Walking Henry David Thoreau, 1914

Walking Erling Kagge, 2020-04-17 A renowned explorer and acclaimed author shows us that walking is a natural accompaniment to creativity—and among the most radical things we can do. “Simple, profound ... compelling ... [a book that] packs a surprisingly motivational punch” (GQ). Why do we walk? Where do we walk from? What is our destination? Placing one foot in front of the other and embarking on the journey of discovery are activities intrinsic to our nature. But as universal as walking is, each of us will experience it differently. For renowned explorer Erling Kagge, walking is a natural accompaniment to creativity: the occasion for the unspoken dialogue of thinking. Walking is also the antidote to the speed at which we conduct our lives, to our insistence on rushing, on doing everything in a precipitous manner.

A Philosophy of Walking Frédéric Gros, 2023-07-11 This “passionate affirmation of the simple life” explores how walking has influenced history’s greatest thinkers—from Henry David Thoreau and John Muir to Gandhi and Nietzsche (Observer) “It is only ideas gained from walking that have any worth.” —Nietzsche In this French bestseller, leading thinker and philosopher Frédéric Gros charts the many different ways we get from A to B—the pilgrimage, the promenade, the protest march, the nature ramble—and reveals what they say about us. Gros draws attention to other thinkers who also saw walking as something central to their practice. On his travels he ponders Thoreau’s eager seclusion in Walden Woods; the reason Rimbaud walked in a fury, while Nerval rambled to cure his melancholy. He shows us how Rousseau walked in order to think, while Nietzsche wandered the mountainside to

write. In contrast, Kant marched through his hometown every day, exactly at the same hour, to escape the compulsion of thought. Brilliant and erudite, *A Philosophy of Walking* is an entertaining and insightful manifesto for putting one foot in front of the other.

WALK Jonathon Stalls, 2022-08-16 A transformative collection of essays on the power of walking to connect with ourselves, each other, and nature itself. In 2010, Jonathon Stalls and his blue-heeler husky mix began their 242-day walk across the United States, depending upon each other and the kindness of strangers along the way. In this collection of essays, Stalls explores walking as waking up: how a cross-country journey through the family farms of West Virginia, the deep freedom of Nevada's High desert, and everywhere in between unlocked connections to his deepest aches and dreams--and opened new avenues for renewal, connection, and change. While most of us won't walk or roll across the country, the deep wisdom and insights that Stalls receives from the people, land, and animals he meets on his pilgrimage have profound impacts for each of us. He shares how walking deepened his relationship to himself as a gay man, offering deep and clarifying emotional medicine. He confronts the systemic racism, classism, and ableism that shape and reshape the communities he walks through. And he invites readers to become awakened activists, to begin healing our culture's profound separation from the natural world. *WALK* is for those who crave to feel and embody, not just know and study, their way through complex themes that live in each chapter: vulnerability, human dignity, presence, mystery, and resistance. With dedicated practices--like connecting to Earth stewardship, moving into vulnerability, and walking and rolling with intention--Stalls' *WALK* is an urgent and glorious call to slow down, look around, and engage with the world in front of us. It awakens us to what we miss when we're driving by, flying over, and rushing past what surrounds us. It's an invitation to move, to connect, to participate deeply in the world--and to dissolve the barriers that disconnect us from each other and the living Earth.

In Praise of Walking Shane O'Mara, 2020 Walking upright on two feet is a uniquely human skill. It defines us as a species. It enabled us to walk out of Africa and to spread as far as Alaska and Australia. It freed our hands and freed our minds. We put one foot in front of the other without thinking - yet how many of us know how we do that, or appreciate the advantages it gives us? In this hymn to walking, neuroscientist Shane O'Mara invites us to marvel at the benefits it confers on our bodies and minds. *In Praise of Walking* celebrates this miraculous ability. Incredibly, it is a skill that has its evolutionary origins millions of years ago, under the sea. And the latest research is only now revealing how the brain and nervous system performs the mechanical magic of balancing, navigating a crowded city, or running our inner GPS system. Walking is good for our muscles and posture; it helps to protect and repair organs, and can slow or turn back the ageing of our brains. With our minds in motion we think more creatively, our mood improves and stress levels fall. Walking together to achieve a shared purpose is also a social glue that has contributed to our survival as a species. As our lives become increasingly sedentary, we risk all this. We must start walking again, whether it's up a mountain, down to the park, or simply to school and work. We, and our societies, will be better for it.

