*Boston Marathon Traditions & Lore* Paul C. Clerici,2024-03-04 First run in 1897 as America's second and the world's fourth, the Boston Marathon attracts thousands thanks to its long and unique history. What began as simple start and finish lines has grown to encompass a lavish colorful artistry. An athlete and cultural exchange program with the Ohme-Hochi 30K in Japan started with four-time winner Bill Rodgers in the 1970s. Artist Bobbi Gibb was the first female finisher of the race in 1966, and she was later asked to create her own statute along the route to commemorate the event. Author Paul C. Clerici explores the history and iconic traditions of America's most famous road race.

**Climate Change and Anthropos** Linda H. Connor,2016-02-05 Anthropos, in the sense of species as well as cultures and ethics, locates humans as part of much larger orders of existence – fundamental when thinking about climate change. This book offers a new way of exploring the significance of locality and lives in the epoch of the Anthropocene, a time when humans confront the limits of our control over nature. Many scholars now write about the ethics, policies and politics of climate change, focussing on global processes and effects. The book's innovative approach to cross-cultural comparison and a regionally based study explores people's experiences of environmental change and the meaning of climate change for diverse human worlds in a changing biosphere. The main study site is the Hunter Valley in southeast Australia: an ecological region defined by the Hunter River catchment; a dwelling place for many generations of people; and a key location for transnational corporations focussed on the mining, burning and export of black coal. Abundant fossil fuel reserves tie Hunter people and places to the Asia Pacific – the engine room of global economic growth in the twenty-first century and the largest user of the planet's natural resources. The book analyses the nexus of place and perceptions, political economy and social organisation in situations where environmental changes are radically transforming collective worlds. Based on an anthropological approach informed by other ways of thinking about environment-people relationships, this book analyses the social and cultural dimensions of climate change holistically. Each chapter links the large scales of species and planet with small places, commodity chains, local actions, myths and values, as well as the mingled strands of dystopian imaginings and strivings for recuperative renewal in an era of transition.

History of the Consulate and the Empire of France Under Napoleon Adolphe Thiers,1847

History Of The Consulate And The Empire Of France Under Napoleon Vol. V [Illustrated Edition] Marie Joseph Louis Adolphe Thiers,2016-03-28 The product of twenty years of laborious hard work, this is the definitive work on Napoleon and his times at the helm of the French Nation, written by no less than the first President of the Third Republic. Thiers moved in the highest circles of society and met with many of the surviving generals and statesmen of France and her opponents and wove their recollections into this monumental history. Filled with a particularly Gallic flavour without going into hero-worship, this multi-volume history has stood the test of time. In this fifth volume Napoleon determines to crush the last of the Bourbons, those of Spain, and becoming entangled in the 'Spanish Ulcer'. Includes the Napoleonic Wars Map Pack with over 155 maps and plans following the military career of Napoleon.

*Leduc: Then & Now* Tom Dirs,2020-02-25 This is a history book about the City of Leduc from 1890 to 2018. It tells a story about the people, events, and organizations that contributed to the development of Leduc.

*The Ontario Weather Centre Summer Severe Weather Season and Program 1995* Michael J. Leduc,1995

*Ecodramaturgies* Lisa Woynarski,2020-11-25 This book addresses theatre's contribution to the way we think about ecology, our relationship to the environment, and what it means to be human in the context of climate change. It offers a detailed study of the ways in which contemporary performance has critiqued and re-imagined everyday ecological relationships, in more just and equitable ways. The broad spectrum of ecologically-oriented theatre and performance included here, largely from the UK, US, Canada, Europe, and Mexico, have problematised, reframed, and upended the pervasive and reductive images of climate change that tend to dominate the ecological imagination. Taking an inclusive approach this book foregrounds marginalised perspectives and the multiple social and political forces that shape climate change and related ecological crises, framing understandings of the earth as home. Recent works by Fevered Sleep, Rimini Protokoll, Violeta Luna, Deke Weaver, Metis Arts, Lucy + Jorge Orta, as well as Indigenous activist movements such as NoDAPL and Idle No More, are described in detail.

**Braving the Elements** David Laskin,1997-06-16 Nowhere in the world is weather as volatile and powerful as it is in North America. Scorching heat in the Southwest, hurricanes on the Atlantic coast, tornadoes in the Plains, blizzards in the mountains: Every area of the country has vastly different weather, and vastly different cultures as a result. Braving the Elements is David Laskin's delightful and fascinating history of how our unique weather has shaped a nation, and how we've tried to cope with it over centuries. Since before Columbus, the peoples of America have struggled to make sense of the capricious and violent nature of America's weather. Anasazi Indians used the rain dance (and sometimes human sacrifice) to induce rain, while the Puritans in New England blamed the sins of the community for lightening strikes and Nor'easters. IN modern times we carry on those traditions by blaming the weatherman for ruined weekends. Despite hi-tech satellites and powerful computers and 24-hour-a-day forecasting from The Weather Channel, we're still at the mercy of the whims of Mother Nature. Laskin recounts the many dramatic moments in American weather history, from the Little Ice Age to Ben Franklin's invention of the lightning rod to the Great Blizzard of the 1930's to the worries about global warming. Packed with fresh insights and wonderful lore and trivia, Braving the Elements is unique and essential reading for anyone who's ever asked, What's it like outside?

*The Canadian Federal Election of 2006* Jon H. Pammett,Christopher Dornan,2006-09-01 The Canadian Federal Election of 2006 is a comprehensive analysis of all aspects of the campaign and election that ended the 12-year Liberal reign in Canadian politics and saw the House of Commons shift from one minority government to another. The chapters, composed by leading political writers, commentators, and pollsters, examine the strategies, successes, and blunders of the major players — the Conservatives, Liberals, New Democrats, Bloc Québécois, and Greens — and also explore the role of the media coverage and the performance and influence of public opinion polls. Special features in this definitive volume explore the way candidates are nominated and the changes in the legislation governing Canadian federal elections. Finally, the book includes a detailed analysis of voting patterns and the rate of voter participation.
