Toshiba Robert L. Cutts,2002 Toshiba is one of the world's largest manufacturing concerns, comprising of ten divisions drawing on the resources of 29 laboratories and 208 subsidiaries and affiliates. Its total workforce worldwide is larger than the British army.

Knowledge Works W. Mark Fruin,1997-06-19 This book describes why, for the past twenty-five years, Japanese productivity has been growing more rapidly than productivity in the U.S. Unlike other books on the subject of the Japanese success in manufacturing, it looks at what actually happens in factories. The author brings his experience of working at the Yanagicho Works of the Toshiba Corporation, in Kawasaki City. Like so many Japanese factories, this one is highly productive, efficient, and flexible. While the factory is ordinary looking on the outside, its workers are anything but ordinary as they constantly strive to improve the way they work and the quality of the products they produce. The key to this is the continuous creation and application of knowledge throughout the factory, from workers on the shop floor, to research and development engineers, to top management. Fruin explains how Japanese culture and religion prepare workers for their role in this process of creating and disseminating knowledge.

Goodwill Impairment Andreas Simon, Darrol J. Stanley, 2018 Toshiba Corp., the 140-year-old electronics conglomerate that has its hand in everything from installing power lines to supplying iPhone parts, has been embroiled in an accounting scandal since May 2015. The company's chief executive officer (CEO) announced his resignation in July 2015, and two previous CEOs who retained company posts are also resigning. You work as an analyst for an investment firm that owns a position in Toshiba Corp. stock. You have been given the task to better understand the appropriateness of Toshiba's accounting treatments surrounding the scandal and make a recommendation whether your firm should continue to hold Toshiba Corp. stock. At this point public knowledge is that Toshiba has made several large acquisitions over the last few years. Some of these acquisitions, however, have been challenged and may not have the desired potential for Toshiba. You wonder if Toshiba could be facing impairments on some of their acquisitions and what impact these impairments would have on Toshiba's financial results. In your analysis you will have to research United States-Generally Accepted Accounting Principles accounting standards on goodwill impairment, calculate potential future goodwill write-downs, and give a stock investment recommendation.

Toshiba Medium PLC Primer Ed Dropka, 1995-11-06

This Primer provides an introduction to programming with the EX-PDD250 software common to Toshiba Medium PLCs. If you are just starting to use Toshiba Medium PLCs, or are planning to switch to using them, this book will allow you to get acquainted with the specifics of the software quickly in a straightforward, step-by-step way. It can also be used as a general introduction to RLL and PLC programming. To supplement the text, the Toshiba demonstration disk included allows you to become familiar with basic techniques before you have to work on the real thing. The circuits in the book can be copied directly to your program, and modified to suit your needs. Introduction to Toshiba EX100 series PLC Programming. 31 circuits with descriptions and programming applications. EX-PDD250 software demonstration disk included.

Evaluation of the Toshiba Capacitor Discharge Mobile X-ray Machine G. F. Grove, 1971 Tests were performed on a Toshiba KCD-10M-6 capacitor discharge mobile x-ray machine to determine accuracy of voltage indications, the relationship between voltage setting and current time values, line voltage effects and current drain, exposure reproducibility, focal spot size and location, correspondence between the collimator and light localizer, inherent filtration, half-value layer, radiation output, and tube housing and collimator leakage. Spurious radiation was found to originate in the tube under certain conditions. These conditions were investigated, and the observed

radiation-levels are reported.

Toshiba's Fuchu Software Factory Michael A. Cusumano, 2015-08-05 Excerpt from Toshiba's Fuchu Software Factory: Strategy, Technology, and Organization This paper is part of a larger study examining the question of whether or not companies are choosing to manage a complex engineering activity such as large-scale software development with a range of strategic considerations and organizational as well as technological approaches that corresponds to the spectrum usually associated with hard manufacturing, i.e. job shops, batch organizations, and factories exhibiting various degrees of flexibility in product mixes and technologies. The research project includes the proposal of technology and policy criteria defining what a factory environment for software might look like; a survey of major software facilities in the U.S. and Japan to determine where firms stand in relation to these criteria; and detailed case studies examining the technology and policy implementation process followed at firms identified as being close to the factory model. There are several interrelated conclusions: (1) This spectrum, including factory approaches, is clearly observable in the sample of software facilities in the U.S. and Japan. (2) There appears to be nothing Inherent in software as a technology that prevents some firms from creating strategies and organizational structures to manage product and process development more effectively, even with a relatively new and complex technology such as

software. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Toshiba Corporation Patent Landscape Analysis – January 1, 1994 to December 31, 2013 Reiner E. Jargosch, Joseph Jurich, 2014-06-30 The following analysis illustrates the underlying trends and relationships of U.S. issued patents of the subject company. The analysis employs two frequently used patent classification methods: US Patent Classification (UPC) and International Patent Classification (IPC). Aside from assisting patent examiners in determining the field of search for newly submitted patent applications, the two classification methods play a pivotal role in the characterization and analysis of technologies contained in collections of patent data. The analysis also includes the company's most prolific inventors, top cited patents as well as foreign filings by technology area.