The Routledge International Handbook of Walking C. Michael Hall, Yael Ram, Noam Shoval, 2017-07-28 Walking is an essentially human activity. From a basic means of transport and opportunity for leisure through to being a religious act, walking has served as a significant philosophical, literary and historical subject. Thoreau's 1851 lecture on Walking or the Romantic walks of the Wordsworths at Grasmere in the early 19th Century, for example, helped create a philosophical foundation for the importance of the act of walking as an act of engagement with nature. Similarly, and sometimes inseparable from secular appreciation, pilgrimage trails provide opportunities for finding self and others in the travails of the walk. More recently, walking has been embraced as a means of encouraging greater health and well-being, community improvement and more sustainable means of travel. Yet despite the significance of the subject of walking there is as yet no integrated treatment of the subject in the social science literature. This handbook therefore brings together a number of the main themes on the study of walking from different disciplines and literatures into a single volume that can be accessed from across the social sciences. It is divided into five main sections: culture, society and historical context; social practices, perceptions and behaviours; hiking trails and pilgrimage routes; health, well-being and psychology; and method, planning and design. Each of these highlights current

approaches and major themes in research on walking in a range of different environments. This handbook carves out a unique niche in the study of walking. The international and cross-disciplinary nature of the contributions of the book are expected to be of interest to numerous academic fields in the social and health sciences, as well as to urban and regional planners and those in charge of the management of outdoor recreation and tourism globally.

Wanderlust Rebecca Solnit, 2001-06-01 A passionate, thought-provoking exploration of walking as a political and cultural activity, from the author of *Orwell's Roses* Drawing together many histories--of anatomical evolution and city design, of treadmills and labyrinths, of walking clubs and sexual mores-- Rebecca Solnit creates a fascinating portrait of the range of possibilities presented by walking. Arguing that the history of walking includes walking for pleasure as well as for political, aesthetic, and social meaning, Solnit focuses on the walkers whose everyday and extreme acts have shaped our culture, from philosophers to poets to mountaineers. She profiles some of the most significant walkers in history and fiction--from Wordsworth to Gary Snyder, from Jane Austen's Elizabeth Bennet to Andre Breton's *Nadja*--finding a profound relationship between walking and thinking and walking and culture. Solnit argues for the necessity of preserving the time and space in which to walk in our ever more car-dependent and accelerated world.

A Book of Walks Bruce Bochy, 2015-05 Walking can do anyone good - and Bruce Bochy knows that as well as anyone. As a Major League manager, he has one of the more stressful jobs imaginable. So what does he do to relax? He goes for long walks. Whenever possible, he takes long walks as a way to clear his head, calm his soul and give his body a workout. In this charming little volume, he shares his thoughts on walking in terms that can inspire everyone to get out more often for a good walk, a great way to stay fit and healthy through the forties and fifties and beyond. Dead Man Walking Helen Prejean, 2011-02-02 #1 NATIONAL BESTSELLER • A profoundly moving spiritual journey through our system of capital punishment and an unprecedented look at the human consequences of the death penalty • Stunning moral clarity.” —The Washington Post Book World • Basis for the award-winning major motion picture starring Susan Sarandon and Sean Penn Sister Prejean is an excellent writer, direct and honest and unsentimental. . . . She almost palpably extends a hand to her readers.” —The New York Times Book Review In 1982, Sister Helen Prejean became the spiritual advisor to Patrick Sonnier, the convicted killer of two teenagers who was sentenced to die in the electric chair of Louisiana’s Angola State Prison. In the months before

Sonnier's death, the Roman Catholic nun came to know a man who was as terrified as he had once been terrifying. She also came to know the families of the victims and the men whose job it was to execute—men who often harbored doubts about the rightness of what they were doing. Out of that dreadful intimacy comes a profoundly moving spiritual journey through our system of capital punishment. Here Sister Helen confronts both the plight of the condemned and the rage of the bereaved, the fears of a society shattered by violence and the Christian imperative of love. On its original publication in 1993, *Dead Man Walking* emerged as an unprecedented look at the human consequences of the death penalty. Now, some two decades later, this story—which has inspired a film, a stage play, an opera and a musical album—is more gut-wrenching than ever, stirring deep and life-changing reflection in all who encounter it.

