Humor-infused, jargon-free prose interspersed with design exercises, quizzes, and illustrations make learning a snap—which is just what audiences have come to expect from this bestselling author.

Laying the Foundations Andrew Couldwell, 2019-10-16

Laying the Foundations is a comprehensive guide to creating, documenting, and maintaining design systems, and how to design websites and products systematically. It's an ideal book for web designers and product designers (of all levels) and especially design teams. Paperback

ISBN: 9780578540030 This is real talk about creating design systems and digital brand guidelines. No jargon, no glossing over the hard realities, and no company hat. Just good advice, experience, and practical tips. System design is not a scary thing — this book aims to dispel that myth. It covers what design systems are, why they are important, and how to get stakeholder buy-in to create one. It introduces you to a simple model, and two very different approaches to creating a design system. What's unique about this book is its focus on the importance of brand in design systems, web design, product design, and when creating documentation. It's a comprehensive guide that's simple to follow and easy on the eye.

The Power of Moments Chip Heath, Dan Heath, 2017-10-03 The New York Times bestselling authors of *Switch* and *Made to Stick* explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief

experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world's youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The *Power of Moments* shows us how to be the author of richer experiences.

Deep Design David Wann,1995-12 In *Deep Design*, David Wann explores a new way of thinking about design, one that asks What is our ultimate goal? before the first step has even been taken. Designs that begin with such a question -- whether in products, buildings, technologies, or communities -- are sensitive to living systems, and can potentially accomplish their mission without the seemingly unavoidable side effects of pollution, erosion, congestion, and stress. Such deep designs meet the key criteria of renewability, recyclability, and nontoxicity. Often based on natural systems, they are easy to understand and implement, and provide more elegant approaches to getting the services and functions we need. Wann presents information gleaned from interviews with more than fifty innovative designers in a wide variety of fields, and describes numerous case studies that explain the concept and practice of deep design.

The Shape of Design Frank Chimero,2012

Design ,2023-02-07 Discover the history of design with this visual celebration of key pieces, movements, and designers, from the Arts

and Craft movement to the digital age. Arranged chronologically, Design traces the evolution of design from its roots to the present day, from early chairs, pottery, and homewares to cars, graphic design, and product design. It introduces all the key designers, manufacturers, and objects, illustrating how and why different styles emerged and became popular. It also provides a fascinating insight into design movements, showing how each one began and explaining its philosophy and visual style, from the Arts and Crafts movement to mid-century modern and contemporary. Featuring expert analysis, stunning photography, and a huge range of objects both familiar and extraordinary, Design explains what makes a truly great design and reveals the hidden stories behind the everyday things all around us. With profiles of famous designers and manufacturers, such as William Morris, the Bauhaus, Alvar Aalto, Frank Lloyd Wright, and Vitra, and stunning images of iconic buildings and interiors, it provides a glorious and comprehensive view of classic design across the last two centuries.

Conditional Design Anthony di Mari, 2014-11-17 Conditional design is the sequel to Operative Design. This book will further explore the operative in a more detailed, intentional, and perhaps functional manner. Spatially, the conditional is the result of the operative. It is not a blind result however. Both terms work together to satisfy a formal manipulation through a set of opportunities for elements such as connections and apertures.

Design for People Karrie Jacobs, 2016 Most design books focus on outcome rather than on process. Scott Stowell's Design for People is groundbreaking in its approach to design literature. Focusing on 12 design projects by Stowell's design firm, Open, the volume offers a sort of oral history as told by those involved with each project-- designers, clients, interns, collaborators and those who interact with

the finished product on a daily basis. In addition to the case studies, the book features texts from influential figures in the design world, including writer Karrie Jacobs, founding editor-in-chief of Dwell magazine; plus contributions from Pierre Bernard, revolutionary French graphic artist and designer; Charles Harrison, pioneering industrial designer; Maira Kalman, artist and writer; Wynton Marsalis, composer and musician; Emily Pilloton, design activist and author of Design Revolution; Michael Van Valkenburgh, landscape architect and professor at Harvard's Graduate School of Design; and Alissa Walker, design writer and urban advocate.
