellen Tyson is living the perfect village life in Goswell. But when her stepdaughter moves in, her fragile idyll is fractured. At seventeen, Annabelle is surly, withdrawn, and adamant that she isn't, and never will be, part of her father's second family. As Ellen battles with Annabelle, new tensions arise with her husband Alex, shattering the happiness she'd once so carelessly enjoyed. Then Ellen finds a death certificate from the 1870s hidden under the floorboards, and its few stark lines awaken a curiosity in her. Ellen tries to involve Annabelle in her search for answers. But as they dig deeper into the circumstances of Sarah Mills' untimely death, truths both poignant and shocking come to light - about the present as well as the past. Interlacing the lives of Ellen Tyson and Sarah Mills, *The Second Bride* is a captivating and moving story about what it means to be a family, and the lengths we will go to for the people we love.

The Second Birth Tilo Schabert, 2015-11-20 Most scholars link the origin of politics to the formation of human societies, but in this innovative work, Tilo Schabert takes it even further back: to our very births. Drawing on mythical, philosophical, religious, and political thought from around the globe—including America, Europe, the Middle East, and China—*The Second Birth* proposes a transhistorical and transcultural theory of politics rooted in political cosmology. With impressive erudition, Schabert explores the physical fundamentals of political life, unveiling a profound new insight:

our bodies actually teach us politics. Schabert traces different figurations of power inherent to our singular existence, things such as numbers, time, thought, and desire, showing how they render our lives political ones—and, thus, how politics exists in us individually, long before it plays a role in the establishment of societies and institutions. Through these figurations of power, Schabert argues, we learn how to institute our own government within the political forces that already surround us—to create our own world within the one into which we have been born. In a stunning vision of human agency, this book ultimately sketches a political cosmos in which we are all builders, in which we can be at once political and free.

Second Language Literacy Practices and Language Learning Outside the Classroom Miho Inaba, 2018-11-21 This book presents a comprehensive and detailed study of literacy practices and language use outside of the classroom by university students of Japanese. It investigates both tasks related to classes (e.g. homework and preparation for classes) and voluntary activities in the target language (e.g. watching TV and writing emails) and discusses how values, motivations and types of activities differ between the two contexts. It employs sociocultural perspectives to observe reading and writing activities within and under the influence of individual and social contexts, such as learner motives, peer networks and the language classroom, and contributes to the related research areas in the field of second language acquisition, such as motivation, autonomous language learning and language learning strategies. Crucially, the book not only documents out-of-class literacy activities, but also examines which teaching practices facilitate and promote such out-of-class language learning and use. It considers which literacy activities in the target language students undertake out-of-class, which factors encourage or discourage such out-of-class activity and how and with which tools they undertake these activities. As such the book provides guidance for classroom teaching and suggests that slight changes to teaching practices in the classroom may enhance autonomous learning outside the classroom.

America Second Isaac Stone Fish, 2022-02-15 A timely, provocative exposé of American political and business leadership's deep ties to China: a network of people who believe they are doing the right thing—at a profound and often hidden cost to U.S. interests. The past few years have seen relations between China and the United States shift, from enthusiastic economic partners, to wary frenemies, to open rivals. Americans have been slow to wake up to the challenges posed by the Chinese Communist Party. Why did this happen? And what can we do about it? In *America Second*, Isaac Stone Fish traces the evolution of the Party's influence in America. He shows how America's leaders initially welcomed China's entry into the U.S. economy, believing that trade and engagement would lead to a more democratic China. And he explains how—although this belief has proved misguided—many of our businesspeople and politicians have become too dependent on China to challenge it. *America Second* exposes a deep network of Beijing's influence in America, built quietly over the years through prominent figures like former secretaries of state Henry Kissinger and Madeleine Albright, Disney chairman Bob Iger, and members of the Bush family. And it shows how to fight that influence—without being paranoid, xenophobic, or racist. This is an authoritative and important story of corruption and good intentions gone wrong, with serious implications not only for the future of the United States, but for the world at large.