Forest Walking Peter Wohlleben, Jane Billinghurst, 2022-04-26 From the New York Times-bestselling author of *The Hidden Life of Trees*, this guide to awakening your senses and engaging deeply with the forest is the perfect gift for hikers and walkers. “This book will fast-track you into the joys of spending time amongst the trees.”—Tristan Gooley, author of *The Lost Art of Reading Nature's Signs* and *How to Read Water* You'll be changed after reading this fine and enchanting book.”—Richard Louv, author of *Our Wild Calling* and *Last Child in the Woods* When you walk in the

woods, do you use all five senses to explore your surroundings? For most of us, the answer is no—but when we do, a walk in the woods can go from pleasant to immersive and restorative. Forest Walking teaches you how to engage with the forest by decoding nature's signs and awakening to the ancient past and thrilling present of the ecosystem around you. What can you learn by following the spread of a root, by tasting the tip of a branch, by searching out that bitter almond smell? What creatures can be found in a stream if you turn over a rock—and what is the best way to cross a forest stream, anyway? How can you understand a forest's history by the feel of the path underfoot, the scars on the trees along the trail, or the play of sunlight through the branches? How can we safely explore the forest at night? What activities can we use to engage children with the forest? Throughout Forest Walking, the authors share experiences and observations from visiting forests across North America: from the rainforests and redwoods of the west coast to the towering white pines of the east, and down to the cypress swamps of the south and up to the boreal forests of the north. With Forest Walking, German forester Peter Wohlleben teams up with his longtime editor, Jane Billingham, as the two write their first book together, and the result is nothing short of spectacular. Together, they will teach you how to listen to what the forest is saying, no matter where you live or which trees you plan to visit next.

Walking, Weight and Wellness Martin Collis, 2006-09 *Walking, Weight and Wellness* is a practical, lifesaving book, which includes an authoritative pedometer guide and relates walking to individuals, workplaces and schools. Unique virtual walks provide a pathway to high level wellness.

A Walking Life Antonia Malchik, 2019-05-07 For readers of *On Trails*, this is an incisive, utterly engaging exploration of walking: how it is fundamental to our being human, how we've designed it out of our lives, and how it is essential that we reembrace it. I'm going for a walk. How often has this phrase been uttered by someone with a heart full of anger or sorrow? Or as an invitation, a precursor to a declaration of love? Our species and its predecessors have been bipedal walkers for at least six million years; by now, we take this seemingly arbitrary motion for granted. Yet how many of us still really walk in our everyday lives? Driven by a combination of a car-centric culture and an insatiable thirst for productivity and efficiency, we're spending more time sedentary and alone than we ever have before. If bipedal walking is truly what makes our species human, as paleoanthropologists claim, what does it mean that we are designing walking right out of our lives? Antonia Malchik asks essential questions at the center of humanity's evolution and social structures: Who gets to walk, and where? How did we lose the right to walk, and what implications does that have for the strength of our communities, the future of democracy, and the pervasive loneliness of individual lives? The loss of

walking as an individual and a community act has the potential to destroy our deepest spiritual connections, our democratic society, our neighborhoods, and our freedom. But we can change the course of our mobility. And we need to. Delving into a wealth of science, history, and anecdote -- from our deepest origins as hominins to our first steps as babies, to universal design and social infrastructure, *A Walking Life* shows exactly how walking is essential, how deeply reliant our brains and bodies are on this simple pedestrian act -- and how we can reclaim it.
