Zoo Eric Baratay, Elisabeth Hardouin-Fugier, 2004 Wild animals have fascinated human observers since time immemorial. The story of our interest in collecting, classifying and dominating Nature so that its inner workings could be understood also looms large in the history of science, and thus it is surprising that the history of menageries, zoological gardens and the zoo as we know it today has been so poorly documented. This gap is addressed by Zoo, a comprehensive history of the zoo in the Western world.

The Zoological Record, 1884 Indexes the world's zoological and animal science literature, covering all research from biochemistry to veterinary medicine. The database provides a collection of references from over 4,500 international serial publications, plus books, meetings, reviews and other non-serial literature from over 100 countries. It is the oldest continuing database of animal biology, indexing literature published from 1864 to the present. Zoological Record has long been recognized as the unofficial register for taxonomy and systematics, but other topics in animal biology are also covered.

Guide to Reference and Information Sources in the Zoological Sciences Diane Schmidt, 2003-11-30 Animals have been studied for centuries. But what are the most important and relevant reference and information sources in the zoological sciences? This work is a comprehensive, thoroughly annotated directory filled with hundreds of esteemed resources published in the field of zoology, including indexes, abstracts, bibliographies, journals, biographies and histories, dictionaries and encyclopedias, textbooks, checklists and classification schemes, handbooks and field guides, associations, and Web sites. A complete revision of the award-winning *Guide to the Zoological Literature: The Animal Kingdom* (1994), this new title includes extensive, up-to-date coverage of invertebrates, arthropods, vertebrates, fishes, amphibians and reptiles, birds, and mammals. In addition, the work features a detailed introduction by the author, as well as thorough subject, title, and author indexes. Students and researchers can now quickly and easily pinpoint works in their field of study. The book is of equal importance to LIS students specializing in science or biology librarianship, as it provides a comprehensive, straight-forward overview of zoological information sources. An essential addition to the core reference collection of public and academic libraries!

Zoological Record, 1919 Zoological Record is published annually in separate sections. The first of these is Comprehensive Zoology, followed by sections recording a year's literature relating to a Phylum or Class of the Animal Kingdom. The final section contains the new genera and subgenera indexed in the volume. Each section of a volume lists the sections of that volume.

A Guide to the Zoological Literature George H. Bell,Diane Rhodes,1994-08-15 A guide to the literature of the animal kingdom, providing annotated lists of traditional and electronic sources for each major animal group (invertebrates, fish, amphibians, reptiles, birds, and mammals). Intended as a selective guide, it doesn't reflect the totality of the zoological literature, but instead describes the more important sources in the field. The lengthy annotations also evaluate works and point out their most suitable applications. While the sources cited are worldwide in scope, most are in English. In addition to a comprehensive author/title index, a subject index lists both common and scientific names of animals as well as geographical locations.
