Social Matthew D. Lieberman, 2013-10-08 We are profoundly social creatures--more than we know. In *Social*, renowned psychologist Matthew Lieberman explores groundbreaking research in social neuroscience revealing that our need to connect with other people is even more fundamental, more basic, than our need for food or shelter. Because of this, our brain uses its spare time to learn about the social world--other people and our relation to them. It is believed that we must commit 10,000 hours to master a skill. According to Lieberman, each of us has spent 10,000 hours learning to make sense of people and groups by the time we are ten. *Social* argues that our need to reach out to and connect with others is a primary driver behind our behavior. We believe that pain and pleasure alone guide our actions. Yet, new research using fMRI--including a great deal of original research conducted by Lieberman and his UCLA lab--shows that our brains react to social pain and pleasure in much the same way as they do to physical pain and pleasure. Fortunately, the brain has evolved sophisticated mechanisms for securing our place in the social world. We have a unique ability to read other people's minds, to figure out their hopes, fears, and motivations, allowing us to effectively coordinate our lives with one another. And our most private sense of who we are is intimately linked to the important people and groups in our lives. This wiring often leads us to restrain our selfish impulses for the greater good. These mechanisms lead to behavior that might seem irrational, but is really just the result of our deep social wiring and necessary for our success as a species. Based on the latest cutting edge research, the findings in *Social* have important real-world implications. Our schools and businesses, for example, attempt to minimize social distractions. But this is exactly

the wrong thing to do to encourage engagement and learning, and literally shuts down the social brain, leaving powerful neuro-cognitive resources untapped. The insights revealed in this pioneering book suggest ways to improve learning in schools, make the workplace more productive, and improve our overall well-being.

Social Work Science Ian Shaw, 2016-04-26 What is the role of science in social work? Ian Shaw considers social work inventions, evidence-based practice, the history of scientific claims in social work practice, technology, and social work research methodology to demonstrate the significant role that scientific language and practice play in the complex world of social work. By treating science as a social action marked by the interplay of choice, activity, and constraints, Shaw links scientific and social work knowledge through the core themes of the nature of evidence, critical learning and understanding, justice, and the skilled evaluation of the subject. He shows specifically how to connect science, research, and the practical and speaks to the novel topics this integration introduces into the discipline, including experience, expertise, faith, tacit knowledge, judgment, interests, scientific controversies, and understanding.

The Social Life of Books Abigail Williams, 2017-06-27 "A lively survey...her research and insights make us conscious of how we, today, use books."—John Sutherland, The New York Times Book Review Two centuries before the advent of radio, television, and motion pictures, books were a cherished form of popular entertainment and an integral component of domestic social life. In this fascinating and vivid history, Abigail Williams explores the ways in which shared reading shaped the lives and literary

culture of the eighteenth century, offering new perspectives on how books have been used by their readers, and the part they have played in middle-class homes and families. Drawing on marginalia, letters and diaries, library catalogues, elocution manuals, subscription lists, and more, Williams offers fresh and fascinating insights into reading, performance, and the history of middle-class home life. “Williams’s charming pageant of anecdotes...conjures a world strikingly different from our own but surprisingly similar in many ways, a time when reading was on the rise and whole worlds sprang up around it.”—TheWashington Post

Social Death Lisa Marie Cacho, 2012-11-12 Winner of the 2013 John Hope Franklin Book Prize presented by the American Studies Association *Social Death* tackles one of the core paradoxes of social justice struggles and scholarship—that the battle to end oppression shares the moral grammar that structures exploitation and sanctions state violence. Lisa Marie Cacho forcefully argues that the demands for personhood for those who, in the eyes of society, have little value, depend on capitalist and heteropatriarchal measures of worth. With poignant case studies, Cacho illustrates that our very understanding of personhood is premised upon the unchallenged devaluation of criminalized populations of color. Hence, the reliance of rights-based politics on notions of who is and is not a deserving member of society inadvertently replicates the logic that creates and normalizes states of social and literal death. Her understanding of inalienable rights and personhood provides us the much-needed comparative analytical and ethical tools to understand the racialized and nationalized tensions between racial groups. Driven by a radical, relentless critique, *Social Death* challenges us to imagine a heretofore “unthinkable” politics and ethics that

do not rest on neoliberal arguments about worth, but rather emerge from the insurgent experiences of those negated persons who do not live by the norms that determine the productive, patriotic, law abiding, and family-oriented subject.

The Social Citizen Betsy Sinclair, 2012-12-10 Human beings are social animals. Yet despite vast amounts of research into political decision making, very little attention has been devoted to its social dimensions. In political science, social relationships are generally thought of as mere sources of information, rather than active influences on one's political decisions. Drawing upon data from settings as diverse as South Los Angeles and Chicago's wealthy North Shore, Betsy Sinclair shows that social networks do not merely inform citizen's behavior, they can—and do—have the power to change it. From the decision to donate money to a campaign or vote for a particular candidate to declaring oneself a Democrat or Republican, basic political acts are surprisingly subject to social pressures. When members of a social network express a particular political opinion or belief, Sinclair shows, others notice and conform, particularly if their conformity is likely to be highly visible. We are not just social animals, but social citizens whose political choices are significantly shaped by peer influence. *The Social Citizen* has important implications for our concept of democratic participation and will force political scientists to revise their notion of voters as socially isolated decision makers.

Every Book Is a Social Studies Book Jeannette

Balantic,Andrea S. Libresco,Jonie C. Kipling,2011-02-01 This text offers a teacher and student-friendly collection of lessons and activities that help educators use picture books to engage younger students in meaningful social studies

activities and bring this critical subject back in elementary schools. In order for today's children to succeed as adults, they need a solid foundation of life skills inculcated at a young age. Social studies is key to building this critical knowledge, yet less attention is being paid to social studies in elementary schools as this subject becomes more essential. The authors of this text have a solution: use picture books as dual-purpose texts that fulfill more than just language arts needs, and take the time dedicated to those lessons to simultaneously teach social studies. Each chapter of this text is organized around one of the National Council for the Social Studies' Ten Thematic Strands, covering diverse and engaging topics ranging from community and individuality to science and technology. This book serves as a vital resource for classroom teachers, methods professors, staff developers, and curriculum writers who prioritize keeping social studies a part of the elementary school curriculum.
