Routledge Diccionario Técnico Inglés Routledge,1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled *The Last Lecture*. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—*Really Achieving Your Childhood Dreams*—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of

others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice,

writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Araujo, Claudia Lambach, 2023-06-02 To begin, I gratefully acknowledge the support of Appris Editor for accepting the project for an E-Book, and of IAMCR – International Association for Media and Communication Research - for the Fund to Claudia Lambach, PhD, whose Post-Doctorate Project includes the organization of the E-Book and two Dossiers with FAMECOS Journal, plus two Workshops for IAMCR Conference 2023- LYON, France, online (June 26 to September 12) and face-to-face (July 9 to 13), one in Pre-Conference and another in Post-Conference. IAMCR Conference 2023 will be in LYON, France, online (June 26 to July 5) and face-to-face (July 9 to 13). On behalf of IAMCR VIC-Visual Culture Working Group- I, Denize Araujo, PhD, thank Thomas Wiedemann, PhD, Vice-Chair and Curator of VIC CineClub, who selected five French films open for discussion, and also Roger Odin, PhD, Guest of Honor of this session of VIC CineClub, who sent comments about the film Muriel (Resnais, 1963). The E-Book Cinema/Cinéma Français/Cine Francés is VIC's proposal as an homage to Lyon, birth of cinéma and site of IAMCR Conference 2023. Appris Editor is the publisher and the publication counts with an International Scientific Committee and texts by researchers from eight countries, in the three official IAMCR idioms: English, French and Spanish, including Roger Odin's comments about the film Muriel (Resnais, 1963). The dates for the two sessions of the Workshop with the E-book authors are June 3 and 10 and the launch of it will be in Lyon, during IAMCR 2023 Conference online, from July 9 to 13. Trying to develop a multilevel dialog among the texts, I selected them according to their specific related themes and created three clusters: filmmakers and their works; comparative

film analyses; and interchanges between two countries. Four authors are included in the first cluster for sharing the same themes, two of them for discussing corporality and two for their focus on cinema history and silent movies. Two authors share the second cluster for developing comparative analyses and three authors belong to the third cluster presenting interchanges between two countries.

El medio ambiente en el nuevo universo audiovisual

León Anguiano, Bienvenido (coord.), 2016-11-20 El nuevo ecosistema audiovisual, en el que las televisiones tratan de convivir con Internet, ofrece grandes posibilidades para informar,

sensibilizar y educar al público sobre los retos ambientales a los que se enfrenta nuestra sociedad. Sin embargo, la investigación pone de manifiesto que los medios no han estado a la altura del envite, debido a la complejidad de las cuestiones ambientales, la siempre difícil relación de la ciencia con los medios de comunicación y la creciente tendencia hacia el infoentretenimiento. El medio ambiente en el nuevo universo audiovisual es el resultado tangible de un rico debate generado en la octava edición del foro «Transformar la televisión», reunido en La Casa Encendida, centro social y cultural de Fundación Montemadrid. En las páginas de este volumen, una decena de expertos en la materia analizan, con rigor y valentía, la representación audiovisual del medio ambiente en este nuevo paradigma comunicativo, en el que los formatos televisivos tradicionales han perdido peso y el vídeo en línea ha alcanzado un notable desarrollo, impulsado por las redes sociales.
