Developing a sales strategy for the 'T-Mobile International' account in the Siemens Mobile Network business unit Daniel Weber,2006-10-08 Diploma Thesis from the year 2006 in the subject Information Management, grade: 1,7, Cologne University of Applied Sciences, 124 entries in the bibliography, language: English, abstract: This document deals with the development of a sales strategy for a key account customer conducting business across domestic boundaries. The idea of key account management and the geographic distinction of it as well as the process of strategic management in this context are discussed. The focus lays on the adaptation of the strategic management process to the particularities of international key account management. In the course of this paper it is illustrated how key account management, with the key account customer as the core element, affects the strategic management process by using it with focus on a single customer instead for a whole industry. For the purpose of taking key account management on an international level, different levels of internationalisation are described and applied to the concept of key account management. As a result of this description the expanded concept of key account management to a global level – global account management – is presented. After describing the

essentials of strategy, key account management and strategic management, these elements are merged and the different underlying analytical concepts are presented. The main analytical concept is based on Michael E. Porter's 'competitive strategy' and the five competitive forces. Following the description and the merging of the models, the theoretical framework is applied to the practical case of the 'T-Mobile International' account at Siemens Mobile Networks. The practical case includes the analysis of the business relationship and leads to a final strategy. Keywords: Global account management Key account management Strategic management Strategy development Geographical distinction

AT&T Inc J. Timothy Hunt,Alex Wang,Becky Liu,James S. O'Rourke,2011 In an effort to gain market share and technological resources, AT&T and T-Mobile USA agreed to a merger that would create the largest mobile carrier in the country. Concerned about preserving competition in the wireless telecommunications industry, the U.S. Department of Justice has filed a lawsuit to block the transaction. AT&Ts management must now decide how to convince stakeholders that the benefits of a deal far outweigh the risks. Without this merger, AT&T would need to find an alternative way to remain competitive.

Introduction to Information Systems R. Kelly Rainey, Brad Prince, 2023-09-20 Introduction to Information Systems, 10th Edition

teaches undergraduate business majors how to use information technology to master their current or future jobs. Students will see how global businesses use technology and information systems to increase their profitability, gain market share, develop and improve their customer relations, and manage daily operations. This course demonstrates that IT is the backbone of any business, whether a student is majoring in accounting, finance, marketing, human resources, production/operations management, or MIS. In short, students will learn how information systems provide the foundation for all modern organizations, whether they are public sector, private sector, for-profit, or not-for-profit.

T-Mobile "the Un-carrier" Alan Nathan Hoffman,Natalia Gold,2016

T-Mobile competes in the red sea of telecom market. As a low-cost price leader, T-Mobile invested heavily in the customer experience and service that paid off: It is ranked number one in customer satisfaction and how consumers valued the company. While T-Mobile chalked up success after success, cases filed against the company pointed to illegal labor practices promulgated at the corporate level that were viewed as systemic practices in the company as a whole. Complaints filed against T-Mobile included preventing employees from organizing in collective bargaining units, firing employees who reported concerns about T-Mobile's practices of over-billing consumers, and discriminating against women. T-Mobile seemed to have a dual personality regarding employee engagement. The company intimidated employees who expressed labor concerns or attempted to unionize, while at the same time encouraging employees, vendors and suppliers to act with integrity and report observed instances of misconduct or ethical noncompliance. One thing was clear, however: in order to remain competitive, T-Mobile would

have to improve competencies in labor and employee relations.
